January 23, 2023

The Honorable Ronald D. Kouchi  
President of the Senate  
and Members of the Senate  
Thirty-Second State Legislature  
State Capitol, Room 409  
Honolulu, Hawai'i 96813

The Honorable Scott K. Saiki  
Speaker and Members of the  
House of Representatives  
Thirty-Second State Legislature  
State Capitol, Room 431  
Honolulu, Hawai'i 96813

Aloha Senate President Kouchi, Speaker Saiki, and Members of the Legislature:

Pursuant to HRS section 27-43.6, which requires the Chief Information Officer to submit applicable independent verification and validation (IV&V) reports to the Legislature within ten days of receiving the report, please find attached the report the Office of Enterprise Technology Services received for the State of Hawai'i, Department of Commerce and Consumer Affairs, Business Registration Modernization Project.

In accordance with HRS section 93-16, this report may be viewed electronically at <http://ets.hawaii.gov> (see "Reports").

Sincerely,

  
Douglas Murdock (Jan 23, 2023 13:34 HST)

Douglas Murdock  
Chief Information Officer  
State of Hawai'i

# Business Registration Modernization (BRM) Project

MONTHLY IV&V REVIEW REPORT

December 31, 2022 | Version 1.0

## *Table of Contents*

### **EXECUTIVE SUMMARY**

Background	3
IV&V Dashboard	4
IV&V Summary	5
Appendix A: IV&V Criticality and Severity Ratings	7
Appendix B: Industry Standards and Best Practices	9
Appendix C: Prior Observations Log	12
Appendix D: Comment Log on Draft Report	16

## Document History

DATE	DESCRIPTION	AUTHOR	VERSION
01/10/23	Monthly IV&V Review Report Draft created	Sondra Ouye	0.0
01/20/23	Monthly IV&V Review Report Final updated to reflect no comments submitted in Appendix D.	Sondra Ouye	1.0

## BACKGROUND

The State of Hawaii (State), Department of Commerce and Consumer Affairs (DCCA) contracted Century Computers, Inc. (Pacxa) on July 1, 2022 to provide services for the Business Registration Modernization (BRM) Project to redesign the Business Registration (BREG) Division's business registration processes and modernize its systems. DCCA contracted Aalta LLC (Aalta) to provide project management services for DCCA and also contracted Accuity LLP (Accuity) to provide Independent Verification and Validation (IV&V) services for the BRM Project.

Our initial assessment of project health was provided in the first Monthly IV&V Review Report as of August 31, 2022. Monthly IV&V Review Reports will be issued through December 2023 and will build upon the initial report to continually update and evaluate project progress and performance.

Our IV&V Assessment Areas include People, Process, and Technology. Each month we will select specific IV&V Assessment Areas to perform more focused IV&V activities on a rotational basis. The focus of our IV&V activities for this report included the completion of a two-month assessment of Technology and the beginning of a two-month assessment of Process.

The IV&V Dashboard and IV&V Summary provide a quick visual and narrative snapshot of both the project status and project assessment as of December 31, 2022. Ratings are provided monthly for each IV&V Assessment Area (refer to Appendix A: IV&V Criticality and Severity Ratings). The overall rating is assigned based on the criticality ratings of the IV&V Assessment Categories and the severity ratings of the underlying observations.

### CHANGE MANAGEMENT

---

*"Change does not roll in on the wheels of inevitability, but comes through continuous struggle."*

LOW

N/A

## IV&V OBSERVATIONS

## PROJECT BUDGET\*

\* Only includes contracts. IV&V unable to validate total budget.

## PROJECT PROGRESS

## KEY PROGRESS & RISKS

- The BRM Project continues to make forward progress in many areas of the project. The Planning and Discovery stages were completed, data conversion risks and matters continue to be addressed, and development sprints are now underway.
- The project is generally on track with the approved baseline schedule, however, there are some delayed tasks.
- Efficient and effective project management processes, including schedule, resource, and requirements management, will be critical for sustaining project performance.

## Overall

The BRM Project continues to make forward progress in many areas of the project. With system development activities now underway, efficient and effective project management processes will be critical for sustaining project performance.

*Project Schedule:* The project is generally on track with the recently approved baseline schedule, however, there are some delayed tasks. It is unclear if these delays will impact the execution of other tasks or the overall timeline (2022.09.001).

