

OFFICE OF ENTERPRISE TECHNOLOGY SERVICES KE'ENA HO'OLANA 'ENEHANA

P.O. BOX 119, HONOLULU, HAWAI'I 96810-0119 Ph: (808) 586-6000 | Fax: (808) 586-1922 ETS.HAWAII.GOV

August 28, 2024

The Honorable Ronald D. Kouchi President of the Senate and Members of the Senate Thirty-Second State Legislature State Capitol, Room 409 Honolulu, Hawai'i 96813 The Honorable Scott K. Saiki Speaker and Members of the House of Representatives Thirty-Second State Legislature State Capitol, Room 431 Honolulu, Hawai'i 96813

Aloha Senate President Kouchi, Speaker Saiki, and Members of the Legislature:

Pursuant to HRS section 27-43.6, which requires the Chief Information Officer to submit applicable independent verification and validation (IV&V) reports to the Legislature within ten days of receiving the report, please find attached the report the Office of Enterprise Technology Services received for the State of Hawai'i, Department of Health, BHA Integrated Case Management System Project.

In accordance with HRS section 93-16, this report may be viewed electronically at http://ets.hawaii.gov (see "Reports").

Sincerely,

Christine M. Sakuda Chief Information Officer State of Hawai'i

Hawaii BHA Integrated Case Management System Project – Phase 4

IV&V Report for the period of

July 1 - July 31, 2024

Final Submitted: August 14, 2024

Agenda

Executive Summary IV&V Findings & Recommendations

Appendices

- A Rating Scales
- B Inputs
- C Project Trends

R4.7 go-live is on track to be deployed on 8/1/24 and smoke tested on 8/2/24. Fixes for three (3) (1 medium, 2 high priority) post-production bugs were deployed with R4.6. The fix for one (1) R4.6 post-production bug (high priority) has been deployed with R4.7. The vendor is working on fixing other high and medium-priority post-production bugs. SMS-related functionality has been deployed and the project anticipates that Fast Health Interoperability Resources (FHIR) will be deployed in a release after R4.7. IV&V will monitor the progress and quality of R4.7 and the Mid-Sprint Deployment (MSD).

Microsoft executed the performance test Tuesday, 6/4/24, through Wednesday, 6/12/24; stakeholders expect Microsoft's performance test report in August 2024. Behavioral Health Administration (BHA) personnel reported no recent performance issues.

The SI vendor demonstrated the Maui Wildfire communication functionality to stakeholders on 7/9/24, and it seemed to be productive. The date for the FHIR demo is yet to be finalized. Although this is progress, the project is yet to demonstrate regular demos as part of the Sprint Review.

A preliminary concern was opened in May regarding the current process, which does not allow BHA to track actual costs versus budgeted costs of large functionalities such as Provider Portal and Maui Wildfire Communication. As of the July reporting period, it is agreed that the project will report cases where the number of User Story Points (USPs) is going to exceed the budgeted number of USPs for Big Rock items such as Provider Portal and Maui Wildfire Communication. The process for reporting cases is being discussed and analyzed.

The SI Vendor submitted a draft Adverse Events Report (AER) Analytics project schedule on 7/3/24, which BHA and IV&V personnel are reviewing. The draft project schedule appears to be incomplete, e.g., has a "TBD" for one of the testing tasks, and some resource/owner information is missing. The project has completed the discovery phase of the AER Analytics project, and the design phase is ongoing.

| May | June | Jul | Category | IV&V Observations |
|-----|------|-----|--------------------|--|
| Y | Y | Y | Sprint Planning | IV&V shared the Stakeholder Register and RACI templates (based on best practices) with BHA in May 2024. BHA is working on populating the Stakeholder Register and RACI matrix. The SI vendor demonstrated the Maui Wildfire communication functionality to stakeholders on 7/9/24, and it seemed productive. The date for the FHIR demo is yet to be finalized. Although this is progress, the project is yet to demonstrate regular demos as part of the Sprint Review. |

| May | June | Jul | Category | IV&V Observations | |
|-----|------|-----|-------------------------------------|---|--|
| G | G | G | User Story (US) Validation | There are no active findings in the User Story (US) Validation category, which remains Green (low criticality) for the July reporting period. IV&V will continue to monitor the US development and validation process in upcoming reporting periods. | |
| Y | Y | Y | Test Practice Validation | R4.7 regression testing was done manually because Microsoft updated properties resulting in Tosca scripts being unable to execute - an issue is logged in Azure DevOps. The testing was completed and passed successfully. The fixes for bugs (two from R4.7, 3 from R4.6) that resulted from the R4.7 and R4.6 regression testing will be deployed in future releases. R4.7 go-live is on track to be deployed on 8/1/24 and smoke tested on 8/2/24. | |
| Y | Y | Y | Release / Deployment Planning | One of the high-priority R4.6 post-production defects was deployment-related, the fix has been deployed with R4.7. IV&V will monitor the progress and quality of R4.7 and the MSD deployments. A finding was opened in April regarding the process of updating existing documents and folders on DDD's SharePoint site. The execution time for an earlier, intensive process was unacceptable, and the new functionality is based on the same design and process. As of the July reporting period, the SI vendor and BHA finalized the Business Requirements Document (BRD). A new User Story has been created in Azure DevOps to commence design and development. | |

| May | June | Jul | Category | IV&V Observations | |
|-----|------|-----|---|---|--|
| G | G | G | OJT and KT Sessions | This category remains Green (low criticality) for the July reporting period with no active findings. | |
| G | G | G | Targeted KT | This category remains Green (low criticality) for the July reporting period. IV&V will continue to monitor. | |
| G | G | G | Project Performance Metrics | There are no project performance metrics to report for this reporting period. IV&V will keep this category's criticality rating Green (low criticality) and continue monitoring it. | |
| G | G | G | Organizational Maturity Assessment (OMA) | This category remains Green for the July reporting period. There are no outstanding findings in this category, and IV&V will continue to monitor. | |

