DAVID Y. IGE GOVERNOR

DOUGLAS MURDDOCK CHIEF INFORMATION OFFICER

OFFICE OF ENTERPRISE TECHNOLOGY SERVICES P.O. BOX 119, HONOLULU, HAWAI'I 96810-0119

Ph: (808) 586-6000 | Fax: (808) 586-1922 ETS.HAWAII.GOV

May 31, 2022

The Honorable Ronald D. Kouchi, President, and Members of The Senate Thirty-First State Legislature Hawaii State Capitol, Room 409 Honolulu, Hawaii 96813 The Honorable Scott K. Saiki, Speaker, and Members of The House of Representatives Thirty-First State Legislature Hawaii State Capitol, Room 431 Honolulu, Hawaii 96813

Dear President Kouchi, Speaker Saiki, and Members of the Legislature:

Pursuant to HRS section 27-43.6, which requires the Chief Information Officer to submit applicable independent verification and validation (IV&V) reports to the Legislature within ten days of receiving the report, please find attached the IV&V report the Office of Enterprise Technology Services received for the State of Hawaii Department of Labor& Industrial Relations Disability Compensation Division's Modernization Project – Electronic Case Management System.

In accordance with HRS section 93-16, this report may be viewed electronically at <u>http://ets.hawaii.gov</u> (see "Reports").

Sincerely,

J-Mucho

DOUGLAS MURDOCK Chief Information Officer State of Hawai'i

### **EXECUTIVE SUMMARY**

#### BACKGROUND

The State of Hawaii (State), Department of Labor and Industrial Relations (DLIR) contracted DataHouse Consulting, Inc. (DataHouse) for the Disability Compensation Division's (DCD) Electronic Case Management System Project (eCMS Project). DLIR contracted Accuity LLP (Accuity) to provide Independent Verification and Validation (IV&V) services for the eCMS Project.

The Initial On-Site IV&V Review Report (IV&V Initial Report) was issued on August 30, 2019 and provided an initial assessment of project health as of June 30, 2019. Refer to the full Initial Report for additional background information on the eCMS Project and IV&V. The Monthly On-Site IV&V Review Reports (IV&V Monthly Reports) build upon the Initial Report to update and continually evaluate project progress and performance. Refer to Appendix E: Prior IV&V Reports for a listing of prior reports.

The focus of our IV&V activities for this report included the completion of a twomonth assessment of configuration management and the beginning of a twomonth assessment of system development, design, and integration. IV&V has areas of limited visibility or access to project activities and documentation that may prevent a complete identification of project risks.

The IV&V Dashboard on the following two pages provides a quick visual and narrative snapshot of both the project status and project assessment as of April 26, 2022. Additional explanation is included in Findings and Recommendations by Assessment Area for new findings and in Appendix D: Prior Findings Log for prior report findings. Refer to Appendix A: IV&V Criticality and Severity Ratings for an explanation of the ratings.

TRAINING AND SUPPORT

*"Anything is possible when you have the right people there to Support you."*

# PROJECT ASSESSMENT

AS OF APRIL 26, 2022

OVERALL RATING

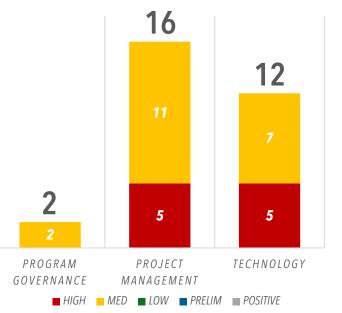

Significant severe deficiencies were observed requiring immediate remediation or risk mitigation.

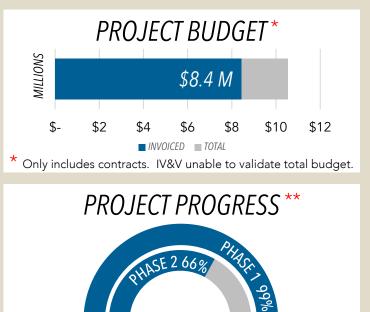

## 30 OPEN FINDINGS

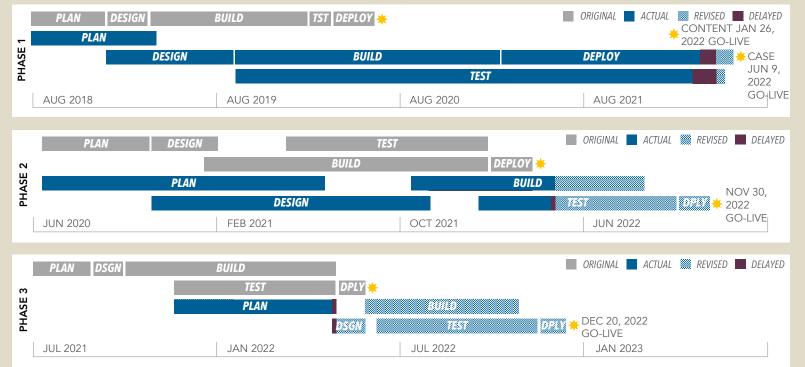

### SEVERITY RATINGS BY ASSESSMENT AREA

## 50 OPEN RECOMMENDATIONS

\*\* As of 04/25/22. IV&V unable to verify %.

