JOSH GREEN, M.D. GOVERNOR

DOUGLAS MURDOCK CHIEF INFORMATION OFFICER

OFFICE OF ENTERPRISE TECHNOLOGY SERVICES

P.O. BOX 119, HONOLULU, HAWAI'I 96810-0119 Ph: (808) 586-6000 | Fax: (808) 586-1922 ETS.HAWAII.GOV

June 20, 2023

The Honorable Ronald D. Kouchi President of the Senate and Members of the Senate Thirty-Second State Legislature State Capitol, Room 409 Honolulu, Hawai'i 96813 The Honorable Scott K. Saiki Speaker and Members of the House of Representatives Thirty-Second State Legislature State Capitol, Room 431 Honolulu, Hawai'i 96813

Aloha Senate President Kouchi, Speaker Saiki, and Members of the Legislature:

Pursuant to HRS section 27-43.6, which requires the Chief Information Officer to submit applicable independent verification and validation (IV&V) reports to the Legislature within ten days of receiving the report, please find attached the report the Office of Enterprise Technology Services received for the State of Hawai'i, Department of Health, BHA Integrated Case Management System Project.

In accordance with HRS section 93-16, this report may be viewed electronically at <u>http://ets.hawaii.gov</u> (see "Reports").

Sincerely,

On behalf of

Tom The

Douglas Murdock Chief Information Officer State of Hawai'i

Hawaii BHA Integrated Case Management System Project – Phase 3

Final IV&V Report for the period of

May 1 – May 31, 2023

Final submitted: June 9, 2023

Solutions that Matter

Agenda

Executive Summary IV&V Findings & Recommendations

Appendices

- A Rating Scales
- B Inputs
- C Project Trends

Executive Summary

The Project deployed R3.32 on 05/25/2023 with 8 reported defects. A Root Cause Analysis (RCA) on these defects is planned for early June. The Project continue to re-align release targets for 'big boulder' functionality in May with several items slipping from R3.32 to R3.33. The planned Golden Record mid-sprint deployment also slipped from late May to mid-June.

BHA awarded contracts to support the INSPIRE SI and IV&V work in May; final CMS approval is pending. IV&V support services are currently in transition for the new contract.

| Mar | Apr | Мау | Category | IV&V Observations |
|-----|-----|---------------------------|-------------------------------------|--|
| G | G | G | Sprint Planning | There are no active findings in the Spring Planning category which remains Green (low criticality) for the May reporting period. |
| G | G | | | There are no active findings in the User Story (US) Validation category which remains Green (low criticality) for the May reporting period. IV&V will continue to monitor the US development and validation process in upcoming reporting periods. |
| Y | Y | Y Y Iest Practice i | | Use of the Tricentis test automation tool continues to be delayed. It is unlikely that this initiative will be completed by the end of the DD&I contract. This category remains Yellow (medium criticality) for the May reporting period. |
| Y | Y | Y | Release / Deployment Planning | There were several R3.32 production defects and it is not known if any were related to deployment issues until the planned RCA session. Defined/documented roles and responsibilities for deployment support remain outstanding. IV&V will continue to monitor this category moving forward. |

