Aloha Senate President Kouchi, Speaker Nakamura, and Members of the Legislature:

Pursuant to HRS section 27-43.6, which requires the Chief Information Officer to submit applicable independent verification and validation (IV&V) reports to the Legislature within ten days of receiving the report, please find attached the report the Office of Enterprise Technology Services received for the State of Hawai'i, Department of Transportation, Highways Division, Financial Management System Project.

In accordance with HRS section 93-16, this report may be viewed electronically at <http://ets.hawaii.gov> (see "Reports").

Sincerely,

A handwritten signature in blue ink, appearing to read "Christine M. Sakuda".

Christine M. Sakuda  
Chief Information Officer  
State of Hawai'i

## I. Introduction and Summary

### A. Introduction

Department of Transportation Highways (DOTH) manages the planning, construction, and maintenance of the State of Hawaii's approximate 2,675 lane miles of highway on Oahu, Kauai, Maui, Lanai, Molokai, and Hawaii. DOTH's mission is to provide a safe, efficient, and accessible highway system through the utilization of available resources in the maintenance, enhancement, and support of land transportation facilities. DOTH's primary function is to plan, design, and supervise the construction and maintenance of the State's highway system.

DOTH commissioned an ERP System Integrator (hereinafter referred to as "SI"), in March 2021 to provide an accounting system solution that would modernize certain State of Hawaii, Department of Transportation, Highways Division (DOTH) IT systems, associated systems, and business processes, including fully replacing DOTH's legacy Highways Financial Accounting System (HWYAC) and certain software components of DOTH Districts' AS400 systems.

The new DOTH Financial Management System (H4) will utilize SAP S/4HANA Cloud ERP and will cover DOTH Business Processes of Budget, General Ledger, Accounts Payable, Accounts Receivable, Lease Management, Fixed Assets, Procurement, Project & Grant, Federal Billing, Human Resources, Time and Labor, Payroll, Inventory Management, Plant Maintenance, Reporting, and Analytics.

DOTH acquired a contract with IT Management Consulting Firm, Ohanasoft to create and publish the IV&V Report until April 2025. A new IT Management Consulting Firm T2F, LLC will be continuing to provide information technology independent verification and validation consulting services for the implementation of the DOTH Highways Financial Management System. The IV&V contractor's role is to provide an objective, neutral, third-party view of the implementation of the Highways Financial Management System with the intent of protecting the State's interests for success of the project. Throughout the system implementation, the IV&V team will perform ongoing project IV&V activities and will identify issues/deficiencies/risks with the System implementation project, provide feedback and recommendations for mitigation and improvement, and provide on-going reporting on project activities.

The observation, feedback, and recommendations provided by IV&V are IV&V's own opinions, and IV&V is not a decision-maker of any activities in the H4 project implementation. IV&V makes no assurance, guarantee, or other promise as to the success of H4 project and is not responsible and not liable for the outcome of the H4 Project.

## B. Summary

In January 2026, the H4 implementation involved further discussions across all modules and dedicated in-depth CRP sessions for the modules that were still incomplete. In January 2026, total number of meetings compared to the previous month's reporting period is more. The resubmitted Project Plan is still under review and discussion. While the total number of FSD submissions remained unchanged in January, WRICEF development advanced, and additional areas are now ready for testing, according to the System Integrator (SI). We do not have a confirmed Go-Live date as of January 2026. IV&V considers this target ambitious and, given the current project pace, recommends establishing a more realistic Go-Live date that aligns with the project's status. Additionally, more resources must be made available to move forward effectively. The H4 project has been without a formally approved Project Plan since the start of implementation, which impacts overall project alignment and execution. A well-structured Project Plan would serve as the backbone of any successful project, providing clear direction, aligning goals, and ensuring every objective is met with precision and efficiency.

The same challenges persist into this month: a lack of an agreed-upon and approved project plan and the lack of a realistic and firm Go-Live date, the backlog of pending deliverables, the lack of knowledge transfer/training for H4 and WRICEF developments, the ongoing need to update Process Design Documents (PDDs) due to additional detailed discoveries of the business processes that will impact system configuration, the unavailability of a full time dedicated Financial/Integration role, and the need to dedicate additional time to the re-discovery of DOTH requirements and processes as new consultants or reassigned consultants must spend substantial time understanding DOTH business needs due to the departure of previous consultants.

CRP sessions continued this month for the remaining modules. A few areas were not completed, and some modules will need to be revisited; as a result, sessions will continue into Feb 2026. SI-planned CRP sessions have been conducted, and there are outstanding CRP FAQ documents that are being reviewed and discussed. As stated in prior reports, due to question and discussion points arising from CRP sessions, IV&V expects that CRP sessions may require additional time. SI suggests that CRP sessions are completed in a few modules, however DOTH is also concerned with the thoroughness and completeness of the requirements coverage and functionalities demonstrated in the CRPs. CRP sessions are crucial for familiarizing DOTH with the H4 system, providing insights into its solution design, functionality, and operational procedures. The H4 Project Team is encouraged to continue maintaining a strong emphasis on aligning CRP sessions with DOTH-specific requirements and business processes. The CRP sessions should focus on demonstrating solutions for DOTH's unique needs over basic walk-throughs of generic SAP processes or standard system features. CRP sessions are priority and comprehensive to insure DOTH understanding of the solution and end to end processes

According to CRP Deliverable Expectation Document (DED) acceptance criteria, WRICEF (Workflows, Reports, Interfaces, Conversions, Enhancements, and Forms) items should be part of CRP sessions. Based on the CRP DED, CRP should include the presentation and demonstration of prototypes with all standard and WRICEF developments mapped to the Requirements Traceability Matrix (RTM) and Process Design Documents (PDD). Unfortunately, there are still various WRICEF items in development with some of them requiring additional analysis and discussion. There are renewed efforts to further develop remaining WRICEF items, and it is encouraged to continue to develop concurrently with CRP sessions to prevent further delays. As it stands, the status has created added complications, impeding the successful completion of CRP sessions in a timely manner and with the required level of detail needed for this project.

This month, interactions and communication between modules have continued intermittently, as needed, rather than in a structured and consistent way. The current solution footprint involves a complex data flow between modules, and it is critical that all components integrate seamlessly to support DOTH

business processes effectively. For instance, FHWA requirements involve multiple business functions, including non-labor processes such as Purchase

Requisitions, Purchase Orders/Contracts, AP Invoices, AP Payments, FAMIS Interface, and labor processes such as Human Resources, Time Sheets, Hawaii Information Portal (HIP) Interface and Payroll, as well as FHWA Billings, Reimbursement Receipts, and Cost Distributions. It is important to identify a resource who recognizes this complexity and can coordinate integrating multiple modules and bridging the various business domains needed to satisfy DOT's comprehensive requirements, including coordination of consultant activities, dispute resolution, and formulation of optimal solution designs. More active involvement from SI would greatly benefit the H4 Project by coordinating daily project management to strengthen communication, streamline information sharing, organize resource management, and encourage teamwork among consultants. Proactive SI project management would greatly alleviate some of the continuously observed challenges due to isolated work practices.