| May | June | Jul | Category | IV&V Observations | |
|-----|------|-----|-------------------------|---|---|
| | | | Y Project Management | R4.7 go-live is on track to be deployed on 8/1/24 and smoke tested on 8/2/24. Fixes for three (3) (1 medium, 2 high priority) were deployed with R4.6. The fix for one (1) R4.6 post-production bug (high priority) has been deployed with R4.7. The vendor is working on fixing other high and medium-priority post-production bugs. SMS-related functionality has been deployed and the project anticipates that Fast Health Interoperability Resources (FHIR) will be deployed in a release after R4.7. IV&V will monitor the progress and quality of R4.7 and the Mid-Sprint Deployments (MSD). | |
| Y | | | | Microsoft executed the performance test from Tuesday, 6/4/24, to Wednesday, 6/12/24. Stakeholders are expecting Microsoft's performance test report in August 2024. BHA personnel have not reported any performance issues recently. | |
| | Y | Y | | The SI Vendor submitted a draft AER Analytics project schedule on 7/3/24, which BHA and IV&V personnel are reviewing. The draft project schedule appears incomplete, e.g., it has a "TBD" for one of the testing tasks, and some resource/owner information is missing. The project has completed the discovery phase, and the development phase is ongoing. | |
| | | | | | The divisions continue to collaborate on the security assessment exercise. The draft security assessment report is due in October 2024. |
| | | | | | To address the delayed claims postings, there has been improved coordination and communication with all involved parties. Based on the improved process, this Preliminary Concern will be closed. |
| | | | | The current process does not allow BHA to track actual costs versus budgeted costs by feature/functionality. As of the July reporting period, it is agreed that the project will report cases where the number of User Story Points (USPs) exceeds the budgeted number of USPs for Big Rock items such as FHIR. | |

| May | June | Jul | Category | IV&V Observations |
|-----|------|-----|------------------------|---|
| Y | Y | Y | Resource Management | DDD is finalizing the position description (PD) for the Business Analyst. BHA is finalizing contractual options to add an automated testing resource. |

As of the July 2024 reporting period twelve (12) open findings were updated – eight (8) Medium Issues, two (2) Medium Risks, one (1) Low Issue, and one (1) Preliminary Concern spread across the Release/Deployment Planning, Test Practice Validation, Sprint Planning, Project Management, and Resource Management assessment areas are currently open. One (1) preliminary concern was also closed in the July reporting period.

Open Risks/ Issues by Category/Priority

Assessment Categories

Throughout this project, IV&V verifies and validates activities performed in the following process areas:

- Sprint Planning
- User Story Validation
- Test Practice Validation
- Release / Deployment Planning
- On-the-Job Training (OJT) and Knowledge Transition (KT) Sessions
- Targeted Knowledge Transition (KT)
- Project Performance Metrics
- Organizational Maturity Assessment
- Project Management
- Resource Management

Sprint Planning

| # | Key Findings | Criticality Rating |
|----|---|-----------------------|
| | Medium Risk: Lack of regular Sprint Reviews and Sprint Demos will likely lead to misalignments between delivered work and stakeholder needs. | |
| 31 | Finding Update: The SI vendor demonstrated the Maui Wildfire communication functionality to stakeholders on 7/9/24 and it seemed to be productive. The date for the FHIR demo is yet to be finalized. Although this is progress, the project is yet to demonstrate regular demos as part of the Sprint Review. | M |

| Recommendations | Status |
|---|-------------|
| According to Agile Best Practices, IV&V recommends including Sprint Reviews and Demos in future releases (R4.2 and onwards) with all relevant stakeholders to assess the completion of User Stories, review important metrics and outcomes, and confirm if the Sprint goal has been achieved. This approach would also help ensure the backlog is prioritized and well-prepared for the next Sprint. These are some recommendations for project alignment, stakeholder engagement, quality assurance, transparency, and the incorporation of user feedback. | In Progress |
| Strengthen the collaboration between development teams and stakeholders by enhancing communication channels. Regularly validate project objectives and ensure that Sprint deliverables remain consistent with stakeholder requirements | In Progress |
| Foster active participation from users and stakeholders during both Sprint Reviews and Sprint Demos. Emphasize the value of iterative feedback to guide development and ensure that user needs are consistently met. | In Progress |

Sprint Planning (cont'd)

| Recommendations | Status |
|--|-------------|
| Establish standardized communication protocols for both Sprint Reviews and Sprint Demos. Encourage teams to deliver concise and informative progress reports, including achievements, challenges, and future plans. This will enhance stakeholder engagement and project transparency. | In Progress |
| Create a stakeholder register to identify all stakeholders. List their identification, assessment, and classification. Review the register regularly to plan appropriate stakeholder engagement. | In Progress |
| Institute a structured documentation process for both activities. Document key decisions, action items, and insights from each session to ensure accountability and to support ongoing process improvement. | In Progress |

Sprint Planning (cont'd)

| # | Key Findings | Criticality Rating |
|----|--|-----------------------|
| 41 | Medium Risk: Absence of separate dedicated product backlog review meetings can pose several challenges for a project team. Finding Update: IV&V has shared Stakeholder Register and RACI templates (based on best practices) for BHA to populate. Once the stakeholder registry and the RACI matrix are finalized, BHA plans to schedule product backlog review meetings. There are no new updates for the July reporting period. | M |

| Recommendations | Status |
|--|--------|
| Separate dedicated product backlog review meetings (during Sprints) would allow clarifying any ambiguities or uncertainties, re-prioritization, estimation and refinement of backlog items. This would allow the project team to avoid situations where decisions about including items mid-Sprint would have to be taken. | Open |
| IV&V recommends scheduling separate dedicated product backlog review meetings (during Sprints) where all relevant stakeholders are invited to review the product backlog and scheduled at the appropriate time(s) such that there is sufficient time to plan the design, development, and implementation (DDI) of the next release(s). | Open |