## ASSESSMENT AREA & RATINGS SUMMARY

AS OF APRIL 26, 2022

| FEB | MAR | APR | IV&V ASSESSMENT AREA  | IV&V OBSERVATIONS  |
|-----|-----|-----|-----------------------|--|
| R   | R   | R   | Overall               | Phase 1 Case Management go-live was deferred to June 9, 2022. As this date is quickly approaching, it is critical<br>to clarify and finalize details in many areas of the project. The number of outstanding project risks and issues<br>may impact DLIR operations if not addressed prior to go-live.   |
|     |     |     |                       | <i>Project Schedule</i> : Key Phase 1 Case Management tasks are delayed under the newly re-baselined schedule.<br>Phase 2 and Phase 3 tasks are generally on track with the re-baselined schedule. Accuity is unable to fully assess<br>schedule variances (refer to finding 2019.07.PM13).  |
|     |     |     |                       | <i>Project Costs</i> : Four additional procurements are currently under way, one of which could significantly impact the total cost of the project. DataHouse is prepaid for Phase 1 and 2 but is adjusting Phase 3 invoices under the revised payment schedule. Accuity is unable to fully assess cost variances (refer to finding 2019.07.PM12).   |
|     |     |     |                       | <i>Quality</i> : DLIR and DataHouse continue to address system issues in production for Phase 1 Content<br>Management and during user acceptance testing (UAT) for Phase 1 Case Management. Quality metrics still<br>need to be defined and collected (refer to finding 2019.07.IT05).   |
|     | Y   | Y   | Program<br>Governance | The eCMS Project Executive Steering Committee (ESC) reconvened to discuss project status, major risks, issues, and decisions. In addition, the ESC approved the re-baselined project schedule. The ESC needs to play a greater role to drive progress and enforce accountability to prevent the continual cycle of delays.   |
| R   | R   | R   | Project<br>Management | Although the project schedule was revised, the June 2022 Phase 1 Case Management go-live is quickly approaching and key tasks are already delayed. Plans for Phase 1 Case Management go-live need to be clarified and finalized including go-live communication activities for external stakeholders, training format and dates, organizational change management (OCM) activities and metrics, and business processes around the new system. The Phase 3 requirements deliverable was provided and is pending DLIR's review and approval. DLIR and DataHouse should continually reassess and adjust foundational project management processes (refer to Appendix D: Prior Findings Log) to prevent future delays and improve project performance.   |
|     |     |     | Technology            | With Phase 1 Case Management go-live six weeks away, the go/no-go criteria, transition checklist, and DLIR testing must be completed. Under the re-baselined schedule, UAT was to be completed by the end of April but is now delayed to mid-May. DLIR's performance of end-to-end testing and plans for regression testing are also still pending. Phase 1 Content Management technical system issues continue to be addressed but the complete status of open issues, the root cause of issues, and system operation roles, procedures, and metrics remain unclear. DLIR turned the legacy Content Management system to read-only which should help to improve user adoption. Phase 2 development sprints continue to progress, but Phase 3 design is on hold for DLIR approval of requirements deliverable. Improvements are still needed for many foundational technology processes (refer to Appendix D: Prior Findings Log). IV&V does not have adequate visibility of DataHouse development, testing, and data conversion activities. |

### FINDINGS AND RECOMMENDATIONS BY ASSESSMENT AREA

#### KEY PROGRESS

Revised Phase 1, 2, and 3 go-lives **APPROVED** 

| Phase 2 development        |
|----------------------------|
| sprints <b>PROGRESSING</b> |

Phase 3 requirements deliverable **COMPLETED** 

| KEY | RISKS |
|-----|-------|
|     |       |

Case Management OPERATIONAL risk

Need to **PLAN** and **EXECUTE** training and other go-live activities

**CONTINUOUS** reassessment and adjustment needed The overall rating is assigned based on the criticality ratings of the IV&V Assessment Categories and the severity ratings of the underlying findings (see Appendix A: IV&V Criticality and Severity Ratings). The tables below summarize the criticality ratings for each IV&V Assessment Category in the three major IV&V Assessment Areas. Six IV&V Assessment Categories declined from the prior report. Although the schedule for all three phases were re-baselined, there are already delays that may impact the feasibility of Phase 1 Case Management go-live. Additionally, the number of outstanding project risks and issues may collectively have a significant impact on DLIR operations if not addressed prior to go-live.

Business Process Reengineering

Training and Knowledge Transfer

#### TITLE: INSUFFICIENT TRAINING DETAILS

**Finding:** Insufficient planning and preparation of training activities may limit the project's deployment timeline and user adoption.