*Project Costs:* Contract invoices received to-date are within total contract costs.

*Quality:* The quality management plan with preliminary quality metrics was completed but quality metric data needs to be collected and reported.

*Project Success:* Project goals were drafted; however, quantitative success metrics need to be defined (2022.08.006).

## People Team, Stakeholders, & Culture

- Project team members are generally able to keep up with current project activities.
- Additional project activities will begin to run in parallel in January 2023. DCCA will reassess the adequacy of resource needs at that time. *Resource management strategies help to optimize the utilization of limited DCCA project resources and prepare project leads for their assigned roles (2022.08.002).*
- Paxca plans to also prepare a project resource calendar in January 2023.
- The initial organizational change management (OCM) plan was prepared which outlines the approach to support impacted stakeholders.
- The executive steering committee (ESC) continues to meet monthly.

**Process**  
*Approach & Execution*

- The baseline project schedule was approved, however, additional tasks for soft user acceptance testing (UAT) cycles still need to be scheduled.
- There are some delayed tasks under the recently approved baseline schedule. It is unclear if this will impact the execution of other tasks or the overall timeline. *Improvements to schedule management processes are still needed to detect delays earlier and to identify root causes to prevent delays going forward (2022.09.001).*
- The five remaining project management sub-plans were completed. DCCA approved the project management plan including all sub-plans as well as the baseline requirements documentation, concluding the Planning and Discovery stages.
- A temporary instance of the requirements and development management tool is being used as the setup of the long-term tool is delayed.
- Aalta clarified and delivered some of their contract deliverables including monthly reports, project management plan, and quality assurance surveillance plan. *Additional clarification of Aalta's contract requirements and deliverables is needed (2022.11.001).*
- *Quantitative success metrics need to be defined (2022.08.006).*

**Technology**  
*System, Data, & Security*

- Development Sprint 0 is underway. This sprint focuses on the foundational framework of the portal and case management solution.
- Joint Application Design (JAD) sessions are progressing on schedule. Drafts of the related functional design documents for JAD 3 and 4 were provided.
- Data conversion design, scripting, and loading activities for the legacy data processing system (BRIMS) continue for Iteration 1 and 2.
- The project is moving forward with the proposed data conversion tool for the legacy document management system (RDPMS). Additional changes were made to the tool to help increase conversion speeds.
- Other data conversion risks and matters continue to be tracked and investigated by the data conversion team. The comprehensive data conversion plan is scheduled to be completed in January 2023.
- Additional technical discussions regarding system integrations and security were held.

# Appendix A: IV&V Criticality and Severity Ratings

## IV&V CRITICALITY AND SEVERITY RATINGS

Criticality and severity ratings provide insight on where significant deficiencies are observed and immediate remediation or risk mitigation is required. Criticality ratings are assigned to the overall project as well as each IV&V Assessment Area. Severity ratings are assigned to each risk or issue identified.

### Criticality Rating

The criticality ratings are assessed based on consideration of the severity ratings of each related risk and issue within the respective IV&V Assessment Area, the overall impact of the related observations to the success of the project, and the urgency of and length of time to implement remediation or risk mitigation strategies. Arrows indicate trends in the project assessment from the prior report and take into consideration areas of increasing risk and approaching timeline. Up arrows indicate adequate improvements or progress made. Down arrows indicate a decline, inadequate progress, or incomplete resolution of previously identified observations. No arrow indicates there was neither improving nor declining progress from the prior report.

#### TERMS

##### RISK

An event that has not happened yet.

##### ISSUE

An event that is already occurring or has already happened.

A **RED**, high criticality rating is assigned when significant severe deficiencies were observed and immediate remediation or risk mitigation is required.

A **YELLOW**, medium criticality rating is assigned when deficiencies were observed that merit attention. Remediation or risk mitigation should be performed in a timely manner.

A **GREEN**, low criticality rating is assigned when the activity is on track and minimal deficiencies were observed. Some oversight may be needed to ensure the risk stays low and the activity remains on track.

A **GRAY** rating is assigned when the category being assessed has incomplete information available for a conclusive observation and recommendation or is not applicable at the time of the IV&V review.

