I. Introduction and Summary

A. Introduction

Department of Transportation Highways (DOTH) manages the planning, construction, and maintenance of the State of Hawaii's approximate 2,675 lane miles of highway on Oahu, Kauai, Maui, Lanai, Molokai, and Hawaii. DOTH's mission is to provide a safe, efficient, and accessible highway system through the utilization of available resources in the maintenance, enhancement, and support of land transportation facilities. DOTH's primary function is to plan, design, and supervise the construction and maintenance of the State's highway system.

DOTH commissioned an Enterprise Resource Planning (ERP) Contractor, LSI in March 2021 to provide an accounting system solution that would modernize certain State of Hawaii, Department of Transportation, Highways Division (DOTH) IT systems, associated systems, and business processes, including fully replacing DOTH's legacy Highways Financial Accounting System (HWYAC) and certain software components of DOTH Districts' AS400 systems.

The new DOTH Financial Management System (H4) will utilize SAP S/4HANA Cloud ERP and will cover DOTH Business Processes of Budget, General Ledger, Accounts Payable, Accounts Receivable, Lease Management, Fixed Assets, Procurement, Project & Grant, Federal Billing, Human Resources, Time and Labor, Payroll, Inventory Management, Plant Maintenance, Reporting, and Analytics.

DOTH also acquired a contract with IT Management Consulting Firm, Ohanasoft, to provide information technology independent verification and validation consulting services for the implementation of the DOTH Highways Financial Management System. The IV&V contractor's role is to provide an objective, neutral, third-party view of the implementation of the Highways Financial Management System with the intent of protecting the State's interests for success of the project. Throughout the system implementation, the IV&V team will perform ongoing project IV&V activities and will identify issues/deficiencies/risks with the System implementation project, provide feedback and recommendations for mitigation and improvement, and provide on-going reporting on project activities.

B. Summary

The Explore Phase started on June 1, 2021 and initially was planned to be completed on September 30, 2021. However, the explore phase has been extended a few times as more workshops were needed to discuss workflow and requirements. Also, deliverables still need to be completed and approved by DOTH. In total, more than 20 workshops were held to discuss and review As-Is, To-Be, SAP functions, solutions, and DOTH requirements in December 2021. There is still no specific planned date set for the completion of the Explore phase. It is recommended that the Go-Live date of July 1st, 2022, be revisited because it no longer seems feasible.

On December 8, 2021, Split/Waterfall funding whiteboard session was held to help with understanding the process further. It is critical that all stakeholders gain a good grasp of Split/Waterfall funding to ensure the success of the proper collaboration between the modules. Therefore, continuous participation of all consultants related to this topic is highly encouraged. Waterfall funding solution design is still in progress and needs to be completed as soon as possible.

Project Design Documents (PDD), which documents DOTH functional areas along with business processes, to-be processes and their descriptions, configuration, relevant data, cross-functional impacts, and organizational change considerations, are one of the main deliverables for the Explore phase. There has been multiple meetings surrounding the approach and completion of PDD including suggestion to change the scope of PDD and to what level of detail PDD needs to cover. Reviewing PDD continues to be a challenge due to lack of SAP understanding and training since some elements in PDD are specific to SAP processes or not detailed enough to address DOTH processes. Cross-referencing PDD with DOTH requirements continues to be a challenge. As stated in the last months' report, the preferred method would be to examine the RTM first and cross-reference the requirements with PDD.

It is recommended that DOTH request additional SAP training as needed, because we continue to observe the team's struggle in following the sections of meetings. Some of the difficulty during the meeting sessions and understanding the deliverable documents stems from a lack of understanding of SAP functionalities, its solutions, and processes.

Open Items Tracker is not regularly reviewed and some of the items in the Project Issue Log are not being followed up or detailed resolution is not present. This will pose a risk to the project overtime as non-resolved items could accumulate. There needs be a continued effort to update and monitor action items and track issues as part of the ongoing project management.

The Project Work Plan still hasn't been completed as of Dec 31, 2021.

A. Subject Category: Schedule Management

Schedule Management: Observation, Risk, Issue and Feedback/Mitigation

Issue	Impact
<p>ORI ID: I-210531-02</p> <p>The final Project Plan/Implementation Schedule has not been approved by DOTH and the deliverable is not completed. This is a foundational document for a project management and scheduling, and it is one of the most critical deliverables. Delay in the Project Plan and Implementation Schedule pose decreased confidence in being able to manage project resources efficiently and meet the final Go-Live date. Also, without the Project Plan and the Implementation Schedule DOTH has limited project visibility and it will impact schedule and resource management. It is currently unknown, at a detail level, if the number of resources are adequate to complete the project on schedule. Earlier versions of the Project Plan were not accepted partly because of oversubscribed resources and incorrect dates (i.e., one consultant or DOTH team member working more than 40 hours in a week, etc.)</p>

The Project Management Plan was delayed and has not been completed.