Although CRP sessions are generating FAQ documents, formal documentation, such as meeting minutes, has not been produced from other regular weekly meetings. Some CRP sessions have also experienced delays in producing FAQ documents. Utilizing meeting minutes and documentation would enhance clarity, ensure follow-through on action items, and contribute to more productive discussions and decision-making processes throughout H4 implementation. The consequences of low meeting documentation and sole reliance on recorded sessions have become more apparent when difficulties arise during information hand-off or knowledge transfer for new H4 Project Team members joining the project. As a result, project progress is delayed while the whole discovery and explore process is repeated for new team members. This repetition significantly diminishes the momentum and morale of the H4 Project Team. IV&V recommends documenting discussions and meeting minutes with actionable tasks on a centralized platform such as Teams or H4 CALM. This would streamline project execution, prevent miscommunication, foster accountability among team members, and ensure all critical information is easily accessible to everyone. Formal documentation would make mark a significant step toward improving project management and overall progress.

There were no Functional Specification Documents (FSDs) specific meetings in December; however, FSD-related activities and discussions continued to take place during regular meetings for some modules or during their respective CRP sessions or general module sessions. As of the end of January 2026, there has been no change in FSD submission since April 2025. Out of 200 FSDs, 140 have been submitted for review, with DOTH conditionally approving 113. It is important to continue moving forward with remaining FSDs and document all functional specifications to align with DOTH requirements to ensure CRP sessions encompass FSDs and make progress with the overall Project timeline objective.

Configuration Design Document (CDD) and the Functional Specification Document (FSD) are now conditionally approved. Several CDD review activities have resumed, and multiple corrected CDDs have already been submitted, and approved by DOTH. Originally, CDDs were scheduled for review only after their corresponding FSDs were completed. However, the approach has now changed. It is recommended that the Department of Transportation and Highways (DOTH) and the System Integrator (SI) conduct concurrent reviews and validations of CDDs alongside FSDs. This change supports more efficient progress and aligns with CDD's role in defining the configuration of standard functions required to establish the system baseline. Since CDDs address over 480 requirements in Wave I—approximately 55 percent of the total Wave I scope—they can be advanced without depending on WRICEF completion. As a result, finalization of FSDs is no longer a prerequisite for continued work on CDDs. The Knowledge Transfer (KT) tracking document has been submitted and is being discussed. This document identifies and outlines areas or requirements that a specific DOTH resource will need to be familiar with and where they should receive training. DOTH and SI are working to reconcile the differences between the old and newly submitted versions to ensure that all information is adequately covered in detail. SI states that they are preparing training materials for KT.

To date, there have been no DOTH-specific KT or training sessions provided at the level of detail DOTH needs to acquaint themselves with H4 functions and processes. Additionally, no structured training materials tailored to DOTH have been provided at all; training materials would significantly benefit DOTH team members in becoming familiar with H4 functions and enhancing their skills with the new system. While CRP sessions may facilitate some informal knowledge transfer, it is essential to have formal KT/Training equipped with reference materials that DOTH team members could use for thorough self-training and knowledge retention. A lack of training and materials remains a project risk, significantly impacting DOTH team members' ability to engage in meeting discussions and contribute to H4 Project goals. Creating and delivering comprehensive training sessions and materials to help DOTH effectively adapt to the new system will greatly enhance the project's progress.

The H4 system, now equipped with basic functionalities across various modules, is prepared for exploration and system familiarization by the DOTH team. DOTH team members are encouraged to explore the H4 system using the limited but available documents and materials, such as CRP scripts, cheat sheets, and other relevant resources. These documents are not intended to cover full use cases or serve as training materials; however, taking this proactive approach will not only speed up the knowledge transfer process guided by SI but also empower team members to gain hands-on familiarity with the H4 system at a faster pace. Furthermore, it will allow DOTH to identify specific areas where additional support or guidance from SI is likely needed, and with this feedback it will allow smoother and more effective KT and project team training that when KT sessions eventually take place.

Following the completion of CRP and KT sessions, unit testing is scheduled to take place, divided into three distinct sessions according to the approved change order: standard functionality, WRICEF, and End-User Roles and Authorizations. Each of these components will be tested independently at different times. However, this fragmented approach may introduce inefficiencies, necessitate retesting, and increase the risk of overlooking critical requirements. It is essential to ensure that the H4 system fully meets all specified requirements, whether they pertain to WRICEF or standard functionalities. To mitigate these risks, DOTH and SI should collaborate closely in planning and executing unit testing. A comprehensive functional and technical testing plan, aligned with all business processes and the requirements outlined in the RTM, is recommended to ensure thorough validation of all functionalities.

As most meetings are now held online via Teams and project timeline extensions persist, the H4 Project Team is encouraged to focus on interactive discussions, Q&A sessions, and real-time feedback during CRP sessions and other meetings. Additionally, increasing the frequency of onsite meetings could strengthen team connections and energize collaboration. These efforts would foster a more interactive and productive environment, driving faster and more effective project progress. By the end of 2027, SAP will phase out mainstream maintenance for SAP Solution Manager and SAP Process Integration (PI) and Process Orchestration (PO), replacing them with SAP Cloud ALM (CALM) and SAP Integration Suite, respectively. Therefore, DOTH requested these upgrades to comply with the contractual terms of replacing obsolete software and to avoid any additional costs and efforts in the future. SI agrees with the CALM upgrade. Change order # 9 for CALM and Change order # 19 to replace PI/PO with BTP/IS have been approved. All Interfaces must be migrated to BTP/IS prior to unit testing as per the Change Order #19.

For the H4 general upgrade to the current version is 2020, SI has recommended deploying the most stable version 2023 to meet DOTH's functional and technical needs and ensure compatibility with other components in the H4 system. SI stated that this upgrade will occur after CRPs are completed and before KT and testing begin. IV&V recommends that the system upgrade should happen before the end-to-end CRP. Conducting end-to-end CRP in the upgraded system will eliminate downstream pitfalls and deliver a reliable, upgraded system that aligns with the project's broader goals for a seamless transition.