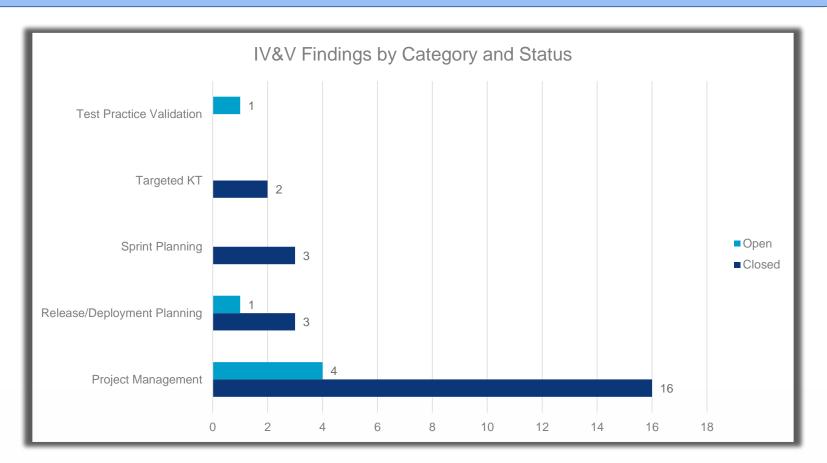

Executive Summary

| Mar | Apr | Мау | Category | IV&V Observations | |
|-----|-----|-----|--|--|--|
| G | G | G | OJT and KT Sessions | This category remains Green (low criticality) for the May reporting period with no active findings. | |
| G | G | G | Targeted KT | This category remains Green (low criticality) for the May reporting period. IV&V will continue to monitor. | |
| G | G | G | Project Performance Metrics | The R3.32 defect percentage was 15% of the total USPs which is below the targ threshold. A total of 420 USPs were deployed to production. IV&V has closed the associated unplanned rework finding for this category as we no longer deem this an issue. | |
| Y | Y | Y | Organizational Maturity Assessment (OMA) | This category remains Yellow (medium criticality) for the May reporting period. IV&V will continue to monitor. | |
| R | R | R | Project Management | Quality continues to remain a concern for IV&V as there were several high and medium criticality production defects for R3.32. IV&V closed two findings for this category as both no longer are considered issues 1) PII/PHI data in non-production environments and 2) Inability for BHA staff to work remotely. In addition, the preliminary concern for Project deliverables required of RSM has also been closed. A few "Big Boulder" initiatives slipped in May and remains a high concern for IV&V. This category remains Red (high criticality) for the May reporting period. | |

Executive Summary

As of the May 2023 reporting period, there are a total of six (6) open findings – one High Issue, three Medium Issues, one Medium Risk, and one Low Risk spread across the Sprint Planning, Release / Deployment Planning, Test Practice Validation, and Project Management assessment areas. One preliminary concern also remains open.

IV&V Findings & Recommendations

IV&V Findings & Recommendations Assessment Categories

Throughout this project, IV&V verifies and validates activities performed in the following process areas:

- Sprint Planning
- User Story Validation
- Test Practice Validation
- Release / Deployment Planning
- On-the-Job Training (OJT) and Knowledge Transfer (KT) Sessions
- Targeted Knowledge Transfer (KT)
- Project Performance Metrics
- Organizational Maturity Assessment
- Project Management

IV&V Findings & Recommendations Test Practice Validation

| # | Key Findings | Criticality Rating |
|---|--|-----------------------|
| 2 | Medium Issue – As a result of regression testing not being consistently performed, production releases are breaking and/or deprecating existing functionality in the production environment. Full use of automated regression testing capabilities continued to be delayed in May. BHA has received an approval to renew the Tricentis license renewals and coaching services. BHA will complete this effort with a mix of in-house staffing along with RSM and DataHouse testing staff. IV&V will continue to monitor this medium criticality finding. | M |

| Recommendations | Status |
|---|-------------|
| Pursue and complete additional formal training in AzureDevOps and Tricentis for test automation at the earliest possible juncture and complete efforts to automate the 2 primary regression test scripts. | In progress |
| Developing a common and consistent regression testing approach across DDD and CAMHD. | Completed |
| Determining if current regression testing timeframes are adequate and if not, add more time to the pre- production regression test efforts for all release deployments. | Completed |

IV&V Findings & Recommendations Test Practice Validation (cont'd)

| Recommendations | Status |
|---|-----------|
| Updating the regression test scripts to ensure consistency with system configuration. | Completed |
| Modifying release schedules to allow for regression testing timeframes. | Completed |
| Planning releases by functionality type to avoid unnecessary repetitive work being performed in any given section of the solution. | Completed |
| Performing regression testing after every release, or possibly every other release, or potentially tying regression tests to FSU releases. In addition, consider alternating the DDD and CAMHD scripts every other release. | Completed |
| Modifying regression test scripts to start AFTER case creation, limiting the time it takes to execute. (This recommendation was for a point in time and is no longer valid.) | Completed |
| Implementing 'hard' code freeze dates as well as test environment deployment dates to ensure that testing and deployment activities are not rushed. | Completed |
| Modifying the deployment scripts based on information gained from previous release deployments. | Completed |