**TERMS**

**POSITIVE**  
Celebrates high performance or project successes.

---

**PRELIMINARY CONCERN**  
Potential risk requiring further analysis.

**Severity Rating**

Once risks are identified and characterized, Accuity will examine project conditions to determine the probability of the risk being identified and the impact to the project, if the risk is realized. We know that a risk is in the future, so we must provide the probability and impact to determine if the risk has a Risk Severity, such as Severity 1 (High), Severity 2 (Moderate), or Severity 3 (Low).

While a risk is an event that has not happened yet, an issue is something that is already occurring or has already happened. Accuity will examine project conditions and business impact to determine if the issue has an Issue Severity, such as Severity 1 (High/Critical Impact/System Down), Severity 2 (Moderate/Significant Impact), or Severity 3 (Low/Normal/Minor Impact/Informational).

Observations that are positive, preliminary concerns, or opportunities are not assigned a severity rating.

## *Appendix C: Prior Observations Log*

Appendix C: Observations and Recommendations Log

ASSESSMENT AREA	OBSERVATION ID	TYPE	ORIGINAL SEVERITY	CURRENT SEVERITY	OBSERVATION	ANALYSIS	RECOMMENDATIONS	STATUS	STATUS UPDATE	CLOSED DATE	CLOSURE REASON
Process	2022.11.001	Risk	Moderate	Low	Unclear project deliverables and schedule for the contracted DCCA project manager could impact the execution of Aalta and DCCA's project management responsibilities and activities.	<p>In August 2022, DCCA contracted Aalta to provide project management services for the BRM Project. Aalta's proposal provides the details of their approach for performing the high-level scope of work outlined in their contract. The following is a summary of IV&amp;V observations regarding the Aalta contract:</p> <ul style="list-style-type: none"> <li>•A number of reports, activities, and work products were discussed in Aalta's methodology as described in their proposal; however, it is unclear if these are to be performed.</li> <li>•Based on the description of the activities and work products from Aalta's proposal, it seems that some of these tasks would have been already performed as a part of the planning stage.</li> <li>•A project schedule of Aalta tasks (e.g., reports, work products, deliverables) is pending.</li> <li>•Some of Aalta's scope of work and deliverables overlap with Pacxa's contract (e.g., organizational change management plan, training plan).</li> <li>•In the first three months of Aalta's contract, Aalta's lead project manager changed three times which may have contributed to the delayed execution of tasks.</li> </ul> <p>A clear understanding of the Aalta's scope of work, approach, and timeline is necessary to ensure a smooth execution of project management activities for optimal team and project performance.</p>	<p>2022.11.001.R1 – Clarify Aalta's contract requirements.</p> <ul style="list-style-type: none"> <li>•Discuss the reports and work products from Aalta's proposal and classify as either 1) contract deliverables or 2) activities that Aalta only assists the project with.</li> <li>•For each contract deliverable, clarify purpose, content, and expectations.</li> <li>•For activities that Aalta only assists with, clearly outline the respective roles and responsibilities of each party.</li> <li>•Consider whether contract deliverables and activities still make sense for the areas of overlapping scope of work.</li> </ul> <p>2022.11.001.R2 – Provide schedule information for Aalta tasks.</p> <ul style="list-style-type: none"> <li>•Provide the appropriate detail of tasks, durations, due dates, milestones, and deliverables.</li> <li>•Consider either developing a separate schedule or incorporating into Pacxa's project schedule.</li> </ul>	Open	<p>12/31/22: Accuity decreased the severity rating from Level 2 (Moderate) to Level 3 (Low) as Aalta clarified and delivered some of their contract deliverables including monthly reports, project management plan, and quality assurance surveillance plan. Additional clarification of Aalta's contract requirements and deliverables is needed.</p> <p>Accuity will continue to review decisions regarding Aalta's contract requirements and deliverables.</p>		
Process	2022.09.001	Risk	Low	Moderate	Current project delays may impact the overall project timeline.	<p>The Planning and Discovery stages were expected to be completed in early October 2022 but are estimated to be two weeks behind schedule. The detailed project schedule is a deliverable of the Planning stage and the information gathered during the Discovery stage to-date will be used to better estimate the work for the remaining stages of the Project. As such, it is unclear if the two week delay will have any impact on the overall timeline.</p> <p>Improvements to the schedule management processes are needed to better estimate time needed to complete tasks, more quickly detect when tasks are falling behind schedule, and openly discuss options and strategies for minimizing delays. Strong schedule management practices help to keep the project on track and prevent reoccurring delays.</p>	<p>2022.09.001.R1 – Improve schedule management processes.</p> <ul style="list-style-type: none"> <li>•Identify and address the root causes of the delays.</li> <li>•Implement processes to monitor and report task delays.</li> <li>•Consider using project performance metrics to better detect schedule trends and issues.</li> </ul>	Open	<p>10/31/22: Accuity increased the severity rating from Level 3 (Low) to Level 2 (Moderate). Completion of the Planning and Discovery stages is one month behind what was originally planned. The estimated completion date was initially extended two weeks in September 2022, extended another week in October 2022, and then extended again at the end of October. The delays are due to the pending completion and acceptance of project management plans, the detailed project schedule, and the RTM but it is unclear what the root cause of these ongoing delays are. The trend of repeated revised due dates needs to be further investigated and addressed.</p> <p>11/30/22: The baseline project schedule was developed and is currently under DCCA review. This schedule will be used to monitor progress going forward. As additional tasks are to be added, actual dates and progress percentages tracked, and the schedule is not resource loaded, we will continue to assess its effectiveness in managing the project.</p> <p>12/31/22: The baseline project schedule was approved; however, there are some delayed tasks. Additional improvements are needed to more closely monitor the schedule and project progress.</p> <p>Accuity will continue to evaluate schedule management practices.</p>		