**Industry Standards and Best Practices:** Prosci research and Institute of Electrical and Electronics Engineers (IEEE) 15288-2015 Sections 6.2.4, 6.2.6, and 6.4.10 outline best practices for training strategies.

**Analysis:** DataHouse completed their training materials deliverable and train-the-trainer sessions. DLIR is responsible for training other users, however, there is no formal training plan or approach. With Phase 1 Case Management go-live quickly approaching, the training program details need to be finalized and executed to allow users sufficient time to learn and familiarize themselves with the new systems. Some DCD users already received training through participation in UAT. The amount of training and supplemental sessions provided to testers for UAT demonstrates the steep learning curve and long runway time needed for users to learn how to use the new system. DLIR intends for these users to be the network that will help provide informal training and support to other users in their areas. However, some areas do not have a representative from their area (e.g., district offices) or the assigned representative did not actively participate in the UAT supplemental training sessions. Providing formal training will help to ensure that everyone receives consistent, baseline training. DLIR continues to update DataHouse provided training materials with additional information learned during UAT. However, these documents are more focused around and organized by system features rather than business processes.

#### **Recommendations**: 2022.04.PM01.R1 – Finalize a detailed training schedule.

• Include specific dates, times of sessions, trainers, tasks, attendees, curriculum, and materials.

2022.04.PM01.R2 – Develop standard operating procedures.

• Develop specific standard operating procedures for employees to understand how to perform their work using the current workflows in the new system.

#### 2022.04.PM01.R3 - Collect feedback on training.

• Develop surveys to get user feedback to improve future trainings, to measure the effectiveness of training, and to determine the need for additional training activities.

| System Software,<br>Hardware, and<br>Integrations<br>Design<br>Data Conversion<br>Quality Management<br>and Testing<br>Configuration<br>Management<br>Security | æ           |                 | R   | Quality<br>Management and<br>Testing | 40% of Phase 1 Case Management UAT test cases<br>are completed which is significantly below the<br>percentage completion targets. Issues related to<br>permissions settings for DLIR testers are still<br>contributing to delays. Under the re-baselined<br>schedule, UAT was to be completed by the end of<br>April but is now delayed to mid-May. DLIR has<br>been trending at 13% test case completion per<br>month. With up to 60% test cases to complete in<br>less than 3 weeks, this is an aggressive target. DLIR<br>also needs to complete their end-to-end testing<br>during this time. DLIR and DataHouse must work<br>together to prioritize and address UAT execution<br>issues (2020.12.IT01). Additionally, test plans for<br>Phase 1 regression testing as well as Phase 2 UAT<br>need to be detailed out (2019.10.IT01). Phase 2<br>UAT was scheduled to begin in April 2022 but with<br>the focus to complete Phase 1 testing, it is unclear<br>when these activities will begin. However,<br>DataHouse continues to progress with Phase 2<br>system testing. DLIR and DataHouse still do not<br>have formal quality management plans<br>(2019.07.IT05). Quality metrics are critical for<br>evaluating and monitoring project activities for<br>acceptance and go-live readiness. | 0   | 3    | 0      |
|  | Ŷ           |                 |     | Configuration<br>Management          | DataHouse provided an updated Case<br>Management configuration management<br>document to include the Phase 2 Salesforce<br>environments. Additional details regarding a<br>comprehensive configuration management plan<br>(2019.07.IT06) are needed.   | 0   | 1    | 0      |

FINDING #: 2022.04.IT01 STATUS: OPEN

#### TITLE: CASE MANAGEMENT OPERATIONAL RISK

**Finding:** The number of outstanding project risks and issues may impact DLIR operations if not addressed prior to golive.

**Industry Standards and Best Practices:** Institute of Electrical and Electronics Engineers (IEEE) 15288-2015 Section 6.4.12 summarizes processes for transitioning the system into operational status.

**Analysis:** The eCMS Phase 1 Case Management system go-live is just over a month away on June 9, 2022. There is inherent risk involved in the launch of any new system. This risk is typically mitigated through careful planning, thorough quality, testing, and acceptance checks, and post go-live support teams and processes. DLIR and DataHouse continue to make progress to prepare for go-live, but there are still a number of areas that need additional clarification around plans, processes, roles and responsibilities, and metrics. With so many details left to figure out or resolve during production, this may have a significant impact on the continuity and efficiency of DLIR operations. The Phase 1 Content Management system was two months into production before the critical blockers were addressed. During this time, documents had to be scanned into both the legacy and the new system to avoid any major impact on the operations of the limited stakeholder group. There is significantly increased complexity in the Case Management system compared to Content Management and a far greater number of internal and external stakeholders. This raises the inherent risk associated with this next go-live and the need to address previously identified deficiencies. The following project risks and issues (refer to Appendix D: Prior Findings Log) collectively may impact the overall success of the Phase 1 Case Management system launch and potentially the DLIR operations:

- Testing and Quality Issues (2020.12.IT01, 2019.10.IT01, and 2019.07.IT05) On-going UAT execution issues continue to limit progress to complete UAT. DLIR performance of end-to-end testing and plans for regression testing are also still pending. With limited time remaining to complete testing and without defined quality metrics, DLIR must ensure that adequate testing is performed to minimize issues and defects post go-live.
- Unclear Go/No-Go Criteria (2020.09.IT01) Criteria for the Phase 1 Case Management go-live and acceptance still
  need to be established to ensure that the project does not move forward without completing all the necessary
  preparation activities for a successful go-live.
- Unclear Business Processes (2020.12.PM01) Additional clarification of business process changes around the new system is needed to ensure that DCD employees know how to perform their work post go-live to prevent significant impact on operation efficiencies.
- Unclear Data Conversion Plans (2019.11.IT01) The plan for converting existing paper files is still pending. The new QR coded forms require documents to be scanned with the new Case Management system. With some files scanned and some in paper form, this may lead to confusion, work arounds, and slower user adoption.

### TITLE: CASE MANAGEMENT OPERATIONAL RISK (continued)

- Lack of Stakeholder Communications Plan (2019.07.PM07) Communications with external stakeholders have been minimal. Additional communications are needed to prepare stakeholders for substantial changes in key workers compensation forms and those using the new electronic form submission process to prevent significant delays in processing critical employer filings.
- *Missing OCM Activities* (2019.07.PM08) Specific metrics and surveys for collecting and monitoring change resistance and user adoption still need to be finalized. Identifying OCM issues early will help in timely formulating plans to address the issues (e.g., additional training, reinforcement mechanisms) and increase user adoption.
- Lack of Training Plan (2022.04.PM01) Details of the training dates, format, attendees, trainers, content, etc. are still pending. An effective training program is critical for preparing users for transitioning to the new system.
- Other General Findings (2019.09.PM02, 2019.09.IT02, 2019.07.PM02, 2019.07.PM06, 2019.07.PM09, 2019.07.PM10, 2019.07.PM14, and 2019.07.IT07) Other outstanding risks and issues may also impact the ability of the project team to timely and adequately address issues that arise post go-live.

In addition to the specific recommendations made as a part of this finding, the IV&V recommendations made at the findings referenced above will also help to address this issue.

#### **Recommendations**: 2022.04.IT01.R1 – Perform operations risk and impact assessment.

- Identify areas of operations at greatest risk and assess impact (e.g., operational workloads, compliance, constituents/claimants) of potential technical issues or system down-time.
- Consider business processes with high volumes, statutory requirements, or greater external stakeholder involvement.

2022.04.IT01.R2 – Increase post go-live support and resources.

- Assign dedicated DLIR and DataHouse resources for on-site support and troubleshooting.
- Create a support plan specific for external stakeholders.
- Clarify issue/incident escalation processes and tools.
- Consider scheduling standing check-ins with internal and external users for regular Q&A and issue resolution.

2022.04.IT01.R3 – Develop a formalized post go-live plan.

- Document functionality, remaining defects, and any open deliverables to be completed post go-live.
- Provide detailed dates and resources to address each post go-live delivery.

### Appendix A: IV&V Criticality and Severity Ratings

#### **IV&V CRITICALITY AND SEVERITY RATINGS**

Criticality and severity ratings provide insight on where significant deficiencies are observed and immediate remediation or risk mitigation is required. Criticality ratings are assigned to the overall project as well as each IV&V Assessment Area and IV&V Assessment Category. Severity ratings are assigned to each risk or issue identified.

#### **Criticality Rating**

TERMS

**RISK** An event that has not happened yet.

ISSUE An event that is already occurring or has already happened. The criticality ratings are assessed based on consideration of the severity ratings of each related risk and issue within the respective IV&V Assessment Area and IV&V Assessment Category, the overall impact of the related findings to the success of the project, and the urgency of and length of time to implement remediation or risk mitigation strategies. Arrows indicate trends in the project assessment from the prior report and take into consideration areas of increasing risk and approaching timeline. Up arrows indicate adequate improvements or progress made. Down arrows indicate a decline, inadequate progress, or incomplete resolution of previously identified findings. No arrow indicates there was neither improving nor declining progress from the prior report.

RRRYY<td

A **RED**, high criticality rating is assigned when significant severe deficiencies were observed and immediate remediation or risk mitigation is required.

A **YELLOW**, medium criticality rating is assigned when deficiencies were observed that merit attention. Remediation or risk mitigation should be performed in a timely manner.

A **GREEN**, low criticality rating is assigned when the activity is on track and minimal deficiencies were observed. Some oversight may be needed to ensure the risk stays low and the activity remains on track.

A GRAY rating is assigned when the category being assessed has incomplete information available for a conclusive observation and recommendation or is not applicable at the time of the IV&V review.