IV&V Findings & Recommendations Test Practice Validation (cont'd)

| Recommendations | Status |
|--|-----------|
| Consulting with RSM to determine how the 'interim testing processes' can be improved until such time that automated testing is available for repeatable and complete industry standard regression testing. | Completed |
| • Performing an RCA in collaboration with RSM for the continued concerns with regression testing efforts. | Completed |

IV&V Findings & Recommendations Release / Deployment Planning

| # | Key Findings | Criticality Rating |
|----|--|-----------------------|
| 18 | Medium Issue - Due to ongoing deployment processes and technical execution issues, the Project may continue to encounter defects and challenges in meeting projected timelines for production and non-production deployments. A total of 420 USP's were deployed to production for R3.32 on 05/25/2023. There were eight (8) new medium and high priority defects identified after the production release. It is unclear if any of these defects were deployment related. A root cause analysis (RCA) is planned for R3.32 in early June. IV&V will continue to monitor this medium criticality finding. | M |

| Recommendations | | |
|---|-------------|--|
| Ensure there are adequate and qualified resources to support the current deployment processes. This may require the support from RSM resources to provide assistance and knowledge transfer for some of the more complex deployment components. | In Progress | |
| Consult on a regular basis with Microsoft and RSM on best practices that BHA could employ to support deployment. | In Progress | |

IV&V Findings & Recommendations Release / Deployment Planning (cont'd)

| Recommendations | Status |
|---|-------------|
| Request the assistance of the RSM Solution Architect in reviewing and correcting issues associated with consistency of the configurations across environments, ensuring that the test environment is capable of testing ALL functions of any given release without the need for using multiple test environments. | In Progress |
| Request the assistance of the RSM Solution Architect in review of deployment scripts as a double check for accuracy and completeness prior to commencing deployment activities. | In Progress |
| The Project Team should consider evaluating potential changes to improve/enhance existing processes and communications to address current release/deployment shortfalls. | In Progress |
| IV&V recommends performing an RCA in collaboration with RSM for the continued concerns surrounding environment differences. | In Progress |
| IV&V recommends updating the Project's Configuration Management Plan to address the current needs of the Project. This should include specific checklists geared at ensuring repeatable promotional processes by DOH. | In Progress |
| Implementing 'hard' code freeze dates as well as test environment deployment dates to ensure that testing and deployment activities are not rushed. | Completed |
| Ensuring an operational and fully functional test environment is available to effectively conduct end-to-end regression testing prior to deploying a release to production. | Completed |
| Working in collaboration with RSM to establish a transition plan for DOH to assume all deployment activities to ensure complete ownership of these processes. This should assist with consistency in approach and execution going forward. | Completed |

IV&V Findings & Recommendations Release / Deployment Planning (cont'd)

| Recommendations | Status |
|--|-----------|
| Developing a plan to institutionalize the execution of "Smoke Testing" for promotions to non-production and production environments. This will help to ensure that all components needed to test have been properly deployed prior to the actual execution of test activities. | Completed |
| Determining an improved manner for managing DOH environments to avoid an error-prone process of 'cherry picking' what is and what is not ready for deployment. (As a result of how the current development environment is being managed, 'cherry picking' components to deploy will continue to occur. This recommendation is closed.) | Closed |