**Feedback/Mitigation/ Updates**

It is recommended that LSI complete the deliverable as soon as possible.

12/31/2021: No major updates.

B. Subject Category: Resource Management**Resource Management: Observation, Risk, Issue and Feedback/Mitigation****Observation****ORI ID: O-210826-01**

According to LSI responses to the requirements of Budget Preparation and Budget execution, Budget and Planning (SBP) module was proposed. However, solution design is developed in Fund Management module because SBP will not be available when Wave I goes live on 7/1/2022. The SBP is scheduled to go live on 8/1/2022, one month after the Wave I Go-Live date.

Feedback/Mitigation/Updates

It's recommended that LSI provide clear direction and roadmap for how FM will be used instead of SBP during the transition period between Wave I Go-Live and Wave II Go-Live.

10/31/2021: No major updates.

Resource Management: Observation, Risk, Issue and Feedback/Mitigation**Observation****ORI ID: O-211031-01**

There are turnovers in LSI project team members. Some team members need more time to understand information related to FHWA and DOT processes.

Resource Management: Observation, Risk, Issue and Feedback/Mitigation**Feedback/Mitigation/Updates**

LSI and DOTH should confirm that the consultants meet the qualifications as stated in the RFP, which includes FHWA experience and DOTH equivalent work experience.

Waterfall funding/Spilt is a core critical requirement for H4, however Waterfall funding/Split was not discussed as much as it should be throughout the Explore Phase. It only started to be discussed recently as an integrated solution during FHWA Billing session.

**Feedback/Mitigation/Updates**

It is recommended that waterfall funding/Split solution be designed by LSI as soon as possible.

12/2/2021: A whiteboard session is scheduled on 12/8/2021. DOTH is doing another presentation on how DOTH processes Waterfall funding/Spilt.

12/31/2021: No major updates.

Resource Management: Observation, Risk, Issue and Feedback/Mitigation**Issue****Impact****ORI ID: I-211115-02**

Workshops related to Split/Waterfall funding require all consultants to participate because this requirement impacts the various DOTH requirements, including procurement, invoice, payroll, timesheet, project, etc. However, some consultants did not attend the Split/Waterfall-related workshops.

**Feedback/Mitigation/Updates**

FHWA Billing Process starts from cost collection where participation costs are incurred. It involves Fund Management, Requisitions, Purchase Orders, Accounts Payables, and General Ledger. Therefore, respective consultants should attend FHWA related meetings to collaborate and to develop an integrated solution for waterfall funding and FHWA billing.

12/2/2021: No major updates.

12/8/2021: Most consultants attended the 12/8 Split/Waterfall whiteboard meeting. Because this topic is a critical topic, continuous participation in the meetings related to this topic is a must.

C. Subject Category: Quality Management

Quality Management: Observation, Risk, Issue and Feedback/Mitigation	
Issue	Impact
ORI ID: I-211202-01 Some LSI Deliverables contained errors and misinformation such as incorrect project name, other client's system architecture, missing/incomplete contents, etc. E.g., Technical Infrastructure Plan/Design, Project Standard Strategy, Scope Management Strategy, etc.	
Feedback/Mitigation/Updates	
It is recommended that deliverables are more carefully prepared, reviewed and proofread by LSI document quality team before submitting to DOTH for review.

E. Subject Category: External Impact Management

External Impact Management: Observation, Risk, Issue and Feedback/Mitigation	
Risk	Impact
<p>ORI ID: R-210812-01</p> <p>DOTH FMS is required to be compatible with DAGS's future statewide financial system. A meeting with DAGS was held on 8/12/2021 and DOTH and DAGS discussed the new UCOA. However, the new UCOA is still under development at DAGS and the incomplete UCOA at DAGS could cause DOTH some rework after the new statewide financial system goes live. The implementation project for the statewide financial management system has not started yet and Go-Live date has not been determined either.</p>

Requirement Management: Observation, Risk, Issue and Feedback/Mitigation**Issue****Impact****ORI ID: I-211021-02**

It is difficult for DOTH to determine if all of DOTH requirements are properly addressed and included in the correct sections in PDD since they are not cross-referenced in RTM and the requirements are not listed/referenced sequentially in PDD.