ASSESSMENT AREA	OBSERVATION ID	TYPE	ORIGINAL SEVERITY	CURRENT SEVERITY	OBSERVATION	ANALYSIS	RECOMMENDATIONS	STATUS	STATUS UPDATE	CLOSED DATE	CLOSURE REASON
People	2022.08.002	Risk	Low	Low	Insufficient DCCA project resources may lead to project delays, reduced project performance, or turnover of project resources.	It is unclear at this time if there are adequate DCCA project resources to efficiently perform project work to achieve the aggressive high-level timeline. DCCA did contract an external full-time Project Manager (Aalta) who officially onboarded at the end of August 2022. Having a dedicated and experienced resource in the Project Manager role has been shown to increase project success compared to a resource who is often pulled back to perform regular job duties. DCCA also appointed resources for the OCM and communications lead roles; however, other project roles and resources are not yet identified. The new DCCA Project Manager is working to identify the additional DCCA workstream lead roles (e.g., data conversion lead, testing lead) needed to efficiently and effectively perform project work as well as identify potential candidates within DCCA to fill these lead roles. A common issue in SOH modernization projects is that assigned resources must often balance competing priorities of project work and ongoing operational work. Additionally, assigned resources don't always have the necessary experience or knowledge of how to perform the project tasks. It is critical that a resource plan to backfill and train DCCA resources is developed to prevent project delays.	<p>2022.08.002.R1 – Evaluate project resource needs and acquire additional resources.</p> <ul style="list-style-type: none"> <li>•Estimate resource time requirements and identify required knowledge or skillsets.</li> <li>•Develop a plan to minimize the impact to operations (e.g., backfill, reassign work) so that assigned project resources are not pulled back from project work.</li> <li>•Get commitments from resources and management for the time needed to perform project work.</li> </ul> <p>2022.08.002.R2 – Provide adequate training and support to assigned resources to be able to perform role.</p> <ul style="list-style-type: none"> <li>•Consider performing general project management training so that resources understand general project processes and the purpose of project activities.</li> <li>•Consider providing additional support and information to resources regarding best practices and common approaches for assigned tasks or areas of responsibility.</li> </ul> <p>2022.08.002.R3 - Develop a plan and processes to optimize utilization of DCCA project resources.</p> <ul style="list-style-type: none"> <li>•Ensure that only the necessary resources are attending each of the various Build and Validation stage sessions.</li> <li>•Plan out resources assigned to the various sessions that will be running in parallel to ensure there will be adequate resources and that resources are not overbooked.</li> </ul>	Open	<p>09/30/22: DCCA is still in the process of identifying resources to assign to lead roles and brainstorming different resource management strategies (e.g., staging resources for different phases). DCCA also plans to hire additional employees in 2023 to mitigate the impact to operations.</p> <p>10/31/22: DCCA workstream lead roles were identified but the same resources were assigned to multiple roles. Additional resources are still needed. Additionally, many DCCA SMEs attend each of the ongoing Joint Application Design (JAD) sessions. As sprint meetings and demos will begin to run in parallel with the JAD sessions, DCCA needs to ensure that there will be adequate resources and that resources are not overbooked. We added an additional recommendation at 2022.08.002.R3 to use resource management strategies to optimize the utilization of limited DCCA project resources.</p> <p>11/30/22: DCCA plans to reassess resource needs once project activities begin to run in parallel. We will continue to assess the risk of inadequate resources once sprint development sprints begin in December 2022 and when timing of the soft UAT cycles is determined.</p> <p>12/31/22: Project team members are generally able to keep up with current project activities. Additional project activities involving DCCA team members will begin to run in parallel with development Sprint 1 in January 2023.</p> <p>Accuity will continue to assess the adequacy and management of project resources.</p>		
Process	2022.08.006	Risk	Low	Low	A lack of quantitative success metrics may lead to differences in the interpretation of project success.	Project goals were drafted; however, quantitative success metrics were not yet defined. Clear and measurable success metrics ensure that everyone is working to the same definition of success, that progress can be monitored, and corrective actions can be taken if necessary.	<p>2022.08.006.R1 – Formalize measurable goals and success metrics.</p> <ul style="list-style-type: none"> <li>•Consider financial, nonfinancial, tangible, and intangible metrics such as operational key performance indicators (KPIs), customer or employee satisfaction, user adoption, return on investment, or cycle or processing times.</li> <li>•Consider benefits realization management objectives as well as alignment to BREG goals.</li> </ul> <p>2022.08.006.R2 – Collect baseline data and monitor progress.</p> <ul style="list-style-type: none"> <li>•Consider methods for collecting data such as process mining, surveys, queries, observation, or open forums.</li> <li>•Consider sources of data such as legacy systems, operations, and internal and external stakeholders.</li> </ul>	Open	<p>09/30/22: The Project will work to define KPIs and success metrics.</p> <p>10/31/22, 11/30/22, and 12/31/22: No updates to report.</p> <p>Accuity will review selected metrics once selected.</p>		