IV&V Findings & Recommendations Project Performance Metrics

| # | Key Findings | Criticality Rating |
|----|---|-----------------------|
| 21 | Closed Low Issue - Unplanned rework may have an impact on delivering DDI functionality by the end of the DDI period. The final defect percentage for R3.32 was determined to be 15% of the total USPs delivered, meeting the target of 20% or less. Based on the defect percentage meeting targets from previous releases, IV&V is closing this finding. | C |

| Recommendations | | Status |
|-----------------|---|--------|
| • | Reduce the amount of unplanned rework by continuing to focus on quality improvement measures. | Closed |
| • | Strive for defect performance metric not to exceed 20% of all user story points in any given release. | Closed |

| # | Key Findings | Criticality Rating |
|----|---|-----------------------|
| 14 | Medium Issue - Due to multiple quality concerns, the Project may continue to face impactful system defects. R3.32 was deployed to production on 05/25/2023 with eight (8) new medium and high priority defects identified after the production release. An RCA is planned to determine the cause of these defects in early June. The Project decided to push out the mid-sprint deployment for Golden Record functionality to the second week in June to allow for sufficient testing of the final solution. IV&V will continue to monitor this medium criticality finding. | M |

| Recommendations | Status |
|--|-------------|
| • Evaluate existing project staff skills and experience level to ensure they meet BHA support requirements. | In Progress |
| Perform CAMHD revenue neutrality fiscal balance testing on a quarterly basis to ensure revenues are as expected. | In Progress |
| Assign dedicated resources to provide oversight and monitoring of CAMHD Fiscal Processes, depending on new staff availability. | Open |
| Monitor implemented IV&V recommendations for effectiveness. | In Progress |

| Recommendations | Status |
|--|-----------|
| Performing an RCA in collaboration with RSM after all future release deployments for continual quality improvement. | Completed |
| Collaborating (DDD and CAMHD) on the necessary revisions to the submitted design deliverables to increase level of detail and quality. | Completed |
| Performing typical project testing including System Integration, User Acceptance, Performance, and Regression Testing. | Completed |
| Dedicating sufficient time in between releases for BHA and RSM to execute/implement RCA correction actions to reduce the volume of unplanned rework. | Completed |

| # | Key Findings | Criticality Rating |
|----|--|-----------------------|
| 12 | Closed Medium Issue - PII/PHI data in non-production environments. As part of R3.22, RSM utilized an updated design for the scrambling of PII and PHI data in non-production environments. The solution is working as designed and expected. As such, IV&V is closing this finding. | M |

| Recommendations | Status |
|--|-----------|
| Escalating the pending Security Assessment approval if possible. | Completed |
| Limiting the volume of environments with PII/PHI data and access necessary to support development work, which should help minimize this risk. | Closed |
| IV&V recommends if production data is necessary in any non-production environment that DOH establishes a plan for effectively managing the security of the PII/PHI data. | Completed |
| IV&V recommends that DOH mitigates this finding by minimizing and/or masking PHI/PII data in designated non-production environments. | Completed |

| # | Key Findings | | | | | |
|--|---|-------------|--|--|--|--|
| 22 | High Issue - The project schedules for 'big boulder' functionality development are slipping. The Project continued to re-align release targets for 'big boulder' functionality in May with several items slipping from R3.32 to R3.33. The mid-sprint deployment re-scheduled for late May to promote Golden Record components was delayed to the second week in June, to allow for development and test completion. The FHIR interface was delayed again, this time due to the identification of a Microsoft defect. The CAMHD Provider APIs were also not completed by the end of May. Both the FHIR and Provider APIs are now expected to be completed in R3.33. IV&V will continue to monitor this high criticality issue. | | | | | |
| | | | | | | |
| Reco | ommendations | Status | | | | |
| • St | rive for ongoing velocity metric of a minimum of 120 user story points in any given release. | In Progress | | | | |
| Identify the reason(s) for the lower-than-expected R3.27, R3.28, and R3.29 velocity to determine if corrective actions need to take place. | | | | | | |
| | xtend the current DDI timeframe to allow for the completion of 'big boulder' interfaces functionality evelopment. | Completed | | | | |
| • A | dding resources to support the development of "big boulder' interfaces functionality. | Completed | | | | |