II. IV&V Dashboard

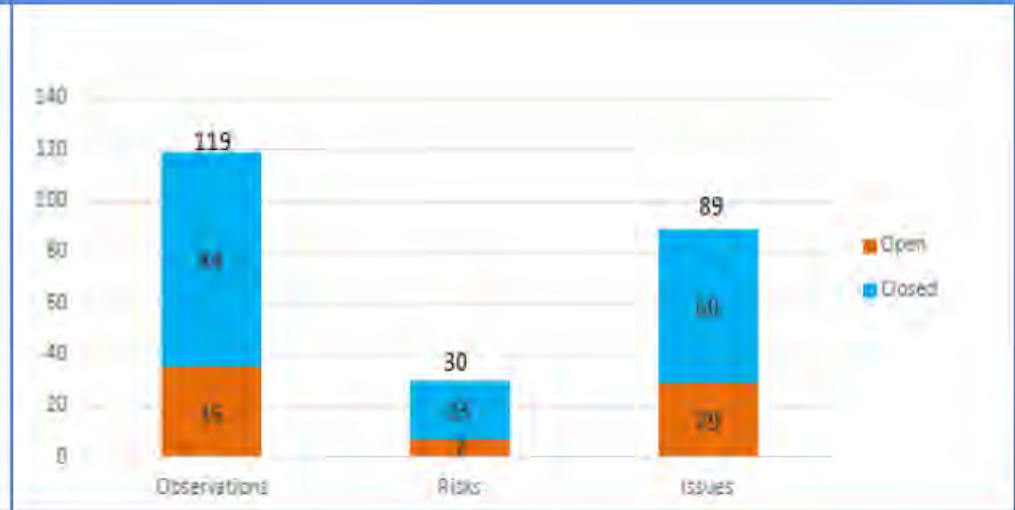

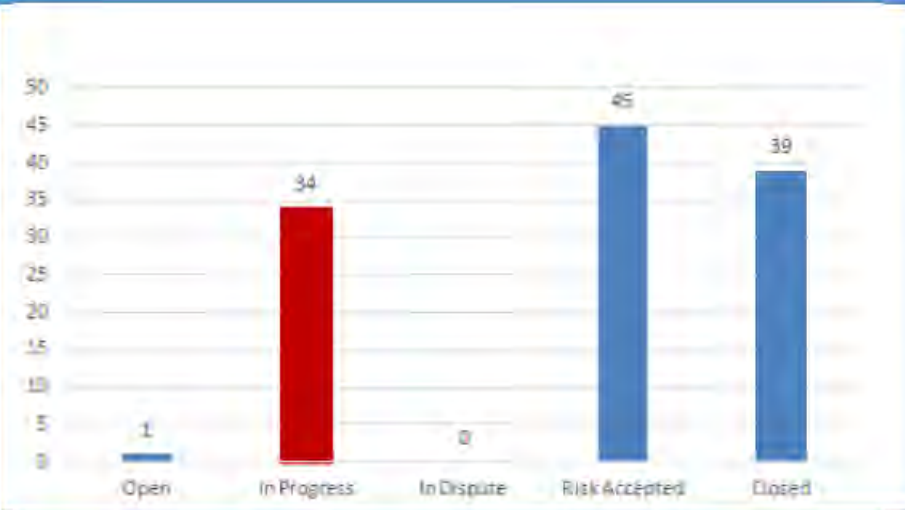

A. Subject Category

| IV&V Dashboard – Subject Category |  |            |            |
|-----------------------------------|--|------------|------------|
| Subject Area                      | Subject Category   | Impact     |            |