ASSESSMENT AREA	OBSERVATION ID	TYPE	ORIGINAL SEVERITY	CURRENT SEVERITY	OBSERVATION	ANALYSIS	RECOMMENDATIONS	STATUS	STATUS UPDATE	CLOSED DATE	CLOSURE REASON
People	2022.08.003	Risk	Low	Low	A delay in formalizing the executive steering committee may limit the strategic guidance and support to the project.	The Pacxa kickoff presentation noted that a governance model will be developed. The topic of a steering committee was also raised during meetings. However, the selection of the steering committee members and kickoff of the committee meetings are still pending.	2022.08.003.R1 – Assemble and formalize an executive steering committee. •The size and selection of committee members should balance the representation of key stakeholders with the need for efficient decision making. •Formalize the committee mission, responsibilities, and the types and the thresholds of decisions that need committee approval in a steering committee charter.	Closed	09/30/22: DCCA is still in the process of formalizing steering committee members and documenting the governance model.  10/31/22: The steering committee members were selected and the first meeting is expected to be scheduled in November 2022. Committee meetings should commence soon to ensure there is adequate guidance, support, and oversight of the project.  11/30/22: The project governance model was established and the first executive steering committee (ESC) meeting was held.	11/30/22	Closed as the governance model was established.
Process	2022.08.004	Risk	Low	Low	A lack of cost management practices may lead to unexpected or improper costs.	Major project costs were finalized for the system implementor (Pacxa), project manager (Aalta), and IV&V (Accuity) contracts. However, it is unclear how the complete project budget will be managed and how additional costs outside of the major contracts will be identified. For example, certain assumptions were made regarding the use of existing enterprise licensing for DocuSign CLM and Salesforce community licenses. As additional information and clarification of technical requirements is obtained, these assumptions and the potential additional costs must be closely managed. Other costs for project tools (e.g., code repository, project management, testing) should also be considered and managed.	2022.08.004.R1 – Prepare a comprehensive project budget and a schedule of long-term operational costs (e.g., licenses, subscriptions, maintenance, cloud services).  2022.08.004.R2 – Develop DCCA cost management processes. •Develop processes to prepare cost variance analysis and reports. •Develop processes to monitor contract deliverables against payment terms.	Closed	09/30/22: The contracted DCCA Project Manager will be responsible for monitoring and reporting costs for the project contracts. DCCA still needs to determine who will be responsible for managing and procuring other project costs (e.g., additional licensing, project tools).  10/31/22: Processes for monitoring contract costs and tracking a comprehensive project budget still need to be formalized.  11/30/22: The additional procurement for licensing was completed. Other costs related to a conversion tool for proprietary format files and the project management tool will be covered by Pacxa's contract and are not additional project costs. The contracted DCCA project manager will identify potential project costs and will be responsible for monitoring Pacxa contract deliverables for milestone payments.	11/30/22	Closed as sufficient cost management processes are in place.