Requirement Management: Observation, Risk, Issue and Feedback/Mitigation**Feedback/Mitigation/Updates**

It is recommended that when PDD is submitted the corresponding section/module of RTM needs to be completed for DOTH to track requirements coverage, since RTM is referencing PDD.

10/28/2021: LSI project manager stated PDD is to be completed first and RTM is a result of PDD, also PDD is a living document and if there are requirements from RTM that were missed then they will be updated in PDD.

12/2/2021: No major updates.

Requirement Management: Observation, Risk, Issue and Feedback/Mitigation**Issue****Impact****ORI ID: I-211021-03**

It is difficult for DOTH users to understand and validate PDD because:

- Some requirements were not reviewed and some were not discussed in detail. Clarification and SAP solutions for requirements have not been properly documented.
- The project team training was conducted, however it was a generic introduction to SAP using PowerPoint slides. It didn't address DOTH requirements directly.
- There were not enough hands-on trainings to understand SAP functions and features. Therefore, DOTH users are having a difficult time applying them to DOTH requirements.
- Some DOTH critical core requirements were not discussed early enough in detail and not documented properly.

**Feedback/Mitigation/Updates**

It is recommended that:

- LSI and DOTH should confirm whether all the requirements are reviewed, clarified, and included in PDD.
- More training catered to DOTH should be provided.
- Core requirements should be considered to be a higher priority.

Plant Maintenance implementation should not affect Go-Live on 7/1/2021.

Requirement Management: Observation, Risk, Issue and Feedback/Mitigation**Feedback/Mitigation/Updates**

It is recommended that Plant Maintenance development is scheduled in order to not negatively impact Go-Live date for Wave I. It can go live with Wave II (or it can have its own schedule/Wave). Meanwhile, a manual upload of plant maintenance financial data to GL may need to be considered.

12/2/2021: LSI is reviewing a solution for Plant Maintenance Go-Live date.

12/31/2021: No major updates.

Requirement Management: Observation, Risk, Issue and Feedback/Mitigation**Issue****Impact****ORI ID: I-211108-01**

Budget and Planning (SBP) is a part of the H4 solution and it is supposed to encompass budget transactions, including DOTH's budget prep, execution, A-15, A-19, and A-21. However, LSI proposed that solution design for A-15, A-19, and A-21 will remain in Funds Management until Budget and Planning consultant is available in the future. The H4 Project Team with the SBP consultant will determine the best solution for processing budget maintenance requirements: A-15, A-19, and A-21.

**Feedback/Mitigation/Updates**

It is recommended that H4 Project Team design a permanent solution that will best fit DOTH budget requirements from its first design by engaging the SBP consultant, instead of postponing designing the solution.

Requirement Management: Observation, Risk, Issue and Feedback/Mitigation**Observation****ORI ID: O-211115-01**

A back-end split waterfall funding solution for FHWA billing is generally more common in the Department of Transportation Highways. However, the Department of Transportation Highways in Hawaii runs on a front-end split waterfall funding with many funds/appropriations. During the procurement process of a new DOTH Financial Management System, LSI proposed and confirmed that a front-end split waterfall funding would fit DOTH's requirements the best. When H4 project started, the financial lead took leadership and discussed a broad overview of how the future front-end split waterfall funding could work in SAP. Soon after, the financial lead left H4 project and LSI confirmed again that a front-end split waterfall funding is still the best solution for DOTH.

LSI and DOTH had different views on what information and level of details PDD should include. LSI is looking at PDD from a higher level/summary perspective compared to DOTH and DOTH is requesting PDD to be more detailed in order to understand the document and the To-Be processes fully.

**Feedback/Mitigation/Updates**

PDD should be developed and compiled based on the Deliverable Expectation Document and LSI and DOTH should come to an agreement on where the discrepancies are with the expectations for the documents.

Solution Design and Configuration: Observation, Risk, Issue and Feedback/Mitigation	
Issue	Impact
<p>ORI ID: R-211118-01</p> <p>The consultants do not seem to have experience of FHWA with many appropriations and with front-end split. These are unique requirements that Hawaii DOTH have that adds to the difficulty of the project for the consultants to understand the process and design the solution. Some consultants have very limited experience in those fields and it amplifies the difficulty. Some explore sessions showed that there are still areas that require better understanding of the processes.</p>	
Feedback/Mitigation/Updates	
<p>There may need to be more sessions for a better and full understanding of the FHWA Billing, front-end split, waterfall funding, many-to-many relationship with appropriations and projects, along with any other module or area that need more information for PDD.</p> <p>The H4 Project Team should ensure the implementation consultants meet the qualifications discussed in the RFP.</p> <p>12/2/2021: No major updates.</p> <p>12/31/2021: No major updates.</p>

DOTH project team members are not familiar with H4 system functions and features for PDD review and having difficulty applying them to DOTH's requirements.