B. Observation, Risk, Issues, Subject Category

**IV&V Dashboard – Observation, Risk, Issues, Subject Category**

**Number of Total Observation, Risk, and Issues**      **Number of Observation, Risk, and Issues by Status**

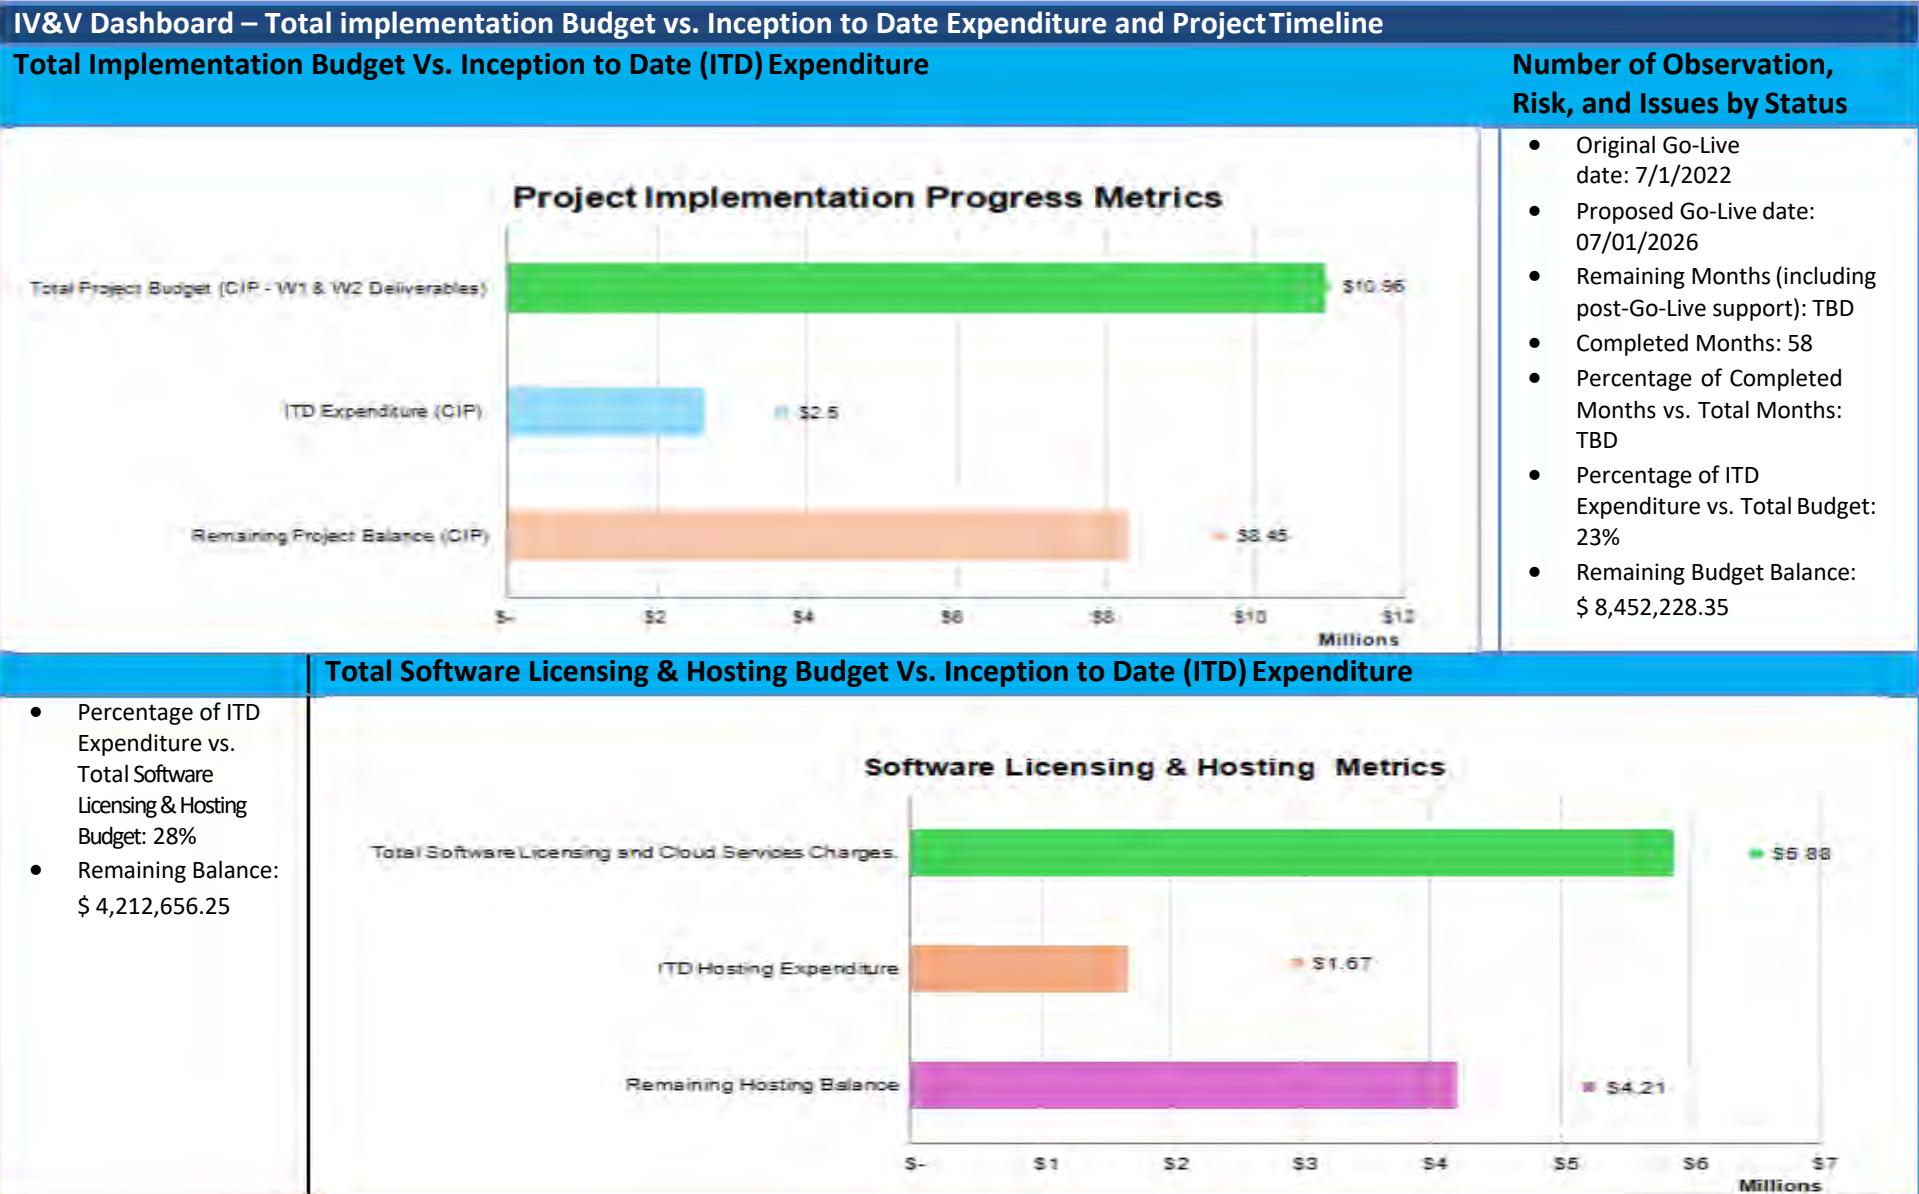

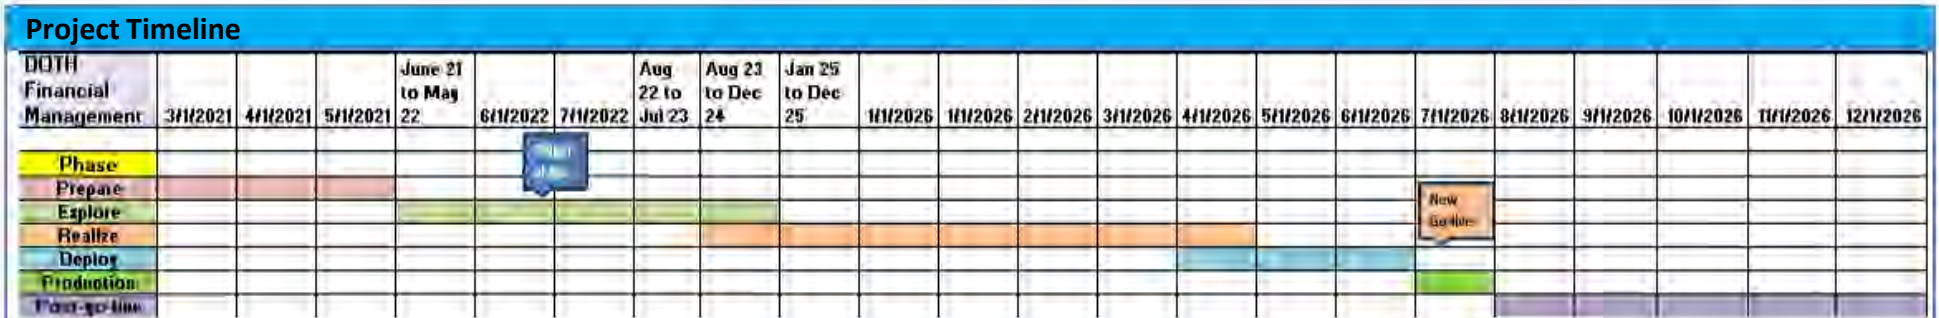

**Number of Observation, Risk, and Issues by Subject Category**

Section: IV&V Dashboard

C. Total Implementation Budget (CIP-W1 & W2 Deliverables) vs. Inception to Date Expenditure (CIP), and Total Software Licensing & Hosting Budget vs. Inception to Date (ITD) Expenditure, Project Timeline

H4 is currently in the Realize Phases. Various Realize Phase activities are ongoing, and Wave 2 activities are on hold until the Wave 1 Project Plan is completed.

- Prepare Phase: Define Strategy, Project Initiation, Project Standards, Technical Requirements.
- Explore Phase: Business Workshops and Requirements, Fit-Gap Analysis, Technical Solution Design, Testing Strategy, Training Strategy
- Realize Phase: Functional Specification, Organization Alignment, Knowledge Transfer, Build, Development, Unit Test, Integration Test
- Deploy Phase: Support Plan, Training Delivery, Cutover Plan, User Acceptance, Simulations, Go/No-Go Decision
- Production: Cutover, Go-Live, Hypercare Support, Transition to Operations, Project Closeout

III. IV&V Findings – Observations, Risk, Issue and Feedback/Mitigation

A. Subject Category: Schedule Management / Project Plan

**Schedule Management: Observation, Risk, Issue and Feedback/Mitigation**

**Issue**

**Impact**

**ORI ID: I-210531-02**

The final Project Plan/Implementation Schedule has not been approved by DOTH, and the deliverable is not completed. This is a foundational document for a project management and scheduling, and it is one of the most critical deliverables. Delay in the Project Plan and Implementation Schedule pose decreased confidence in being able to manage project resources efficiently and meet the final Go-Live date. Also, without the Project Plan and the Implementation Schedule DOTH has limited project visibility and it will impact schedule and resource management, and contract management. It is currently unknown, at a detail level, if the number of resources is adequate to complete the project on schedule. Earlier versions of the Project Plan were not accepted partly because of oversubscribed resources and incorrect dates (i.e., one consultant or DOTH team member working more than 40 hours in a week, etc.)