Test Practice Validation

| # | Key Findings | Criticality Rating | |
|--|---|-----------------------|--|
| 2 | Medium Issue: As a result of automated regression testing not being comprehensively performed, production releases are breaking and/or deprecating existing functionality in the production environment. Finding Update: R4.7 regression testing was done manually because Microsoft updated properties resulting in Tosca scripts being unable to execute - an issue is logged in Azure DevOps. The testing was completed and passed successfully. The fixes for bugs (two from R4.7, 3 from R4.6) that resulted from the R4.7 and R4.6 regression testing will be deployed in future releases. R4.7 go-live is on track to be deployed on 8/1/24 and smoke tested on 8/2/24. | M | |
| Recor | nmendations | Status | |
| regres | g board(s) in Azure DevOps or a document on SharePoint that provides information about the status of sion testing automation, to facilitate visibility and transparency to BHA project personnel and olders. | In Progress | |
| | ule priorities should be reevaluated by distributing the work according to the resource bandwidth. This will that the schedule is not impacted and that the work is done efficiently between regression testing and | In Progress | |
| Pursue and complete additional formal training in Azure DevOps and Tricentis for test automation at the earliest possible juncture and complete efforts to automate the two primary regression test scripts. | | | |
| | Determine if current regression testing timeframes are adequate, and if not, add more time to the pre-production regression test efforts for all release deployments. | | |

Test Practice Validation (cont'd)

| # | Key Findings | Criticality Rating |
|----|--|-----------------------|
| 40 | Medium Issue: Improvements to the testing process are needed to ensure adequate CAMHD participation and comprehensive testing of functionality prior to production deployment. Finding Update: IV&V shared Stakeholder Register and RACI templates (based on best practices) with BHA in May 2024. BHA is working to populate information in the Stakeholder Register and RACI matrix No new updates for the July reporting period. | |

| Recommendations | Status |
|---|-------------|
| Identify stakeholders (output is stakeholder register) and develop a RACI matrix for testing. | In Progress |
| Review the overall testing process and implement any needed improvements identified. | Open |

Release / Deployment Planning

| # | Key Findings | Criticality Rating |
|------|--|-----------------------|
| 43 | Medium Issue: The execution time for the process for updating DDD SharePoint folders is unacceptable. Finding Update: The SI vendor and BHA finalized the Business Requirements Document (BRD). A new User Story has been created in Azure DevOps, to commence development. | M |
| Reco | ommendations | Status |
| IV&V | recommends doing an impact analysis, e.g., downstream impact. | Open |

| Recommendations | Status |
|---|----------------|
| IV&V recommends doing an impact analysis, e.g., downstream impact. | Open |
| IV&V recommends DDD puts on hold any development utilizing Power Automate for the performance issue encountered in production (marked "TBD" in finding #14 related to "SharePoint Bulk Flows still rand related User Stores, e.g., "Changes to DDD folders", and defects. | running") Open |
| IV&V recommends evaluating other feasible options, e.g., leveraging SharePoint tools and best practice | es. Open |
| A project issue should be opened to identify and manage the resolution of this issue. | Open |

Release / Deployment Planning (cont'd)

| # | Key Findings | Criticality Rating |
|----|---|-----------------------|
| 39 | Low Issue: Due to ongoing deployment processes and technical execution issues, the project may continue to encounter defects and challenges, e.g., when releases are in production or in meeting projected timelines for production and non-production deployments. Finding Update: One of the high-priority R4.6 post-production defects was deployment-related, the fix has been deployed with R4.7. IV&V will monitor the progress and quality of R4.7 and the Mid-sprint deployments (MSDs). | L |

| Recommendations | Status |
|---|--------|
| The project should consider automating deployments for resource savings, increased efficiency, consistency, faster time to market, improved collaboration and reliability, scalability, version control integration, and rollback capability. | Open |
| Ensure there are adequate and qualified resources to support the current deployment processes. This may require support from RSM resources to provide assistance and knowledge transfer for some more complex deployment components. | Open |
| As appropriate, consult with RSM on best practices that BHA could employ to support deployment. | Open |

Release / Deployment Planning (cont'd)

| Recommendations | Status |
|---|--------|
| Request the assistance of the RSM Solution Architect in reviewing and correcting issues associated with the consistency of configurations across environments, ensuring that the test environment is capable of testing ALL functions of any given release without the need for using multiple test environments. | Open |
| Request the assistance of the RSM Solution Architect in the review of deployment scripts as a double-check for accuracy and completeness prior to commencing deployment activities. | Open |
| The Project Team should consider evaluating potential changes to improve/enhance existing processes and communications to address current release/deployment shortfalls. | Open |
| IV&V recommends performing an RCA in collaboration with RSM for the continued concerns surrounding environment differences. | Open |
| IV&V recommends updating the Project's Configuration Management Plan to address the current needs of the Project. This should include specific checklists geared at ensuring repeatable promotional processes by DOH. | Open |
| Look at implementing 'hard' code freeze dates as well as test environment deployment dates to ensure that testing and deployment activities are not rushed. | Open |
| Ensure an operational and fully functional test environment is available to effectively conduct end-to-end regression testing prior to deploying a release to production. | Open |
| Develop a plan to institutionalize the execution of smoke testing for promotions to non-production and production environments. This will help to ensure that all components needed to test have been properly deployed prior to the actual execution of test activities. | Open |