Feedback/Mitigation/Updates

It is recommended that DOTH project team members request DOTH-specific one-on-one, hands-on training and question and answer sessions for more familiarity with H4 because the project team training conducted by LSI in May 2021 was based on generic and high-level non-DOTH specific requirements without much detail, nor live system demo with exercises.

A. Impact Definition

Value	Legend	Description
N/A		Not Applicable
No Impact		No Impact
Low		A priority of Low is assigned if there is a possibility of low impact to product quality, scope, cost, and/or schedule. Minimal disruption is possible and some monitoring is likely needed to ensure priority does not increase.
Medium		A priority of Medium is assigned if there is a possibility of moderate impact to product quality, scope, cost, and/or schedule. Some disruption is likely and a different approach may be required. Mitigation strategies should be implemented as soon as feasible.
High		A priority of High is assigned if there is a possibility of substantial impact to product quality, scope, cost, and/or schedule. A major disruption is likely and the consequences would be unacceptable. A different approach is required. Mitigation strategies should be evaluated and acted upon immediately.

O-210514-01	Observation	M210514-2	5/14/2021	Training and Knowledge Transfer	N/A	SAP Terminology	DOTH project team members stated that during the SAP project team training (Introduction to SAP), DOTH project team members had difficulty understanding SAP's terminology and relating SAP's terminology and standard functions to DOTH's requirements. The introduction to SAP training was mostly centered around SAP standard functionality and did not strongly correlate to DOTH's requirements.	DOTH/LSI	Closed	N/A	N/A	LSI consultants need to learn and be more familiar with DOTH's business requirements along with DOTH's terminology and processes as listed in RFP and LSI's proposal. Also DOTH project team members should learn and be more familiar with SAP terminologies as well. LSI should start to dive into DOTH's requirements and conduct the training with DOTH's specific requirements, not only generic SAP standard functions. Cross reference of terminology (SAP & DOTH terminology glossary) would help DOTH project team members to understand how SAP functionality will work for DOTH's requirements.		5/31/2021	5/31/2021