**Feedback/Mitigation/ Updates**

It is recommended that SI complete Project Plan/Implementation Schedule as soon as possible.

Project Plan/Implementation Schedule Submission History:

11/16/2020, 12/21/2020, 4/26/2021: The initial project plan was submitted and returned to SI after DOTH review due to incompleteness.

6/3/2021: The New Target Date for Project Plan/Implementation Schedule is set to 6/11/21 by SI.

6/14/2021: Updated project plan was submitted by SI but returned to SI due to incompleteness.

7/1/2021: It is currently unknown, at a detail level, if the number of resources is adequate to complete the project on schedule. Earlier versions of the Project Plan were not accepted partly because of oversubscribed resources and incorrect dates (i.e. one consultant or DOTH team member working more than 40 hours in a week, etc.). Updated project plan was submitted by SI but returned to SI after DOTH review due to incompleteness. Revised Acceptance Date: 8/31/2021

9/02/2021: No updates have been submitted to DOTH.

9/16/2021: DOTH interviewed an assistant project manager candidate on 9/7/2021.

9/30/2021: No updates have been submitted to DOTH.

10/5/2021: SI Assistant Project Manager submitted the revised project plan. DOTH has a meeting with the SI Assistant Project Manager and requested a revision due to the project plan being incomplete.

10/13/2021: SI Assistant Project Manager submitted the revised project plan and DOTH will hold a review meeting on 10/22/2021.

10/25/2021: DOTH had a meeting with the SI Assistant Project Manager to review Project Plan/Implementation Schedule. Progress has been made, however some data such as the dates and % completion need to be corrected.

11/10/2021: SI Assistant Project Manager submitted the revised project plan and DOTH will hold a review meeting on 11/24/2021.

11/24/2021: SI Assistant Project Manager and DOTH Project Manager worked together via Teams and updated and fixed the Project Plan. There will be a follow up meeting.

12/31/2021: SI Assistant Project Manager and DOTH Project Manager worked together via Teams and updated and fixed the Project Plan. It is still not complete.

1/31/2022: No new major update. The document is making incremental progress; however, it is not completed

yet. 2/28/2022: No new major update. It is still incomplete.

3/31/2022: The Assistant Project Manager left H4 implementation project. The Project Manager will continue to work on Project Plan/Implementation Schedule.

4/29/2022: No major updates. A new Go-Live date will be set after PDDs are approved by DOTH.

5/31/2022, 6/30/2022, 7/31/2022: No major updates.

8/31/2022: The new assistant project manager will be revising Project Plan/Implementation Schedule with updated Go-Live Date of 7/1/2023. 9/30/2022: No major updates.

10/31/2022: It is recommended that SI complete the Project Plan/Implementation Schedule as soon as possible since the absence of the Project Plan/Implementation

**Schedule Management: Observation, Risk, Issue and Feedback/Mitigation**

Schedule prevents from proper resource planning, meeting schedules, and integrated solution development and this causes issues and inefficiency. The project meetings are not being held cohesively, and the project focus is scattered.

11/30/2022: It was expected that after the new Go-Live date was set a revised Project Plan/Implementation Schedule would be prepared, however there is no update to the Project Plan. It is recommended that SI complete the Project Plan/Implementation Schedule as soon as possible. 12/31/2022: Project Plan/Implementation Schedule still has not been submitted to DOTH.

1/31/2023: A high-level project plan was presented during the PMO on 1/26/2023 but the detailed Project Plan/Implementation Schedule has not been submitted to DOTH.

2/28/2023: The Project Plan/Implementation Schedule was submitted to DOTH for review and approval. DOTH reviewed it internally and scheduled a meeting for further review and discussion with SI on 3/1/2023.

3/31/2023: SI submitted the Project Plan/Implementation Schedule for discussion on 3/1/2023 and it was observed that task durations and dates need to be completed based on the current availability of resources and time constraints. DOTH and SI disagree with approaches regarding the resource loading to the Project Plan. They are in the process of working through the details and finalizing the Project Plan/Implementation Schedule.

4/30/2023: There are still disagreements between DOTH and SI regarding the resource plan, task duration and deliverables due dates, as well as the Go-Live date.

5/31/2023: DOTH and SI have been working together to agree on the Project Plan/Implementation Schedule, but an agreement has not been reached. This is an important deliverable that requires both parties' attention and it should be completed as soon as possible.

6/30/2023: DOTH and SI planned to meet to work on the Project Plan/Implementation Schedule and it should be completed asap.

7/31/2023: DOTH is waiting for SI's submission of the updated Project Plan/Implementation Schedule. Timely attention from both parties is imperative for the completion of this crucial deliverable at the earliest opportunity.

8/31/2023: DOTH is currently awaiting submission of the updated Project Plan/Implementation Schedule from SI.

9/30/2023: No major update. DOTH is currently in the process of awaiting the submission of the revised Project Plan/Implementation Schedule from SI.

10/31/2023: SI submitted the revised Project Plan/Implementation Schedule and DOTH is currently reviewing it.

11/30/2023: SI and DOTH held a few meetings to discuss the Project Plan/Implementation Schedule and worked together on work breakdown structures and resource assignments.

12/31/2023: SI and DOTH continue to work together to complete the Project Plan/Implementation Schedule.

1/31/2024: SI and DOTH held a few meetings and worked on the breakdown of structures/tasks, resource assignments, and deliverable dates to complete the Project Plan/Implementation Schedule.

2/29/2024: SI submitted the Project Plan/Implementation Schedule with a Go-Live date of 9/23/2024. DOTH is currently reviewing the Project Plan/Implementation Schedule and has identified unreasonable timelines, as well as inaccuracies in the percentage of completion and task dates.

3/31/2024: SI, ETS, and DOTH held meetings to review and discuss the Project Plan/Implementation Schedule that SI submitted last month. DOTH and ETS pointed out unfeasible timelines for tasks, resource assignments, Go-Live date, and an inaccurate percentage of deliverable completion.

4/30/2024: SI submitted an updated Project Plan/Implementation Schedule. During the subsequent review session, DOTH and ETS identified several issues, including unrealistic task timelines, incorrect sequencing of task dependencies (successor and predecessor relationships at the task level), an unrealistic Go-Live date, and the inaccurately reported percentages of deliverable completion.

5/31/2024: There have been no major updates. The updated Project Plan/Implementation Schedule is still being reviewed and updated by SI and DOTH.

6/30/2024: SI submitted the Project Plan/Implementation Schedule, which was updated mainly with task successor and predecessor relations. DOTH is currently in the process of reviewing it. However, there are still some elements that require fixing and completion, such as updating and finalizing start and finish dates, adding automatic scheduling logic, critical path, task durations, and percentages of deliverable completions.

7/31/2024: The updated Project Plan/Implementation Schedule is still being reviewed and updated by SI and DOTH.

8/31/2024: Resources and timelines for tasks are being reviewed and updated by SI.

9/30/2024: SI continues to work on the deliverable with focus on resources and timelines. Lack of an approved Project Plan continues to hinder the project progress.