Project Management

| # | Key Findings | Criticality Rating |
|---|--|-----------------------|
| 44 | Closed Preliminary Concern: Delays in the posting of administrative claims are negatively affecting reimbursements.Finding Update: To address the delayed claims postings, there has been improved coordination and | N/A |
| | communication with all involved parties. Based on the improved process, this Preliminary Concern will be closed. | |
| Rec | ommendations | Status |
| ВНА | should continue research of this issue with MedQuest and PCG to identify any needed corrections. | Closed |
| BHA to present any needed corrections to CMS. | | Closed |

| # | Key Findings | Criticality Rating |
|--------|---|-----------------------|
| 14 | Medium Issue: Due to multiple quality concerns, the Project may continue to face impactful system defects. Finding Update: R4.7 go-live is on track to be deployed on 8/1/24 and smoke tested on 8/2/24. Fixes for three (3) (1 medium, 2 high priority) were deployed with R4.6. The fix for one (1) R4.6 post-production bug (high priority) is being deployed with R4.7. The vendor is working on fixing other high and medium-priority post-production bugs. The project anticipates that FHIR and SMS-related functionality will be deployed in a release after R4.7. IV&V will monitor the progress and quality of R4.7 and any Mid-Sprint Deployments (MSD). | M |
| Recor | nmendations | Status |
| Evalua | ate existing project staff skills and experience level to ensure they meet BHA support requirements. | In Progress |
| Perfor | m CAMHD revenue neutrality fiscal balance testing on a quarterly basis to ensure revenues are as red. | In Progress |
| Assigr | dedicated resources to provide oversight and monitoring of CAMHD Fiscal Processes | Open |
| Monito | r implemented IV&V recommendations for effectiveness. | In Progress |

| | # | Key Findings | Criticality Rating |
|---|----|---|-----------------------|
| | | Medium Issue: Performance bottlenecks with the INSPIRE production environment may result in low productivity and poor user experience. | |
| 3 | 33 | Finding Update: Microsoft executed the performance test from Tuesday, 6/4/24, to Wednesday, 6/12/24. Stakeholders are expecting Microsoft's performance test report in August 2024. BHA personnel have not reported any performance issues recently. | M |

| Recommendations | Status |
|---|--------|
| The last performance test was executed in June 2023 for phase 3 releases (R3.x). ~800+ new User Story Points (USPs) have been developed since the last performance test execution. IV&V recommends BHA execute a performance test during the development of R4.6 (planned completion 5/20/24), identifying test cases and scenarios that include both DDD and CAMHD functionality, transactions/functionality that are performance intensive, e.g., calculator functionality. | Open |
| Conduct load and performance testing for each release that has significant new features/functionality, e.g., calculator-related transactions. | Open |
| Create a plan for comprehensive performance testing and address any performance bottlenecks. | Open |
| Have the benchmark assessments done annually and implementation of Azure App Insights for Power Platform. | Open |
| Execute test scripts that measure the run-time for execution of long-running transactions. E.g., calculator functionality/transactions and monitoring results over time. | Open |

| # | Key Findings | Criticality Rating |
|-------|---|-----------------------|
| | Medium Issue: Lack of a comprehensive project schedule could lead to missed tasks, project delays, and cost overruns. | |
| 36 | Finding Update: The SI Vendor submitted a draft AER analytics project schedule on 7/3/24, which BHA and IV&V personnel are reviewing. The draft project schedule appears to be incomplete, e.g., it has a "TBD" for one of the testing tasks, and some resource/owner information is missing. The project has completed the discovery phase of the AER Analytics project, and the design phase is ongoing. | M |
| Rec | Recommendations | |
| | blish a clear project schedule management plan that outlines roles, responsibilities, and accountability for dule adherence. | Open |
| | te and baseline a comprehensive project schedule for Phase 4 and future project phases in MS Project, rtsheet, or a similar tool, containing tasks for both SI vendor and State, task dependencies, and resourcing. | Open |
| Imple | ement regular schedule reviews and updates to ensure alignment with project objectives and milestones. | Open |

| # | Key Findings | Criticality Rating |
|----|---|-----------------------|
| 42 | Medium Issue: Ineffective governance and communication among stakeholders can significantly impact a project in several ways, e.g., stakeholder disengagement, conflict and tension, misalignment of objectives, increased risks, unclear roles and responsibilities, and quality issues. An example on this project is the development and implementation of Golden Record/Master Data Management (MDM). The lack of effective governance and communication among stakeholders can result in project delays, budget overruns, and decreased quality. It's essential for project managers and stakeholders to prioritize clear communication and establish robust governance structures to ensure project success. | M |
| | Finding update: The divisions continue to collaborate on the security assessment exercise. The draft security assessment report is due in October 2024. | |

| Recommendations | Status |
|--|--------|
| Create a Governance Structure: Implement a governance structure that defines decision-making processes, escalation procedures, and accountability mechanisms. Clarify how decisions will be made, who has authority, and how issues will be resolved. | Open |
| Develop a Stakeholder Registry, RACI chart, and Stakeholder Engagement Plan: Identify key stakeholders and develop a plan to engage them throughout the project lifecycle. Tailor communication strategies to address the needs and preferences of different stakeholders, ensuring their active involvement and support. | Open |
| Clearly Define Roles and Responsibilities: Clearly outlining the roles and responsibilities of each stakeholder involved in the project, would ensure that everyone understands their duties and how they contribute to the project's success. | Open |

| Recommendations | Status |
|---|--------|
| Encourage Open Communication and Feedback: Foster a culture of open communication and feedback where stakeholders feel comfortable sharing their thoughts, concerns, and suggestions. Encourage constructive dialogue and actively seek input to improve decision-making and problem-solving. Keep stakeholders informed about project progress, milestones, and key developments through regular updates and progress reports. Highlight achievements, challenges, and any changes to the project plan or scope. | Open |
| Resolve Conflicts Promptly: Address conflicts and disagreements among stakeholders promptly and professionally. Encourage dialogue, active listening, and compromise to find mutually acceptable solutions that support project goals. | Open |
| Manage Expectations: Manage stakeholders' expectations by setting realistic timelines, budgets, and deliverables. Foster a culture of transparency about project constraints and risks and | Open |
| Evaluate and Adapt: Continuously evaluate the effectiveness of governance and communication processes and adjust as needed. Solicit stakeholders' feedback to identify areas for improvement and continuously refine your approach. | Open |

| # | Key Findings | Criticality Rating |
|-----|---|-----------------------|
| 45 | Preliminary Concern: The current process does not allow BHA to track actual costs versus budgeted costs for large functionalities such as Provider Portal and Maui Wildfire Communication. By incorporating a clear process that would allow BHA to monitor costs of large functionality, BHA could maintain better financial records, and it would allow BHA to track actual versus budgeted costs. Finding update: It is agreed that the project will report cases where the number of user story points (USPs) is going to exceed the budgeted number of user story points for "Big Rock" items such as Provider Portal and Maui Wildfire Communication. The process for reporting cases is being discussed and analyzed. | N/A |
| Rec | ommendations | Status |
| | Big Rock items such as Provider Portal and Maui Wildfire Communication, IV&V recommends the SI vendor ort cases when the number of USPs is going to exceed the budgeted number of USPs. | Open |
| IV& | V recommends that BHA Stakeholders evaluate process options and agree on a process that would allow A to track actual costs versus budgeted costs of large functionalities such as Provider Portal and Maui | Open |
| | fire Communication. | Ореп |