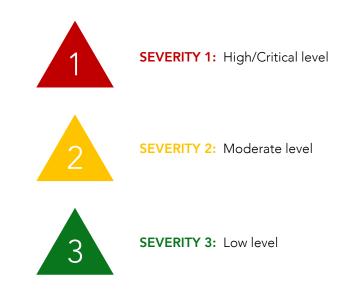

#### **Severity Rating**

Once risks are identified and characterized, Accuity will examine project conditions to determine the probability of the risk being identified and the impact to the project, if the risk is realized. We know that a risk is in the future, so we must provide the probability and impact to determine if the risk has a Risk Severity, such as Severity 1 (High), Severity 2 (Moderate), or Severity 3 (Low).

While a risk is an event that has not happened yet, an issue is something that is already occurring or has already happened. Accuity will examine project conditions and business impact to determine if the issue has an Issue Severity, such as Severity 1 (High/Critical Impact/System Down), Severity 2 (Moderate/Significant Impact), or Severity 3 (Low/Normal/Minor Impact/Informational).

Findings that are positive or preliminary concerns are not assigned a severity rating.

#### TERMS

POSITIVE

Celebrates high performance or project successes.

#### PRELIMINARY CONCERN

Potential risk requiring further analysis.

| stem Software,<br>legrations        | Moderate             | Moderate            | Content Management system and<br>rollout issues resulting in low user<br>adoption.   | The 6CMS Phase 1 Content Management system went live on January<br>26, 2022 and was tolled out to a small number of users in one<br>stakeholder group. In the month since go-live, users have encountered a<br>number of technical issues with the system including performance,<br>reliability, functionality, and data. The Dashbouse Content Management<br>development team is working closely with DLR to receive issues and<br>released several patches and updates. Despite these efforts, user<br>adoption remains low with users reverings to the legacy system to<br>perform their work. The following is a summary of transition risks or<br>issues:<br>The process for reporting user issues is not consistent with some issues<br>logged in the quality log. DLR resmo channel, or through email. This<br>makes it difficult to tack metrics, status, priority, or resolution of<br>production issues.  | 2022.02.IT01.R1   | Improve production issue/defect<br>processes.                                    | Reases issue/delect reporting processes and tools to improve<br>consistency and environment cention.<br>"Collect and use metrics to help in identifying production issue trends,<br>analyzing system vs. user issues, and investigating root causes.   | Open              | 03/23/22: Phase 1 Content Management technical system issues confinue<br>to be addressed but the complete stand of issue resolution, note cause of<br>those issues, status and metrics for user adoption, and plans to address<br>transition issues remain undera. TUR plans to restrict cases to the legory<br>system after the last critical technical issue is addressed.<br>04/26/22: Phase 1 Content Management technical system<br>to be addressed. DUR turned the legory Content Management system to<br>read-only which should help to improve user adoption.<br>Accuity will continue to monitor the progress of Content Management<br>rollout and adoption.  |
|                                     |                      |                     |  | While some of the low user adoption is due to the technical issues with<br>the system, its is undera how much of this is due to user COM issues (e.g.,<br>user resistance or training needs). User adoption blockers need to be<br>identified. It is not clear what the root cause is for the number of technical issues<br>and user issues encountered in production. Feedback was collected<br>from user in a lessons learned session to identify areas of improvement<br>but further analysis to determine root cause and improvement tplans to<br>specifically address these root causes are still needed.<br>Although DLR and DataHouse are working hard to address reported<br>issues, it is unclear what the comprehensive plan or timeline is to address<br>root technical and user issues to successfully transition all users onto the<br>new system.   | 2022.02.IT01.R2   | Develop a comprehensive and<br>prioritized plan to address transition<br>issues. | -BUR and DataHouse should work together to evaluate and prioritize<br>the transition issues with the greatest impact on user adoption and<br>develop a clear part and realistic timelians: of technical issues (e.g.,<br>inflective or institution system testing or UAT, incomplete<br>trequiments, improper configuration or production promotion<br>management and use issues (e.g., indequate training, change<br>reinforcement mechanisms, or BPR discussions).   |                   |  |
| inres Process 2021.08.PM01 Risk     | Moderate             | Moderate            | Inadequate attention to and formeroi<br>for BPR ray regress expendional<br>performance gains achieved.                                   | In the initial neurod of Phase 2 design sessions, preliminary design mock-<br>opy were presented and dial not same to completely address the<br>requests and current operational pain points raised by DLR SMSs during<br>the requirement generational pain points raised by DLR SMSs during<br>the requirement generational pain points raised by DLR SMSs during<br>the requirement generational pain points raised by DLR SMSs during<br>the requirement generational performance, there were missed<br>opportunities to achieve ever greater improvements through system<br>automation, integration, and capabilities. Design sessions with SMEs<br>were more focused around technical design aspect which the SMEs<br>to were more focused around technical design aspect which the SMS<br>sometimes struggled to understand the business context of the design or<br>how the system could help to solve operational challenges. Business<br>process improvement is a key deliverable identified in the RPP and in<br>DataHous's contract but there are well as the operational performance<br>gains to greened in following design sections are well as during<br>to prevent additional effort to correct later. DUR plans to mere with<br>SMEs prior to meeting to better proper them to actively and effectively<br>participate in project activities. DataHouse's plans to provide more<br>critically rating for Design. In addition to the specific recommendation<br>made as a part of this linding, the N&W recommendation made at<br>finding 2020.124MO will also help to address time suce. | 2021.08.PM01.R1   | identify and analyze BPR<br>opportunities.                                       | «Consider areas with greatest impact or value due to transaction<br>valume, evently of pan points, projectiv within DLR voerstoal<br>goals (e.g., WC-3 ferm processing and reconsiliation, insurance plans<br>form processing, employer compliance monitoring, and Special<br>Compensation Fund (SCP recordecepting).<br>"Explore possible Resolutions that include buintess process changes<br>and/or system functionality."<br>"Horrease discussions between DLR and DataHouse to better connect<br>business processes to system capabilities.<br>"Ensure MSL understand the importance of BPR and when and how<br>BPR will be discussed throughout the project. | Open              | Refer to prior IV&V Monthly Report for status updates before November<br>2021.<br>11/29/21 and 12/29/21: No updates to report.<br>01/25/22: Some BPR opportunities continue to be discussed in Phase 2<br>development sprint sessions and Phase 3 requirements gathering.<br>Identification of thos BPR opportunities with the greatest impact or value is<br>still needed.<br>02/24/22, 03/23/22, and 04/26/22: No updates to report.<br>Accuity will continue to assess BPR and design processes.  |
| vernance 2021.05.PG01 Risk          | Moderate             | Moderate            | Insufficient support and guidance from<br>project governance may limit the<br>project's ability covercome current<br>project challenges. | Since December 2020, DLIR and DataHouse have been working to<br>address and analyze various Content Management issues (effer to finding<br>2021.03.170). In March 2021, DataHouse presented three options to<br>the ESC for the Content Management solution. Previous plans and<br>timelines to make a decision regarding the Content Management<br>solution were postponed to allow more time for additional analysis.<br>DLIR and DataHouse recently agreed on a new plan and timeline of tasks<br>to reach a decision regarding the Content Management solution by July<br>2021. As the Content Management in glinematication delays are stalling<br>the Phase 1 Case Management and Phase 2 activities and significantly<br>that the poject test and ricks to plans to address this and other high<br>and the the poject test and ricks to plans to address this and other high<br>regulance and more active involvement from the ESC and project<br>sponsors are needed to help remove barriers and drive progress.  | 2021.05.PG01.R1   | increase project governance<br>involvement.                                      | Discuss high-impact barrenzblockers and mitigation plans for ontical<br>issues with ESC.<br>"Evaluate how various ESC members can be leveraged to remove<br>barriers and execute mitigation plans.<br>Consider adding additional ESC meetings until critical issues are<br>resolved.<br>Consider establishing more frequent touchpoints with DLR and<br>Deathfours project sponson to more closely monitor and drive<br>progress of executing mitigation plans for critical issues.  | Open              | Refer to prior IV&V Monthly Report for status updates before November           2021.           11/2/V21: The ESC approved to re-baseline the Phase 1 Content           Management interline again. Additional versight is needed to ensure<br>revised timelines are achieved.           12/2/V21: The eCMS Project is facing a number of significant challenges<br>that could prevent successful completion of all three phases in 2022 as<br>planed. Foruder the need or ease of creating a change control board with a<br>subset of the committee for certain types of decisions.  | Closed            | 09/2019: Accuity decreased the severity rating from Level 2 (Moderate) to<br>Level 3 (Jow). The eCMS Executive Steering Committee (ESC) was<br>assembled and held its first meeting on September 13, 2019. Members<br>were informed of the committee's purpose, roles, and member tasks;<br>however, the types and thresholds of decisions that need committee<br>approval or attention was not formalized. The next meeting is scheduled for<br>October 11, 2019. The October 11, 2019 ESC meeting was effectively run by the<br>OC Project Sponsor to discuss key risks and tasks and to align the eCMS<br>Project direction with OLIR and ETS stategic objectives. The thresholds for<br>decisions that require committee attention were also established.  | 10/25/2019     | Closed as the eCMS ESC was<br>formalized.   |