10/31/2024: SI is working on the next iteration of the submission and plans to present it to DOTH soon.

11/30/2024: SI submitted a new iteration of the Project Plan. DOTH and SI held a discussion meeting but could not come to an agreement. The proposed dates on some deliverables are not in the expected sequence and DOTH views the timeframe unrealistic and not based on actual resources and demanded that the resource and time required are substantiated.

**Schedule Management: Observation, Risk, Issue and Feedback/Mitigation**

12/31/2024: There were meetings held to discuss the updated Project Plan. However, there are multiple items that were unclear to DOTH and will need additional follow up. CDD information has been added, along with minor tasks that have been discovered and included since the last iteration. Resource balancing is continuing to take place and is making progress.

1/31/2025: There were meetings held for the project timeline, and resource balancing is currently in progress. It is recommended to finalize the Project Plan as soon as possible to ensure clarity regarding the task timeline and to prevent any further delays in project completion.

2/28/2025: There continues to be meetings and discussions to complete the Project Plan. However, DOTH suggested that, given past performance in deliverable timelines and execution, the proposed timeline may be aggressive and that there may not be enough resource capacity to accommodate the items presented in the plan.

3/31/2025: It was decided to focus on a rolling three-month plan instead of a full-fledged project plan. During the Project Plan and PMO meetings, discussions are centered around the activities and priorities for the upcoming three months.

9/30/2025: There were meetings held for the project timeline, and resource balancing. It is recommended to finalize the Project Plan as soon as possible to ensure clarity regarding the task timeline and to prevent any further delays in project completion.

10/31/2025: There have been no major updates. The updated Project Plan/Implementation Schedule is still being reviewed and updated by SI and DOTH.

11/30/2025: A formal schedule or project plan is critical for tracking and measuring the progress and successful completion of the H4 project.

12/31/2025: A well-defined schedule or project plan is essential to effectively monitor progress and ensure the successful delivery of the H4 project.

01/31/2026: Project plan is essential to effectively monitor progress and ensure the successful delivery of the H4 project.

## Schedule Management: Observation, Risk, Issue and Feedback/Mitigation

| Issue  | Impact  |
|--|---|
| <p><b>ORI ID: I-220331-02</b><br/>The Go-Live date of Wave 2 for Budget and Planning has not been set yet.</p> |  |

## Feedback/Mitigation/ Updates

The Go-Live of Wave 2 for Budget and Planning need to be set as soon as possible because it impacts the project plan, resource scheduling, and project management. It is recommended to weigh the pros and cons of merging Wave 1 and Wave 2 given that there is significant delay in the project progress.

4/29/2022: No major updates. In accordance with meetings and discussions, it should be carefully considered that SBP goes live with other modules at once because it will eliminate any additional reconciliation process and streamline the whole end-to-end budget procedures if SBP goes live at the same time as FM.

5/31/2022: The issue of not discovering SBP functions and incorporating them into the current solution design was discussed again during the Project System PDD review. It is recommended that SBP functions and features need to be reviewed and considered when developing solution designs for Fund Management, Project System, FHWA requirements.

6/30/2022: No major updates.

7/31/2022: No major updates.

8/31/2022: No major updates.

9/30/2022: SI will provide additional information for SBP or its replacement application, because SBP is planned to be unsupported in the near future. 10/14/2022: SI stated that Wave 2 would start in November 2022. However, the Go-Live date of Wave 2 has yet to be determined.

11/15/2022: SI is working with DOTH resources and preparing for a Kickoff meeting.

12/21/2022: Wave 2 SBP Budgeting Kick-off meeting was held.

1/31/2023: SI is working on the Prepare Phase deliverables and preparing DOTH project team member training, however the Project Plan for Wave 2 has not been submitted yet and Go-Live date still has not been determined.

2/28/2023: SI provided training on 2/23/2023. No SBP project plan has been submitted to DOTH.

3/31/2023: SI submitted the Project Plan/Implementation Schedule for the Wave 2 Budget and Planning (SBP). It is being reviewed and updated. 4/30/2023: Project Plan/Implementation Schedule for Wave 2 is still being reviewed and updated.

5/31/2023: The Go-Live date of Wave 2 for Budget and Planning (SBP) will not be set until the Project Plan/Implementation Schedule for Wave 1 is completed.

6/30/2023: The Project Plan/Implementation Schedule for Wave 1 has not been completed. Therefore, the Go-Live date of Wave 2 for Budget and Planning (SBP) is not set.

7/31/2023: The Go-Live date of Wave 2 for Budget and Planning (SBP) has yet to be established because the H4 Project Team is waiting for the completion of the Project Plan/Implementation Schedule for Wave 1.

8/31/2023: No major updates.

9/30/2023: No major updates since the Wave 2 Go-Live date is dependent on the Wave I Project Plan/Implementation Schedule and no updated Wave I Project Plan/Implementation Schedule has been submitted.

10/31/2023: No major updates.

11/30/2023: SI and DOTH are collaborating on the review of the Project Plan/Implementation Schedule. Currently, they are working to resolve the issue of work breakdown structure and resource allocation.

**Schedule Management: Observation, Risk, Issue and Feedback/Mitigation**

12/31/2023: SI and DOTH are actively working together to address and rectify the issues related to the work breakdown structure and resource allocation for the Project Plan/Implementation Schedule.

1/31/2024: The Go-Live date for Wave 2 of Budget and Planning (SBP) has not yet been determined. This is because the H4 Project Team is awaiting the completion of the Project Plan/Implementation Schedule for Wave 1 before finalizing the schedule for Wave 2.

2/29/2024: SI submitted an updated Project Plan/Implementation Schedule for Wave 1 and DOTH is reviewing it.

3/31/2024: SI, ETS, and DOTH held meetings to review and discuss the Project Plan/Implementation Schedule that SI submitted last month. DOTH and ETS pointed out unfeasible timelines for tasks, resource assignments, Go-Live date, and an inaccurate percentage of deliverable completion.

4/30/2024: The review and update of the Project Plan/Implementation Schedule is still in progress. The Project Plan/Implementation Schedule has not been completed yet.

5/31/2024: No major updates.

6/30/2024: No major updates.

7/31/2024: The Project Plan/Implementation Schedule is still pending, and Wave 2 is continuously postponed.

8/31/2024: No major updates.

9/30/2024: No major updates.

10/31/2024: No major updates.

11/30/2024: No major updates.

12/31/2024: No major updates. The Project Plan is still incomplete, and Wave 2 continues to be postponed.

1/31/2025: No major updates. A discussion will take place in the future regarding the program that will replace the SBP, as it has been announced that the SBP product will be reaching its end-of-life. Currently, there is no specific time frame established for this discussion.

2/28/2025: DOTH raised a concern about having a separate Wave 2, as this could potentially lead to the failure of FHWA's full and complete certification. The requirements assigned to Wave 2, especially Job Authorization, Project Data Sheet, and HWYAC Info Sheets, are part of Wave 1 and constitute a critical portion of the FHWA certification assessment. There are no major updates on the development of Wave 2 or discussions regarding the SBP replacement.