Resource Management

| # | Key Findings | Criticality Rating |
|----|--|-----------------------|
| 34 | Medium Issue: A shortage of BHA project resources could lead to reduced productivity and project delays. | M |
| 34 | Finding Update: DDD is finalizing the position description (PD) for the Business Analyst. BHA is finalizing contractual options to add an automated testing resource. | |

| Recommendations | Status |
|--|-------------|
| BHA should explore options for offloading project team members' daily responsibilities to other staff. | In Progress |
| BHA should work quickly to backfill vacated project team member positions. | In Progress |
| BHA should identify tasks and duties that they can ask the SI to assume, as permitted by the contract, which are presently being handled by BHA members. | In Progress |
| BHA should explore the use of contractors to fill open project positions. | In Progress |

| Defect Metrics | Understand and track the following: Defects by category (bug fixes) USPs assigned to defects in a release vs. USPs assigned to planned US in a release | July - There were no deployments in the month of July 2024. | N/A |

Note*: This defect percentage does not include defects under warranty that are assigned zero (0) User Story Points.

Appendix A: IV&V Rating Scales

Appendix AIV&V Rating Scales

This appendix provides the details of each finding and recommendation identified by IV&V. Project stakeholders are encouraged to review the findings and recommendations log details as needed.

- See Findings and Recommendations Log (provided under separate cover)
- IV&V Assessment Category Rating Definitions

The assessment category is under control and the current scope can be delivered within the current schedule.

The assessment category's risks and issues have been identified, and mitigation activities are effective. The overall impact of risk and issues is minimal.

The assessment category is proceeding according to plan (< 30 days late).

The assessment category is under control but also actively addressing resource, schedule or scope challenges that have arisen. There is a clear plan to get back on track.

The assessment category's risk and/or issues have been identified, and further mitigation is required to facilitate forward progress. The known impact of potential risks and known issues are likely to jeopardize the assessment category.

Schedule issues are emerging (> 30 days but < 60 days late).

Project leadership attention is required to ensure the assessment category is under control.

The assessment category is not under control as there are serious problems with resources, schedule, or scope. A plan to get back on track is needed.

The assessment category's risks and issues pose significant challenges and require immediate mitigation and/or escalation. The project's ability to complete critical tasks and/or meet the project's objectives is compromised and is preventing the project from progressing forward.

Significant schedule issues exist (> 60 days late). Milestone and task completion dates will need to be re-planned. Executive management and/or project sponsorship attention is required to bring the assessment category under control.

Appendix A

Finding Criticality Ratings

| Criticality Rating | Definition |
|-----------------------|--|
| B | A high rating is assigned if there is a possibility of substantial impact to product quality, scope, cost, or schedule. A major disruption is likely, and the consequences would be unacceptable. A different approach is required. Mitigation strategies should be evaluated and acted upon immediately. |
| M | A medium rating is assigned if there is a possibility of moderate impact to product quality, scope, cost, or schedule. Some disruption is likely, and a different approach may be required. Mitigation strategies should be implemented as soon as feasible. |
| L | A low rating is assigned if there is a possibility of slight impact to product quality, scope, cost, or schedule. Minimal disruption is likely, and some oversight is most likely needed to ensure that the risk remains low. Mitigation strategies should be considered for implementation when possible. |

Appendix B Inputs

This appendix identifies the artifacts and activities that serve as the basis for the IV&V observations.

Meetings attended during the July 2024 reporting period:

- 1. Daily Scrum Meetings
- 2. Daily Design Meetings
- 3. Twice Weekly RSM Issues Meeting
- 4. Weekly BHA-ITS Program Status Meeting
- 5. Bi-Weekly Check-in: CAMHD
- 6. Bi-Weekly Check-in: DDD
- 7. BHA (CAMHD & DDD) IV&V Joint Meeting
- 8. IV&V Draft IV&V Status Review Meeting with DOH
- IV&V Draft IV&V Status Review Meeting with RSM and DOH
- 10. DOH BHA IT Solution Project Steering Committee
- 11. US# Testing & Request Items
- 12. AER Analytics Kick-Off Meeting
- 13. AER Analytics: Discovery Meeting
- 14. AER Analytics Bi-weekly Meeting
- 15. Demo for Maui Wildfires Alerts

Artifacts reviewed during the July 2024 reporting period:

- 1. Daily Scrum Notes
- 2. Twice Weekly Issues Meeting Notes
- 3. Weekly BHA-ITS Program Status Report