| # | Key Findings | Criticality Rating |
|-----|--|-----------------------|
| 26 | 26 Closed Low Issue - The inability for BHA staff to work remotely is decreasing productivity and causing morale issues amongst team members. The Departmental Executive Committee announced a work from home policy, where staff may request to work from home up to 3 days per week. As such, IV&V is closing this finding. | |
| | | |
| Rec | ommendations | Status |
| • G | ranting remote work to help retain existing staff and to attract new candidates for open positions. | Completed |

| # | Key Findings | Criticality Rating |
|------|---|-----------------------|
| 29 | Medium Risk - RFP(s) for Project Expansion and M&O Have Not Been Approved by CMS. CMS has notified BHA that the ADAD components included in IADPU #4 and the RFP should be removed until such time as another IAPDU is submitted and approved. BHA has awarded contracts for the Inspire DDI project. RSM was awarded the SI work and PCG was awarded the IV&V services. CMS approval of the contracts are pending. | |
| | | |
| Reco | ommendations | Status |
| • Co | ontinue to escalate RFP approvals with DHS. | In Progress |
| • Se | eek approval for extending the existing contract if feasible. | In Progress |

| # | Key Findings | Criticality Rating |
|----|---|-----------------------|
| 30 | Closed Preliminary Concern – The Project deliverables contractually required of RSM by the end of the DDI period are not clear. BHA has awarded contracts for the INSPIRE DDI effort. The Project is finalizing the System, Security, and Architecture Blueprint documentation deliverables. IV&V is closing this preliminary concern finding. | 0 |

21

IV&V Findings & Recommendations Project Performance Metrics

| Metric | Description | IV&V Observations | | IV&V Updates | | | |
|----------|---|--|-------|--------------|---------------------|--------------------|------------------------|

| | | | R3.31 | 620 USPs | 519 | 84% | |
| | Phase 3 | | | R3.32 | 375 USPs | 420 | 112% |
| | | | | | | | |

IV&V Findings & Recommendations Project Performance Metrics (cont'd.)

| Metric | Description | IV&V Observations | IV&V Updates |
|----------------|---|--|---|
| Defect Metrics | Understand and track the following: Defects by category (bug fixes) US Points assigned to defects in a release vs US Points assigned to planned US in a release | May - R3.32 was deployed to production on 05/25/2023. A total of 420 USPs were promoted to production. 85% of the total USPs were associated with planned user stories and requests. 15% of the total USPs were associated with defects that were either encountered during the release effort or pulled from the backlog. | The defect percentage for May was 15% which is under the target range of 20% or less of all USPs promoted to production. |

Appendix A: IV&V Rating Scales

Appendix A IV&V Rating Scales

This appendix provides the details of each finding and recommendation identified by IV&V. Project stakeholders are encouraged to review the findings and recommendations log details as needed.

- See Findings and Recommendations Log (provided under separate cover)
- IV&V Assessment Category Rating Definitions

The assessment category is under control and the current scope can be delivered within the current schedule. The assessment category's risks and issues have been identified, and mitigation activities are effective. The overall impact of risk and issues is minimal.

The assessment category is proceeding according to plan (< 30 days late).

The assessment category is under control but also actively addressing resource, schedule or scope challenges that have arisen. There is a clear plan to get back on track.

The assessment category's risk and/or issues have been identified, and further mitigation is required to facilitate forward progress. The known impact of potential risks and known issues are likely to jeopardize the assessment category.

Schedule issues are emerging (> 30 days but < 60 days late).

Project Leadership attention is required to ensure the assessment category is under control.

The assessment category is not under control as there are serious problems with resources, schedule, or scope. A plan to get back on track is needed.

The assessment category's risks and issues pose significant challenges and require immediate mitigation and/or escalation. The project's ability to complete critical tasks and/or meet the project's objectives is compromised and is preventing the project from progressing forward.