3/31/2025: DOTH raised in the PMO meeting those certain requirements—Job Authorization, Project Data Sheet, and HWYAC Info Sheets—should be included in Wave 1 instead of Wave 2. Further discussions will take place to address this concern.

9/30/2025: Discussed with DOTH and it is agreed that LSI will replace the SAP SBP to SAP SAC as the new tool for the Planning and budgeting solutions.

10/31/2025: No Major Updates.

11/30/2025: LSI has not submitted a change order to replace the SAP SBP budgeting application. SAP informed DOTH that support for SBP ended at the end of 2025.

12/31/2025: At this time, LSI has not submitted a change order related to replacing the SAP SBP budgeting application. SAP has advised DOTH that support for the SBP platform concluded at the end of 2025

01/31/2026: No change order has been submitted by LSI in January 2026 for the replacement of SBP solutions.

B. Subject Category: Resource Management

**Resource Management: Observation, Risk, Issue and Feedback/Mitigation**

**Issue**

**Impact**

**ORI ID: I-230930-01**

Five key consultants, including the financial/integration lead, OCM lead, AR consultant, GM/FM lead, and infrastructure lead, as well as the HCM lead, left the H4 project. Additionally, three more key development consultants, the ABAP consultant, the Workflow consultant, and the lead HR Developer, departed in 2025. These consultants have dedicated over two years of their expertise to the H4 project, and the transition process may not have been executed as thoroughly as needed to ensure a seamless transfer of responsibilities, knowledge preservation, and uninterrupted flow of operations within the team, primarily because their positions were left vacant after they departed from the project.

**Feedback/Mitigation/Updates**

To ensure project continuity and success, it is recommended that SI promptly assign new resources to fill these vacant positions, as well as any other essential roles that are still vacant from previous departures.

9/30/2023: After a thorough review and assessment, DOTH has declined SI's proposal to assign the current PS/FHWA consultant as the financial/integration lead. DOTH conducted an interview with the HR lead candidate proposed by SI but chose not to proceed with the candidate due to concerns raised by both the interview responses and the assessment.

10/31/2023: One additional consultant covering GL/AP/CO/FAMIS Interface left the project in October. SI is in the process of filling in the vacant positions and DOTH conducted interviews with a few candidates. It is observed that the immediate positions to fill are Financial/Integration Lead, OCM Lead, HCM Lead, FA, and GL/AP/CO/FAMIS Interface Consultant.

11/30/2023: The positions of the OCM lead and the HCM lead have been filled. Additionally, the timesheet consultant, who has prior experience working on the H4 project, will assist with knowledge transfer for a month. They are expected to join project meetings soon. The vacant positions to fill are Financial/Integration Lead, FA, and GL/AP/CO/FAMIS Interface Consultant. It is observed that knowledge transfer to the new consultant did not take place properly and DOTH had to reiterate its processes and requirements to the new consultant.

12/31/2023: Another consultant who is responsible for development lead left the H4 project.

1/31/2024: The following functional consultant positions -- Financial/Integration Lead, FA, and GL/AP/CO/FAMIS Interface Consultant -- remain vacant and they need to be filled as soon as possible.

2/29/2024: There have been no updates regarding the number of consultants with vacant positions. However, DOTH conducted a reference call for the GL/AP/CO/FAMIS Interface and OCM consultants.

3/31/2024: DOTH interviewed new financial and OCM consultant candidates suggested by SI. They started working this month.

4/30/2024: Financial/Integration Lead and FA positions remain vacant. FA interview was conducted on 4/19/2024 and the candidate was approved by DOTH but will not join meetings until May.

5/31/2024: A new FA consultant from SI has joined and begun participating in the H4 meetings. The role of the Financial/Integration Lead is vital for the project, as discussions and solution designs for each module appear to be currently conducted in a siloed manner. The project requires a resource capable of seamlessly integrating these disparate areas to ensure cohesive end-to-end functionality.

6/30/2024: The role of Financial/Integration Lead is not performed effectively, and it is impacting various areas. For example, it has been observed that SI Leads could have miscommunicated or misinstructed, where SAP's generic data conversion template was used instead of the data conversion template that the H4 Project Team worked on during many FSD sessions.

**Resource Management: Observation, Risk, Issue and Feedback/Mitigation**

7/31/2024: With the Realize Phase kickoff and CRP sessions starting, resources from multiple modules joined the related CRP meetings to bridge different tasks between modules.

8/31/2024: During the CRP sessions, consultants from directly or indirectly related modules were in attendance. However, the absence of an effective financial/integration role may have led to some end-to-end integrated solutions between modules not being addressed promptly and instead being deferred to another consultant or future sessions.

9/30/2024: Multi-module collaboration and integration efforts appear to be taking place passively on an as-needed basis instead of proactively being managed. This may lead to prolonged development time for the end-to-end integrated solutions.

10/31/2024: Lead consultants from various modules participated in the CRP sessions to collaborate and offer detailed explanations in response to questions and comments.

11/30/2024: CRP sessions have continued, with consultants from various areas providing input on an as-needed basis. However, the multi-module collaboration and integration efforts appear to be occurring passively. It would be beneficial to establish a dedicated financial/integration role that actively drives and leads end-to-end integration solutions.

12/31/2024: The role of the Financial/Integration Lead has become increasingly critical for the project, especially as discovery sessions are being repeated in multiple modules due to inadequate transition to new/newer consultants. The project needs a resource who can facilitate internal knowledge transfer and provide detailed information on requirements to help them get up to speed.

1/31/2025: Another consultant left at the end of last year, and it shows the impact of not having a financial/integration lead role with comprehensive knowledge, as a new consultant will again have to go through knowledge transfer sessions with DOTH.

2/28/2025: It is recommended that SI provides a role of the full-time dedicated financial/integration lead for the H4 Project to ensure system implementation continuity.

3/31/2025: The lack of a financial/integration lead becomes evident when the project encounters bottlenecks in areas involving data flow between modules and when discovery sessions are repeated multiple times.

9/30/2025: Three consultants left between April and September, and it shows the impact of not having a financial/integration role with comprehensive knowledge, as a new consultant will again have to go through knowledge transfer sessions with DOTH.

10/31/2025: A new AR consultant joined the team to support H4 Implementation.

11/30/2025: OCM position remained vacant at the end of November.

12/31/2025: No update. The Status remains same.

01/31/2026: A new OCM Lead resource resume submitted for review.

C. Subject Category: Quality Management

**Quality Management: Observation, Risk, Issue and Feedback/Mitigation**

**Issue**

**Impact**

**ORI ID: I-231031-01**

Some deliverables continue to exhibit recurring issues, such as containing non-DOTH-related information and deviating from the DED, resulting in missing, incomplete, or incorrect information. These persistent issues, which have been previously highlighted, are causing delays in the deliverable review and approval process.

**Feedback/Mitigation/Updates**

It is recommended that deliverables comply with approved DEDs and undergo thorough preparation, review, and proofreading by SI before submission to DOTH for review.

11/30/2023: No major updates.

12/31/2023: No major updates.

1/31/2024: No major updates.