| 33 | Finding Performance bottlenecks with the INSPIRE production environment may result in low productivity and poor user experience. | Performance issues have been identified that have the | Analysis and Significance Developmental Disability Division (DDD) personnel are encountering performance issues with re-assigning cases and opening the DDD – Contact Notes (Fiscal View – Complete) view. CAMHD has not reported performance issues. | Recommendation 1. The last performance test was executed in June 2023 for phase 3 releases (R3.x). *800+ new User Story Points (USPs) have been developed since the last performance test execution. IV&V recommends BHA execute a performance test during the development of R4.6 (planned completion 5/20/2024), identifying test cases and scenarios that include both DDD and CAMHD functionality, transactions/functionality that are performance intensive, e.g., calculator functionality. 2. Conduct load and performance testing for each release that has significant new features/functionality, e.g., calculator-related transactions. 3. Create a plan for comprehensive performance testing and address any performance bottlenecks. 4. Have the benchmark assessments done annually and implementation of Azure App Insights for Power Platform. 5. Execute test scripts that measure the run-time for execution of long-running transactions. E.g., calculator functionality/transactions and monitoring results over time. | 07/31/2024 - Microsoft executed the performance test Tuesday, 6/4/24, through Wednesday, 6/12/24; stakeholders expect Microsoft's performance test report in August 2024. Behavioral Health Administration (BHA) personnel reported no recent performance issues. 06/30/2024 - Microsoft executed the performance test from Tuesday, 6/4/24 – Wednesday, 6/12/24 - stakeholders are awaiting delivery of the report. 05/31/2024 - The performance test execution will commence on Tuesday, 6/4/24, and will end on Wednesday, 6/12/24. The scope of the performance test will align with the regression test cases. 04/30/2024 - BHA is continuing discussions with Microsoft regarding scope, schedule, and estimate of the effort and cost to execute the performance test, leveraging the existing Health Information Systems Office (HISO) contract with Microsoft. The plan is to execute the next performance test in June 2024. 03/31/2024 - To address the IV&V recommendation #1, BHA and the SI vendor are | Project Management | Issue | Priority Medium | Status Open | Closed Date | Identified Date 8/18/2023 | Owner Gautam Gulvady | |
| | | | | | having discussions to define scope, schedule, and to estimate the effort and cost to conduct a performance test prior to R4.6 implementation on 5/30/24. The plan is to execute the test in May 2024. BHA plans to leverage the existing | | | | | | | | |
| 34 | Snortage or senavioral neatin Administrator (BHA) project resources could lead to reduced productivity and project delays. | Key BHA project resources have reported constraints on how much time they can devote to the project. The departure of the Child and Adolescent Mental Health Division (CAMHD) System Management Office Manager and CAMHD Inspire Project Lead could further impact the project if DOL cannot acquire suitable resources. The lack of capacity of the DOH tes script developer has slowed DOH's automated test script development. | If BHA is unable to fully staff the project and their existing resources continue to be constrained, the project could experience a reduction in productivity and project delays. | 1. BHA should explore options for offloading project team members' daily responsibilities to other staff. 2. BHA should work quickly to backfill vacated project team member positions. 3. BHA should identify tasks and duties that they can ask the SI to assume, as permitted by the contract, which are presently being handled by BHA members. 4. BHA should explore the use of contractors to fill open project positions. | description (PD) for the Business Analyst. | 35 | to clutter and reduce Azure DevOps | R3.33 work started, and the SI vendor was working with BHA on the Statement of Work (SOW). BHA made the decision not to implement R3.33 and moved on to the next big phase of work, starting with R4.1. Project team members will see some references to R3.33 in Azure DevOps, which are incorrect and should be updated to R4.1 or an appropriate future release. There is still cleanup happening for items that are in the parking lot, which may state R3.33 until those items are assigned to a release. | be implemented in Rx.y, monitor and measure the team's effectiveness (trending as improvements, e.g., fewer post- | | tags used in Azure DevOps and cleaning up the Azure DevOps environment is an ongoing process. E.g., some post-production bugs are tagged "Post Go-Live Bug" with tags for the appropriate release(s). IV&V will monitor the progress. 02/29/2024 - Standardizing (ongoing process) tags used in Azure DevOps and cleaning up the Azure DevOps environment are ongoing. E.g., post-production bugs are tagged "Post Go-Live | Project Management | Preliminary | N/A | Closed | 4/30/2024 | 8/2/2023 | Gautam Gulvady | |
| 36 | Lack of a comprehensive project schedule could lead to missed tasks, project delays, and cost overruns. | Project work is ongoing without a project schedule in place. Some current project work is considered Maintenance and Operations, but there is new work to be completed as well. | Project work is ongoing without a project schedule in place. Some current project work is considered Maintenance and Operations, but there is new work to be completed as well. | 1. Establish a clear project schedule management plan that outlines roles, responsibilities, and accountability for schedule adherence. 2. Create and baseline a comprehensive project schedule in MS project, Smartsheet, or a similar tool, containing tasks for both SI vendor and State, task dependencies, and resourcing. 3. Implement regular schedule reviews and updates to ensure alignment with project objectives and milestones. | 07/31/2024 - The SI Vendor submitted a draft AER Analytics project schedule on 7/3/24, which BHA and IV&W personnel are reviewing. The draft project schedule appears incomplete, e.g., it has a "TBD" for one of the testing tasks, and some resource/owner information is missing. The project has completed the discovery phase, and the design phase is ongoing. 06/30/2024 - The Adverse Event Report (AER) Analytics project kicked off on 6/4/24. The Discovery phase of the AER analytics project is progress. The SI vendor has provided a highlevel timeline but has not yet provided a project schedule. There is uncertainty around receiving timely information from MedQuest, which will likely impact the completion of the project schedule. 05/31/2024 - The Analytics project kickoff meeting is scheduled for 6/4/24. The Discovery phase of the Adverse Event Report (AER) analytics project is on-going. The project schedule for the Analytics project is expected to be delivered shortly after the project kick-off. 04/30/2024 - The Data Exchange Agreement (DEA) between DDD and MQD is being finalized. BHA plans ito commence the Analytics project in June 2024 once the DEA is executed. 03/31/2024 - The Data Exchange Agreement (DEA) between DDD and MQD is being finalized. BHA plans ito commence the Analytics project in June 2024 once the DEA is executed. | | Issue | Medium | Open | | 8/29/2023 | Gautam Gulvady | |