| Governance<br>Effectiveness               | 2019.07.PG03 | i Risk | Moderate             | N/A                 | The unclear DataHouse contract tems<br>may limit objective evaluation of<br>contractor performance and contract<br>fulfillment.   | The procurement of the System Integrator (SI) for the aCMS Project was<br>performed by DIRE DPS and nerviewed by FLS. The RPF and<br>DataHouse contract does not clearly outline expected deliverables.<br>And early and the comparison of the second | 2019.07.PG03.R1                                       | Evaluate the need for a contract<br>modification to clarify contract<br>terms.   | Consider including lay project documents as deliverables such as a<br>equirement management plan and equirements tracadellity matrix<br>RTM (feet no finding 2019.07.PMI 0), risk and suese log (refer to<br>finding 2010.07.PMI0), and testing documentation.<br>"Consider including acceptance criteria based on industry standards,<br>the example, the acceptance criteria actual be compliance with Institute<br>requirements tracability matrix (refer to finding 2019.07.PMI0).<br>"Consider including mesurubels success metrics (refer to finding<br>2019.07.POIDS,<br>"Consider the need to outline roles and responsibilities between DLIR<br>and DataHouse (refer to finding 2019.07.PM02).    | Closed            | 09/2011% DLR has decided to address his finding through updates of<br>project plans. Databuse has shown an openness to develop and<br>continuously improve project deliverables including project plans. Roles<br>and responsibilities hav been more openly discussed and plan to be<br>incorporated within project plans. Furthermore, success and quality metrics<br>are being darled which will also be an additional method for evaluating<br>contractor performance and fulfilment.   | 9/20/2019      | Closed as DUR will address<br>through project plan updates. The<br>need for clarification of roles and<br>responsibilities as well as<br>acceptance criteria and success<br>metrics will continue to be<br>project Organization,<br>2019 02, PM03 Deliverable Review,<br>and 2019,027105 Quality<br>Management Endings. |
| Governance<br>Effectiveness               | 2019.07.PG04 |        | Low                  | N/A                 | The lack of guidelines, checklists, and<br>shared project assets may reduce<br>project performance and efficiency.  | Large IT projects are not a regular occurrence for many State<br>departments. Other lines project recovers are assigned from within the<br>departments that have valuable organizational and operational<br>knowledge but don to have the necessary project management<br>esperience. Having guidelines and checklists and access to project<br>documents from parts State projects would greatly benefit even<br>especienced project teams. ETS, as the State of Hawai's IT oversight<br>effice, is in the best position to gather project assets and put forth<br>guidelines.   | 2019.07.PG04.R1                                       | Initiate conversations with ETS to<br>discuss DLIR IT and project support<br>needs and responsibilities.   | Process what resources, guidance, and shared project assets would be<br>most helpful to DLR. Process what project assets DLR can provide to contribute to the<br>development of a centralized project management filtrany. Consider involving the project steering committee to align and clarly. ETS vs. steering committee governing roles.  |                   | 09/2019: ETS began sharing best practices and lessons learned with DUR<br>including taking the DUR Project Manager to sprint meetings for another<br>State project. ETS is a member of the newly formed cCNS Executive<br>Stering Committee (ESC) and will use that vehicle to share lessons learned<br>with DUR. Additionally, DUR is forming a DUR TS stering Committee to<br>provide oversight to ID UR IT projects. The DCD Executive Sponsor is a<br>member of that DUR committee and plans to share eCMS lessons learned<br>and project templates with other DUR IT projects.  |                | Closed as discussions occurred<br>with ETS and the risk is adequately<br>mitigated with the planned course<br>of action.  |
| Benefits<br>Realization                   | 2019.07.PG06 | i Risk | Low                  | N/A                 | Failure to align statutes with the eCMS<br>Project modernization objectives may<br>reduce the operational improvements<br>that are achieved.  | The eCMS Project's primary modernization objective is to move to a<br>paperless and automated buiness process. The new system is being<br>designed to allow for electronic filing, routing, and tracking of forms.<br>However, current disability compensation statusts have not been revised<br>to require that these forms are filed electronically by law. As such,<br>manual paper forms may continue to be submitted by external users<br>such as damants, employers, and insurance companies. As the<br>development of a poul for public filling will not begin until Phase 3, this<br>risk is not as imminent. However, as the evaluation of potential impacts,<br>collection of feedback from stakeholders, and the legalates process to<br>amend statuse is a long process, the initial planning should begin as<br>early as possible on a not to potpone or reduce the realization of the<br>benefits from the new system.  | 2019.07.PG06.R1                                       | Develop a plan and timeline to<br>amend the statuse to align to<br>project and organizational<br>objectives.   |  |                   | 0%201% In 2016, DLIR convened a Working Group (WQ) consisting of<br>representatives from various DCD-related stakeholder groups. The WG<br>provides an avenue for DLIR to understand stakeholders' concerns and a<br>forum for the stakeholden is to understand stakeholders' concerns and a<br>forum for the stakeholden is understand the DLIR business process<br>improvements including the need for statutorily mandated electronic claim<br>fingas.<br>DLIR plans to draft statutory changes to mandate electronic filing in PY2022<br>(effective July 1, 2023). This timeframe was decided on as it allows DLIR to<br>proactively involves takeholden in testing production and provide<br>stakeholders the appropriate time to ready their systems for electronic filing.  | 9/20/2019      | Closed as DUR has a plan to align<br>statutes with eCMS Project<br>objectives.  |