I-210531-02	Issue	M210527-1	5/31/2021	Schedule Management	N/A	Project Plan and Implementation Schedule	The final Project Plan/Implementation Schedule has not been completed and submitted to DOTH. This is a foundational document for a project management and scheduling and one of the most critical deliverables. Delay in the Project Plan and Implementation Schedule pose decreased confidence in being able to meet the final Go-Live date. Also, without the Project Plan and the Implementation Schedule DOTH has limited project visibility and it will impact schedule and resource management.	LSI	In Progress	High	N/A	LSI should complete Project Plan/Implementation Schedule as soon as possible.	6/3/2021: The New Target Date for Project Plan/Implementation Schedule is set to 6/11/21 by LSI. 6/14/2021: Updated project plan was submitted by LSI but returned back to LSI due to incompleteness. 7/1/2021: It is currently unknown, at a detail level, if the number of resources are adequate to complete the project on schedule. Earlier versions of the Project Plan were not accepted partly because of oversubscribed resources and incorrect dates (i.e. one consultant or DOTH team member working more than 40 hours in a week, etc.) - 11/16/2020: The initial project plan was submitted and returned back to LSI after DOTH review due to incompleteness. - 12/21/2020: Updated project plan was submitted by LSI but returned back to LSI after DOTH review due to incompleteness. - 4/26/2021: Updated project plan was submitted by LSI but returned back to LSI after DOTH review due to incompleteness. - 6/14/2021: Updated project plan was submitted by LSI but returned back to LSI after DOTH review due to incompleteness. - 7/1/2021: Updated project plan was submitted by LSI but returned back to LSI after DOTH review due to incompleteness. LSI	Closed	N/A	N/A	LSI and DOTH should facilitate and run workshops effectively to cover all the processes with sufficient details within the allotted time. O-210804-01	Observation	M210804-2	8/4/2021	Resource Management	BD	Participation of Budget and Planning Consultant	Budget and Planning module in Wave 2 is schedule to go live in 8/1/2022 one month after Wave I Go-Live. However, a consultant for Budget and Planning (SBP) module has not participated in the O&M and CIP budget sessions in the Explore Phase.	DOTH/LSI	Closed	N/A	N/A	LSI may consider a Budget and Planning (SBP) consultant participate in O&M and CIP budget As-is, To-Be and Requirements Analysis sessions in the current Wave I Explore Phase instead of waiting for the scheduled Wave II explore phase. O-211028-01	Observation	M211028-1	10/28/2021	Solution Design and Configuration	N/A	PDD	Implementation of Inventory and Plant maintenance modules have not been decided. Project Design Document (PDD) does not reflect System/Configuration alternatives on DOTH's decision of whether or not to carry out inventory and plant maintenance module with full implementation scope.	DOTH/LSI	Closed	N/A	N/A	It is recommended that Project Design Document (PDD) include potential system/configuration solutions depending on DOTH's implementation scope decision.	11/3/2021: DOTH made a decision to include Inventory and Plant Maintenance modules in scope.	11/18/2021	11/18/2021		
O-211028-02	Observation	M211028-1	10/28/2021	Risk/Issue Management	N/A	Issue Log	Some items from issue log are being discussed without detailed resolution or follow-up.	DOTH/LSI	Open	N/A	N/A	It is recommended that the issue log be reviewed and discussed in more detail with proper LSI resources and resolution should be discussed the PMO meeting. A separate meeting or inviting the proper LSI resource during the PMO meeting may be required.	11/18/2021: No major updates. 12/2/2021: No major updates. 12/31/2021: No major updates.	12/31/2021			
O-211028-03	Observation	M211028-1	10/28/2021	Training and Knowledge Transfer	N/A	Training	DOTH project team members are not familiar with H4 system functions and features for PDD review and having difficulty applying them to DOTH's requirements.	DOTH/LSI	Open	N/A	N/A	It is recommended that DOTH project team members request DOTH-specific one-on-one, hands-on training and question and answer sessions for more familiarity with H4 because the project team training conducted by LSI in May 2021 was based on generic and high-level non-DOTH specific requirements without much detail, nor live system demo with exercises.	11/18/2021: No requests for trainings have been made. Training for the project team members should be conducted as soon as possible. 12/2/2021: No major updates. 12/31/2021: No major updates.	12/31/2021			
O-211031-01	Observation	M211028-1	10/31/2021	Resource Management	N/A	Resource Qualification	There are turnovers in LSI project team members. Some team members need more time to understand information related to FHWA and DOT processes.	DOTH/LSI	Open	N/A	N/A	LSI and DOTH should confirm that the consultants meet the qualifications as stated in the RFP, which includes FHWA experience and DOTH equivalent work experience.	11/18/2021: No major updates. 12/2/2021: No major updates. 12/31/2021: No major updates.	12/31/2021			
O-211103-01	Observation	M211103-1	11/3/2021	Requirement Management (Processes, Requirements and Fit/Gap)	PM	PM Implementation	Plant Maintenance implementation should not affect Go Live on 7/1/2021.	DOTH/LSI	Open	N/A	N/A	It is recommended that Plant Maintenance development is scheduled in order to not negatively impact Go-Live date for Wave I. It can go live with Wave II (or it can have its own schedule/Wave). Meanwhile, a manual upload of plant maintenance financial data to GL may need to be considered.	12/2/2021: LSI is reviewing a solution for Plant Maintenance Go-Live date. 12/31/2021: No major updates.	12/31/2021			
I-211108-01	Issue	M211108-1	11/8/2021	Requirement Management (Processes, Requirements and Fit/Gap)	BD	Budget and Planning (SBP)	Budget and Planning (SBP) is a part of the H4 solution and it is supposed to encompass budget transactions, including DOTH's budget prep, execution, A-15, A-19, and A-21. However, LSI proposed that solution design for A-15, A-19, and A-21 will remain in Funds Management until Budget and Planning consultant is available in the future. The H4 Project Team with the SBP consultant will determine the best solution for processing budget maintenance requirements: A-15, A-19, and A-21.	DOTH/LSI	Open	Medium	N/A	It is recommended that H4 Project Team design a permanent solution that will best fit DOTH budget requirements from its first design by engaging the SBP consultant, instead of postponing designing the solution.	12/2/2021: No major updates. 12/31/2021: No major updates.	12/31/2021			
O-211115-01	Observation	M211115-1	11/15/2021	Requirement Management (Processes, Requirements and Fit/Gap)	PG	Waterfall Funding Solution	A back-end split waterfall funding solution for FHWA billing is generally more common in the Department of Transportation Highways. However, the Department of Transportation Highways in Hawaii runs on a front-end split waterfall funding with many funds/appropriations. During the procurement process of a new DOTH Financial Management System, LSI proposed and confirmed that a front-end split waterfall funding would fit DOTH's requirements the best. When H4 project started, the financial lead took leadership and discussed a broad overview of how the future front-end split waterfall funding could work in SAP. Soon after, the financial lead left H4 project and LSI confirmed again that a front-end split waterfall funding is still the best solution for DOTH.	LSI	Open	N/A	N/A	N/A	12/2/2021: No major updates. 12/31/2021: No major updates.	12/31/2021			
I-211115-01	Issue	M211115-1	11/15/2021	Resource Management	FB	Consultants for FHWA	Waterfall funding/Spilt is a core critical requirement for H4, however Waterfall funding/Spilt was not discussed as much as it should be throughout the Explore Phase. It only started to be discussed recently as an integrated solution during FHWA Billing session.	LSI	Open	Medium	N/A	It is recommended that waterfall funding/Spilt solution be designed by LSI as soon as possible.	12/2/2021: A whiteboard session is scheduled on 12/8/2021. DOTH held a workshop and presented again how DOTH processes Waterfall funding/Spilt.	12/31/2021