| technical e continue to challenges, production | going deployment processes and execution issues, the Project may o encounter defects and 6, e.g., when releases are in no ri meeting projected timelines tition and non-production nts. | Several post-production bugs have been encountered in the Phase 4 release, R4.4. | Regarding the bug, "Human Services Research Institute (HSRI) flow is failing in production" (bug# 34886 https://dev.azure.com/DOHBHA/DOH%20BHA%20INSPIRE/_wor kitems/edit/34886), what is in development and deployed is vastly different from what was deployed to production. The root cause for these errors is currently being investigated. Repeatable documented release and deployment and resources experienced with deployments will help ensure that mistakes are minimized and that functionality is not mistakenly deprecated when deployments take place. | improved collaboration and rellability, scalability, version control integration, and rollback capability. 2. Ensure there are adequate and qualified resource to support the current deployment processes. This may require the support from RSM resources to provide assistance and knowledge transfer for some of the more complex deployment components. 3. As appropriate, consult with RSM on best practice that BHA could employ to support deployment. | defects (4 high and 2 medium priority), one (1) defect was determined to be deployment-related and one is a Microsoft defect. The root cause analysis (RCA) for the other defects is yet to be completed. CAMHD Provider Invoice Batch Printing was deployed to production on 06/05/24. A Mid-Sprint-Deployment (MSD) comprised of the Maui Wildfire set of | Release/Deployment Planning | Issue | Low | Open | | 1/25/2024 | Gautam Gulvady | |
| | | | | 4. Request the assistance of the RSM Solution Architect in reviewing and correcting issues associated with the consistency of configurations across environments, ensuring that the test environment is capable of testing ALL functions of any given release without the need for using multiple test environments. 5. Request the assistance of the RSM Solution Architect in review of deployment scripts as a double check for accuracy and completeness prior to commencing deployment activities. 6. The Project Team should consider evaluating potential changes to improve/enhance existing processes and communications to address current release/deployment shortfalls. | not able to generate authorizations set to a one time recurrence(a hot-fix was deployed on Friday, 5/31/24) and there are two (2) other post-production bugs. It is yet to be determined if all three post-production defects are deployment-related. IV&V will monitor the progress and quality of the R4.6 deployment. Fast Health Interoperability | | | | | | | | |
| poor-qualit | t testing processes can lead to ty software, project delays and user acceptance testing. | There is a limited understanding of the testing processes and the roles and responsibilities of those involved in the process. There is no formal process for the development, review, and approval of test scenarios, test cases, and test results to ensure adequate participation and approval from state staff. | When testing user stories 34564 and 34756 on 1/31/24, the test tasks did not reflect the real use cases to give stakeholders adequate confidence that the user story could be tested. As a result, time was expended by testing resources, testing was inadequate, and a user story may have been deemed to meet functionality when it did not. | 7. IV&V recommends performing an RCA in 1. Identify stakeholders (output is stakeholder register) and develop a RACI matrix for testing. 2. Review the overall testing process and implement any needed improvements identified. | Resources (FHIR) Release 4.0.1 end-to-end 07/31/2024 - IV&V shared the Stakeholder Register and RACI templates (based on best practices) with BHA in May 2024. BHA is working to populate information in the Stakeholder Register and RACI matrix. 05/31/2024 - IV&V has shared Stakeholder Register and RACI templates (based on Best Practices) for BHA to populate. 03/31/2024 - No new update. 03/31/2024 - CAMHD is populating the stakeholder registry and the RACI matrix to address adequate statewide participation and engagement in the testing process. 02/29/2024 - CAMHD is developing a Stakeholder registry and RACI matrix to address adequate statewide participation in the testing process. 02/29/2024 - CAMHD is developing a Stakeholder registry and RACI matrix to address adequate statewide participation in the testing process. 01/31/2024 - When testing user stories 34564 and 34756 on 1/31/24, the test tasks did not reflect the real use cases to give stakeholders adequate confidence that the user story could be tested. | | Issue | Medium | Open | | 1/31/2024 | Gautam Gulvady | |

| 441 | The absence of separate dedicated product backlog review meetings can lead to unclear priorities, misalignment with stakeholders, inadequate refinement, and increased risk of scope creep. | Currently, product backlog reviews are done during design meetings and/or weekly issues meetings. This can lead to, e.g. scattered focus, limited stakeholder engagement, difficulty in managing complexity, and delayed decision making. | where the Scrum team, including the Product Owner, Scrum Master, and development team members, inspect and adapt the product backlog. The product backlog review is an important Scrum ceremony that helps keep the backlog relevant, up-to-date, and aligned with the project's goals and priorities. Here's a summary of what typically happens during a product backlog review: 1. Inspecting Backlog items: The team reviews the items on the product backlog. This involves discussing each item, understanding its priority, value, and acceptance criteria. 2. Ensuring clarity: The team ensures that each backlog item is clear and well-understood. Any ambiguities or uncertainties are clarified at this stage. 3. Estimation: Estimation of backlog items may occur during the review. The team may use techniques like story points or relative sizing to estimate the effort required for each item. 4. Re-prioritization: Based on new insights, changes in requirements, or stakeholder feedback, the team may need to re prioritize items in the backlog. 5. Removing or Adding Items: Items that are no longer relevant or necessary may be removed from the backlog. New items that emerge or are identified as important may be added. 6. Refinement: Backlog refinement may also occur during the | would allow the project team to avoid situations where decisions about including items mid-sprint would have to be taken. | Register and RACI templates (based on best practices) with BHA in May 2024. BHA is working on populating the Stakeholder Register and RACI matrix. The SI vendor demonstrated the Maui Wildfire communication functionality to stakeholders on 7/9/24, and it seemed productive. The date for the FHIR demo is yet to be finalized. Although this is progress, the project is yet to demonstrate regular demos as part of the Sprint Review. 06/30/2024 - IV&V has shared the Stakeholder Register and RACI templates (based on best practices) for BHA to populate. Once the stakeholder registry and the RACI matrix are finalized, BHA plans to schedule product backlog review meetings. There are no new updates for the June reporting period. 05/31/2024 - IV&V has shared a Stakeholder register and RACI templates (based on Best Practices) for BHA to populate. Once the stakeholder register and RACI templates (based on Best Practices) for BHA to populate. Once the stakeholder registry and the RACI matrix are finalized, BHA plans to schedule product backlog review meetings. | Sprint Planning | Risk | Medium | Open | | 1/26/2024 | Gautam Gulvady | |
| 42 | Effective governance and communication is | Lack of effective governance and communication among | review. This involves breaking down large items into smaller, more manageable ones, or adding more detail to items as needed. 7. Collaboration: The review is a collaborative effort involving the entire Scrum team. It's an opportunity for open discussion and sharing of ideas to ensure everyone is aligned on the goals and priorities. Ineffective governance and communication among stakeholders | IVV recommends considering the following | 04/30/2024 - BHA plans to populate the stakeholder registry and the RACI matrix to have adequate statewide participation and engagement in product backlog review meetings. Once the stakeholder registry and the RACI matrix are finalized, BHA to schedule product backlog review meetings. 07/31/2024 - The divisions continue to | | Issue | Medium | Open | | 2/29/2024 | Gautam | |