| Organization and<br>Management            | 2019.07.PM01 |        | N/A                  | N/A                 | The DLR Project Manager is a<br>deciliaared project lead who works<br>collaboratively with internal<br>sakeholders.   | The DLIR Project Manager is hardworking and has continually<br>downstratical defactation is the project and an exignment to learn.<br>Additionally, the DLIR Project Manager has some of the necessary<br>address of the second second project manager. Here positive<br>sature and collaborative approach develops tract with and statisfies<br>concremes of many stream stateholdress. This has mitigated some of the<br>communication and OCM risks (refer to finding 2019 07 PMO) and<br>DLIR employee assigned to the eCMS Project and there is not a sufficient<br>manuant of project resources (refer to finding 2019 07 PMI4) to properly<br>manage the project.  | N/A   | N/A for positive findings.   | NVA for positive findings.   | Closed            | N/A  | 9/20/2019      | Closed as this is a positive finding.   |
| Organization and<br>Management            | 2019.07.PM04 |        | High                 | N/A                 | of intent between DataHouse and DHS.<br>Furthermore, he eCMS Project<br>advanced for 10 months without a<br>formal MOU between DLR and DHS<br>and reliance on the DataHouse Project<br>Sponsor to lead the discussions due to<br>her experience with DHS. | Inerage DFS's IBM FileNet environment, however, there was no written<br>agreement between Datalousa and DFS that supported DFS intent to<br>support shared services. Once the eCMS Project was underway, the<br>MOU docusations with DFS were primarily led by the Databationse Project<br>Sponsor. The eCMS Project advanced for 10 months without finaliang<br>the MOU between the DFS and DLR. As the proposed solution is no longer<br>viable due to the recent DFS development, an alternative solution must<br>be determined (jetter fording 2010 2012 CTO) and proviously accepted or<br>drafted deliverables may need to be updated. Although the eCMS<br>Project will not be also to ultize DFS's BM FileNet environment, the<br>project still plans to leverage DFS's enterprise licenses for FileNet and<br>messasy agreements to ensure that the alternative solution is viable and<br>prevent furthe eldeps.   | 2019.07.PM04.R1<br>2019.07.PM04.R2<br>2019.07.PM04.R3 | Finalize the MOU to leverage DHS'<br>enterprise licension of FileNet and<br>Datacap.<br>DLIR should lead all discussions<br>and negotations of vendor<br>contracts or agency agreements.<br>Identify and complete all critical<br>tasks prior to moving forward with<br>an alternative solution. |  | -                 | 09/20179: The MOU with DHS for Datacap and FlieNet learness is close to<br>being finalized. DBI Reveixed adress from DHS on September 17, 2019 and<br>it was sent to the Attorney General's office on September 17, 2019. Accuity<br>has observed that DUR has led the contract discussions and negotiations<br>with AWS.  | 9/20/2019      | Closed as the MOU with DHS is in<br>process to be finalized and DLR is<br>leading contractor negoslations.<br>The recommendation to isidnify and<br>critical tasks will continue to be<br>monitored under the<br>2019 07 PM13 Schedule<br>Management finding.   |
| Project<br>Organization and<br>Management | 2019.07.PM05 | 5 Rrsk | Moderate             | N/A                 | A lack of clarity on Databoue's<br>development methodology may not<br>allow or adequately prepare<br>stakeholders to participate readily.   | Distributes is using a modified Aplie development methodology that is<br>enfered to as VMxerCounFailt. This is a combination of the watefaill<br>and Aplie methods that defines the full set of enguinements at the<br>beginning but uses Aplie user stories and optims while building the<br>software. Based on the current project plant, the eCMS Project was<br>upposed to begin the Build stage of Hware 1 and transition to the Scum<br>methodology. Although the recent DHS development will likely delay<br>tacksift of the stage, there are a number of concens regarding the<br>transition to the Scum methodology.<br>The project schedule also does not yet reflect the agle sprints cycles or<br>dentify resources who are expected to participate.<br>"There have not been communications with the DUR project team and<br>stakeholders regarding the Scum methodology or the roles and<br>reportabilities they used using this stage of the project.   | 2019.07.PM05.R1<br>2019.07.PM05.R2                    | Formalize an approach for<br>executing Scrum phases.<br>Communicate the approach for<br>executing Scrum phases to all lease  | Consider industry best practices for Agile methodologies such as<br>retropective, adjustandup, humom chatts, and frequent user<br>demonstrations and feedback.<br>•Establish the backlog peparation and refinement process.<br>•Establish virtual conferencing tools and communication protocols for<br>geographically detributed team members.<br>•Ster the number and length of the sprints.<br>•Lipdate the project schedule for sprints.<br>•Lipdate the project schedule for sprint activities and axign resources<br>inder to finding 2019.07. PM 14).<br>•Include clear and dealled procedures and moles and mesonabilities<br>for Sorum tasks (refer to finding 2019.07. PM02).<br>2019 07. PM02). |                   | 07/20176. Accuity has kept the severity rating as Level 2 (Moderate),<br>Athough Dathous has incorporated the Caak Management sprint<br>schedule into the overall project schedule and provided a high-iterel<br>overwier of the regimerensivice stress to be covered by each sprint, rotes<br>and responsibilities still need to be clearly defined and communicated.