Significant schedule issues exist (> 60 days late). Milestone and task completion dates will need to be re-planned. Executive management and/or project sponsorship attention is required to bring the assessment category under control.

Appendix A Finding Criticality Ratings

| Criticality Rating | Definition |
|-----------------------|--|
| • | A high rating is assigned if there is a possibility of substantial impact to product quality, scope, cost, or schedule. A major disruption is likely, and the consequences would be unacceptable. A different approach is required. Mitigation strategies should be evaluated and acted upon immediately. |
| M | A medium rating is assigned if there is a possibility of moderate impact to product quality, scope, cost, or schedule. Some disruption is likely, and a different approach may be required. Mitigation strategies should be implemented as soon as feasible. |
| L | A low rating is assigned if there is a possibility of slight impact to product quality, scope, cost, or schedule. Minimal disruption is likely, and some oversight is most likely needed to ensure that the risk remains low. Mitigation strategies should be considered for implementation when possible. |

Appendix B: Inputs

Appendix B Inputs

This appendix identifies the artifacts and activities that serve as the basis for the IV&V observations.

Meetings attended during the May 2023 reporting period:

- 1. Daily Scrum Meetings (selected)
- 2. Twice Weekly RSM Issues Meeting
- 3. Weekly BHA-ITS Project Status Meeting
- 4. Bi-Weekly Check-in: CAMHD
- 5. Bi-Weekly Check-in: DDD
- 6. IV&V Draft IV&V Status Review Meeting with DOH
- IV&V Draft IV&V Status Review Meeting with RSM and DOH
- 8. Pre-RSM Contract Close-Out Meeting -5/24/23
- 9. RSM Contract Close-Out Meeting 5/26/23
- 10. DOH BHA IT Solution Project Steering Committee 2023 – 5/26/23

Eclipse IV&V[®] Base Standards and Checklists

Artifacts reviewed during the May 2023 reporting period:

- 1. Daily Scrum Notes (selected)
- 2. Twice Weekly Issues Meeting Notes (selected)
- 3. BHA Contract Closeout PDF
- 4. ASO Document Catalog

| | | contractually required of | DDI contract, it is not clear what | | | contracts for the INSPIRE DDI | Management | Concern | | | | |
| | | RSM by the end of the DDI | project deliverables are | | | effort. The Project is finalizing the | | | | | | |
| | | period are not clear | contractually required from | | | System, Security, and Architecture | | | | | | |
| | | | RSM before the contract ends. | | | Blueprint documentation | | | | | | |
| | | | | | | deliverables. IV&V is closing this | | | | | | |
| | | | | | | preliminary concern finding. | | | | | | |
| | | | | | | 04/30/2023 - RSM continued to | | | | | | |
| | | | | | | work on documenting updates to | | | | | | |
| | | | | | | the System, Security, Architecture | | | | | | |
| | | | | | | Blueprint, and Knowledge Transfer | | | | | | |
| | | | | | | deliverables which are expected to | | | | | | |
| | | | | | | be submitted to BHA by the end of | | | | | | |
| | | | | | | the DDI period. With a month left | | | | | | |
| | | | | | | on the DDI contract, the Project | | | | | | |
| | | | | | | needs to focus on preparing for all | | | | | | |
| | | | | | | aspects of turnover and transition | | | | | | |
| | | | | | | activities of the Inspire solution. | | | | | | |
| | | | | | | 03/31/2023 - RSM reported in their | | | | | | |
| | | | | | | last March status report the | | | | | | |
| | | | | | | System, Security, Architecture | | | | | | |
| | | | | | | Blueprint, and Knowledge Transfer | | | | | | |
| | | | | | | documentation is on target for | | | | | | |
| | | | | | | completion and submittal to BHA | | | | | | |
| | | | | | | by the end of the DDI period. It is | | | | | | |
| | | | | | | not clear when draft copies of | | | | | | |
| | | | | | | these deliverables will be | | | | | | |
| | | | | | | submitted to BHA for their review | | | | | | |