| 43 | Execution time for the process for updating DDD SharePoint folders was unacceptable. | The existing DDD SharePoint documents and folders update process is intensive and the execution time was unacceptable-this process took 11 calendar days to execute in production with R4.4. | This process is part of several intense processes that update SharePoint documents and folders. The SI vendor recommended against doing this intensive process. However, no feasible alternative solutions were provided and this process was implemented. BHA has the flexibility to refine and alter their SharePoint directory structure. As a result, per the SI vendor, the process does not pick up continuously evolving permutations of folder structures in Production, nor can the execution time be estimated or benchmarked. Per discussions between the SI vendor and BHA over many months, this process was not going to complete 100% of the operations because of the different folder structures in Production. And this process/jobs has been updated many times to address different folder structures that were captured during testing, but there is no guarantee that it covers every possible scenario - some operations failed because the folder structure was not encountered during testing, which was an expected event. The folders in Production that were not picked up with Flow were supposed to be manually updated. The current solution utilizing Power Automate provided the necessary steps to automate this process, but it was never going to capture 100% of folders. And the process took 11 calendar days to execute in production. | IV&V recommends doing an impact analysis, e.g., downstream impact. IV&V recommends DDD puts on hold any development utilizing Power Automate for the performance issue encountered in production (marked "TBD" in finding #14 related to "SharePoint Bulk Flows still running"), related user stores, e.g., "Changes to DDD folders", and defects. IV&V recommends evaluating other feasible options, e.g., leveraging SharePoint tools and best practices. A project issue should be opened to identify and manage the resolution of this issue. | 07/31/2024 - The SI vendor and BHA finalized the Business Requirements Document (BRD). A new User Story has been created in Azure DevOps to commence design and development. 06/30/2024 - The SI vendor and BHA are finalizing the Business Requirements Document (BRD) and the design of the proposed solution. 05/31/2024 - The SI vendor has engaged a SharePoint Subject Matter Expert (SME) and is currently analyzing options. 04/30/2024 - Finding identified by IV&V. | Release/Deployment Planning | Issue | Medium | Open | | 4/30/2024 | Gautam Gulvady | |
| 44 | Delays in the posting of administrative claims are negatively affecting reimbursements. | BHA has discovered delays in the posting of administrative claims as far back as three years. | These claims with delayed posting are eligible for a 90%/10% match from CMs. There are delayed payments identified as far back as three years, which caused claims to be filed in later years. These claims draw from the raw budget in the year they are filed. This affects reimbursements and could potentially delay the submission of IAPDU-7, which could impact funding. | BHA should continue research of this issue with MedQuest and PCG to identify any needed corrections. BHA to present any needed corrections to CMS. | 07/31/2024 - To address the delayed claims postings, there has been improved coordination and communication with all involved parties. Based on the improved process, this Preliminan Concern will be closed. 06/30/2024 - Improved coordination and communication with all involved parties are needed to address the delayed claims postings. 05/31/2024 - BHA met with CMS and MedQuest to discuss an approach forward. Funds can not be added to a year once it has closed. BHA will request additional funds for FY24 to account for the claims that have posted late. | | Preliminary Concern | N/A | Open | | 4/30/2024 | Gautam Gulvady | |
| 45 | The current process does not allow BHA to track actual costs versus budgeted costs by feature/functionality. | The current invoices from the System Integrator (SI) vendor lack sufficient details that would allow BHA to track actual costs versus budgeted costs by, e.g., features such as Provider Portal, Maul Wildfire Communication, FHIR and Golden Record or by user story. | The current process does not allow BHA to track actual costs versus budgeted costs of large functionality such as Provider Portal, Maui Wildfire Communication, Fast Health Interoperability Resources (FHIR) or the Golden Record (GR). The absence of a clear process doesn't give insight into, e.g., how much of the budget has gone into developing functionality such as Provider Portal, Maui Wildfire Communication, FHIR or GR functionality. By incorporating a clear process that would allow BHA to monitor costs of large functionality, BHA can maintain better financial records and it would allow BHA to track actual versus budgeted costs and answer questions, e.g., "how much money has been spent on developing Provider Portal, Maui Wildfire Communication, FHIR or Golden Record (GR) functionality?" | IVV recommends that BHA Stakeholders should evaluate process options and agree on a process that would allow BHA to track actual costs versus budgeted costs of large large functionalities such as Provider Portal, Maui Wildfire Communication, FHIR and Golden Record. IV&V recommends that BHA stakeholders agree on the level of granularity, e.g., by user story or functionality, that would allow stakeholders to have reliable answers to important questions such as how much money has been spent on developing Provider Portal, Maui Wildfire Communication, Fast Health Interoperability Resources (FHIR) functionality or Golden Record (GR) functionality or on developing specific user stories. | points (USPs) is going to exceed the budgeted number of user story points for "big rock" items such as Provider Portal and Maui Wildfire Communication. The process for reporting case is being discussed and analyzed. 06/30/2024 - BHA Stakeholders plan to evaluate process options. See new IV&V | | Preliminary Concern | | Open | | 5/25/2024 | Gautam Gulvady | |