Process	2022.08.007	Risk	Prelim	Moderate	Key technical decisions are pending and may impact the project schedule and costs (Updated).	This was originally reported in the August 2022 IV&V Monthly Report as a preliminary concern but was upgraded to a risk in September 2022.  There are some key technical decisions that are pending (e.g., DocuSign repository, Salesforce org, NIC). Pending decisions could impact progress for configuring the solution for the upcoming Joint Application Design (JAD) sessions in late October 2022 as well as the development of the data conversion plan. These key technical decisions need to be made in a timely manner to prevent impact to the project schedule. Further discussions are still needed to understand potential costs, project impact, and risk mitigation options. A plan of action needs to be developed and closely monitored to manage the many individual but critical tasks needed for timely resolution.	2022.08.007.R1 - Discuss possible options. •Risks, costs, and impacts for each option must be clearly communicated and understood.  2022.08.007.R2 - Set a plan of action. •Detail out the tasks, targeted due dates, and responsible parties.	Closed	09/30/22: This was originally reported in the August 2022 IV&V Monthly Report as a preliminary concern but was upgraded to and rewritten as a risk this month with recommendations. The project team did discuss a couple possible mitigation strategies to minimize the potential impact to the project schedule of the pending technical decisions. However, there may be other risks that these strategies will create. While it is critical that the decisions are made in a timely manner, it is also important that these options and associated risks must be thoroughly discussed and fully understood by the Project.  10/31/22: Progress was made on key technical decisions but final resolution is still pending.  11/30/22: Key technical decisions were made regarding the system architecture of the DocuSign and Salesforce orgs. Decisions were also made regarding data conversion (e.g., conversion tool, NIC) allowing data conversion planning activities to move forward.	11/30/22	Closed as key decisions were made. Although this risk was addressed, the execution and implementation of the decisions will continue to be monitored for impact to the project. Additionally, as the speed of execution to make these decisions could be improved, we will continue to evaluate schedule management processes in observation 2022.08.002.
People	2022.08.001	Positive	N/A	N/A	The project team environment between Pacxa and DCCA is collaborative and respectful.	The project team members regularly seek feedback, input, and clarification in an open and respectful manner. The experience and knowledge of Pacxa team members combined with the dedication and high level of engagement from DCCA SMEs support the positive project team environment.	N/A	Closed	N/A	09/30/22	Closed as this is a positive observation.
Process	2022.08.005	Opportunity	N/A	N/A	Implementation of recurring meetings help to promote frequent and focused discussions.	Recurring meetings help to promote collaboration and transparency, engage project team members, and coordinate various workstreams. They also provide regular touchpoints and communication channels to help keep critical project activities moving forward. Recurring project management meetings provide visibility of all project activities to Pacxa, DCCA, as well as IV&V. Recurring technical meetings have worked well in other projects as standing meeting to discuss different technical issues or topics. Recurring risk meetings promote regular and focused discussion of risks and mitigation strategies.	2022.08.005.R1 – Implement recurring meetings. •Ensure meetings are productive and fosters open and safe communication. •Adjust the cadence as needed depending on the needs and activities of the project.	Closed	09/30/22: Weekly project manager and team meetings were implemented. DCCA also plans to kickoff recurring technical meetings in October 2022. Risks will be discussed in the weekly team meetings. The need for separate risk-focused meetings will be reassessed later.	09/30/22	Closed as the Project established a plan for recurring meetings and began to implement meetings.