I-211115-02	Issue	M211115-1	11/15/2021	Resource Management	FB	Consultants for FHWA	Workshops related to Split/Waterfall funding require all consultants to participate because this requirement impacts the various DOTH requirements, including procurement, invoice, payroll, timesheet, project, etc. However, some consultants did not attend the Split/Waterfall-related workshops.	LSI	Open	Low	N/A	FHWA Billing Process starts from cost collection where participation costs are incurred. It involves Fund Management, Requisitions, Purchase Orders, Accounts Payables, and General Ledger. Therefore, respective consultants should attend FHWA related meetings to collaborate and to develop an integrated solution for waterfall funding and FHWA billing.	12/2/2021: No major updates. 12/8/2021: Most consultants attended the 12/8 Split/Waterfall whiteboard meeting. Because this topic is a critical topic, continuous participation in the meetings related to this topic is a must.	12/31/2021				
R-211118-01	Risk	M211118-1	11/18/2021	Solution Design and Configuration	FB	Waterfall Funding Solution	The consultants do not seem to have experience of FHWA with many appropriations and with front-end split. These are unique requirements that Hawaii DOTH have that adds to the difficulty of the project for the consultants to understand the process and design the solution. Some consultants have very limited experience in those fields and it amplifies the difficulty. Some explore sessions showed that there are still areas that require better understanding of the processes.	LSI	Open	Medium	Medium	There may need to be more sessions for a better and full understanding of the FHWA Billing, front-end split, waterfall funding, many-to-many relationship with appropriations and projects, along with any other module or area that need more information for PDD. The H4 Project Team should ensure the implementation consultants meet the qualifications discussed in the RFP.	12/2/2021: No major updates. 12/31/2021: No major updates.	12/31/2021				
I-211202-01	Issue	M211202-1	12/2/2021	Quality Management	N/A	Errors, Omission, Inaccuracy in Deliverables	Some LSI Deliverables contained errors and misinformation such as incorrect project name, other client's system architecture, missing/incomplete contents, etc. E.g., Technical Infrastructure Plan/Design, Project Standard Strategy, Scope Management Strategy, etc.	LSI	Open	Medium	N/A	It is recommended that deliverables are more carefully prepared, reviewed and proofread by LSI document quality team before submitting to DOTH for review.		12/31/2021				
I-211202-02	Issue	M211202-1	12/2/2021	Quality Management	N/A	Process Flow Formatting	Consultants worked on PDDs based on their responsible business areas. However, Process Flows Diagrams are not standardized in PDDs.	LSI	Open	Low	N/A	N/A			12/31/2021			
I-211216-01	Issue	M211216-1	12/16/2021	Requirement Management (Processes, Requirements and Fit/Gap)	N/A	Level of Detail/Accuracy on PDD	LSI and DOTH had different views on what information and level of details PDD should include. LSI is looking at PDD from a higher level/summary perspective compared to DOTH and DOTH is requesting PDD to be more detailed in order to understand the document and the To-Be processes fully.	DOH/LSI	Open	Medium	N/A	PDD should be developed and compiled based on the Deliverable Expectation Document and LSI and DOTH should come to an agreement on where the discrepancies are with the expectations for the documents.		12/31/2021