2/29/2024: A deliverable was submitted for review, but it contained errors and incomplete information. The document requires better organization and structure, and it should address the questions and comments provided by DOTH.

3/31/2024: No major updates.

4/30/2024: A Deliverable contained a noticeable error that can be easily avoided, e.g., referencing an incorrect client - State of Nevada. 5/31/2024: It is continuously observed that other projects are referenced in the documents - e.g., SMART 21 Solution.

6/30/2024: No major updates.

7/31/2024: No major updates.

8/31/2024: There continues to be minor wording and formatting issues including deliverable format being different than agreed upon DED. 9/30/2024: No major updates.

10/31/2024: No major updates.

11/30/2024: Some deliverables did not adequately address questions and comments provided by DOTH. This causes another round of review and ultimately results in project delays.

12/31/2024: No major updates.

1/31/2025: No major updates.

1/31/2025: No major updates.

2/28/2025: No major updates.

3/31/2025: No major updates.

9/30/2025: No major updates.

10/31/2025: No major updates.

11/30/2025: No major updates.

12/31/2025: No major updates.

01/31/2026: No major updates.

D. Subject Category: Risk/Issue Management

| Risk/Issue Management: Observation, Risk, Issue and Feedback/Mitigation  |   |
|--|---|
| Issue  | Impact  |
| <p><b>ORI ID: I-221130-02</b></p> <p>Some items from Issue/Risk Log are being discussed without detailed resolution. Second, conducting end-to-end CRP in a non-upgraded system will pose issues in the downstream. End-to-end CRP will not be reliable.</p>   |  |
| Feedback/Mitigation/Updates  |   |
| <p>The risks and issues of the H4 Project need to be more proactively managed and respective SMEs should be more engaged regarding the details to ensure the success of the project.</p> <p>12/31/2022: No major updates.</p> <p>1/31/2023: It is recommended that all outstanding issues and risks be discussed during the PMO meeting, not just new items. 2/28/2023: No major updates.</p> <p>3/15/2023: There are 13 unresolved outstanding issues and one new issue found.</p> <p>4/30/2023: Progress has been made, however there are items that are aging and a quicker follow up and resolution to those issues will help with the project timeline.</p> <p>5/31/2023: There are 37 items that need to be reviewed - 15 resolved and 22 in progress. There are still old items that need follow up. 6/30/2023: There are 38 items that need to be reviewed - 15 resolved and 23 in progress. There are still old items that need follow up. 7/31/2023: There are 41 items that need to be reviewed - 15 resolved and 26 in progress. There are still old items that need follow up. 8/31/2023: There are 45 items that need to be reviewed - 19 resolved and 26 in progress. There are still old items that need follow up.</p> <p>9/30/2023: There are 49 items that need to be reviewed - 21 resolved, 27 in progress, and 1 in new. It is recommended the all open issues are reviewed and resolved.</p> <p>10/31/2023: There are 50 items that need to be reviewed - 23 resolved, 27 in progress, and 1 in new. It is recommended that all open issues, including older items, be reviewed and resolved.</p> <p>11/30/2023: There are 50 items that need to be reviewed - 23 resolved and 27 in progress.</p> <p>12/31/2023: There are 51 items that need to be reviewed - 25 resolved and 26 in progress.</p> <p>1/31/2024: There are 55 items that need to be reviewed - 25 resolved and 30 in progress. It is recommended that all open issues, including older items, be reviewed and resolved.</p> <p>2/29/2024: There are 55 items that need to be reviewed - 31 resolved and 24 in progress. It is recommended that all open issues, including older items, be reviewed and resolved.</p> <p>3/31/2024: There are 57 items that need to be reviewed - 33 resolved and 24 in progress. It is recommended that all open issues, including older items, be reviewed and resolved.</p> <p>4/30/2024: There are 59 items that need to be reviewed - 33 resolved and 26 in progress. It is recommended that all open issues, including older items, be reviewed and resolved.</p> |   |

## STATE OF HAWAII, DEPARTMENT OF TRANSPORTATION, HIGHWAYS

5/31/2024: There are 60 items that need to be reviewed - 34 resolved and 26 in progress. It is recommended that all open issues, including older items, be reviewed and resolved. Older items should be checked to decrease any backlog.

6/30/2024: There are 61 items that need to be reviewed - 34 resolved and 27 in progress. It is recommended that all open issues, including older items, be reviewed and resolved. Older items should be checked to decrease any backlog.

7/31/2024: There are 63 items that need to be reviewed - 35 resolved and 28 in progress. It is recommended that all open issues, including older items, be reviewed and resolved. Older items need better follow ups.

8/31/2024: There are 65 items that need to be reviewed - 35 resolved and 28 in progress, and 2 in new. It is recommended that all open issues, including older items, be reviewed and resolved. Older items need better follow up.

9/30/2024: There are 65 items that need to be reviewed - 35 resolved and 30 in progress. It is recommended that all open issues, including older items, be reviewed and resolved. Older items need better follow up.

10/31/2024: There are 68 items that need to be reviewed - 36 resolved and 32 in progress. It is recommended that all open issues, including older items, be reviewed and resolved. Older items need better follow up.

11/30/2024: There are no changes to risks and issues this month. However, many older items have not been discussed or addressed for some time and require more attention. It is recommended that SI consultants and DOTH SMEs hold a dedicated session to review and recalibrate these issues. This effort is crucial to effectively resolving the aged items that are currently impacting the overall progress of the project.

12/31/2024: There are 70 items that need to be reviewed - 36 resolved and 34 in progress. It is recommended that all open issues, including older items, be reviewed and resolved. Older items need better follow up.

1/31/2025: No changes in the number of issues.

2/28/2025: No changes in the number of issues.

3/31/2025: There are 71 items that need to be reviewed - 38 resolved and 33 in progress. It is recommended that all open issues, including older items, be reviewed and resolved. Older items need better follow up.

9/30/2025: There are 116 items that need to be reviewed - 83 resolved and 33 in progress. It is recommended that all open issues, including older items, be reviewed and resolved. Older items need better follow up.

10/31/2025: There are 116 items that need to be reviewed - 33 in progress, and 83 closed. It is recommended that all open issues, including older items, be reviewed and resolved. Older items need better follow up.

11/30/2025: There are two duplicate numbering in the issue log. SI will fix it and IV&V will update the count in the December report.

12/31/2025: The duplicate numbering in the issue log has been corrected. There are currently 118 items identified for review, including 33 in progress, 44 resolved, and 41 closed. It would be beneficial to review and address all remaining open issues, including older items, with additional follow-up to support timely resolution.

01/31/2026: There are currently 119 items identified for review, including 1 new, 34 in progress, 45 resolved, and 39 closed. It would be beneficial to review and address all remaining open issues, including older items, with additional follow-up to support timely resolution.

E. Subject Category: Organization Change Management

**Organization Change Management: Observation, Risk, Issue and Feedback/Mitigation**

| Issue   | Impact  |
|---|---|
| <p><b>ORI ID: I-241226-01</b><br/>                     OCM activity has been on hold and there is no ongoing communication taking place. There is no new OCM lead in the project currently.</p> |  |

**Feedback/Mitigation/Updates**

OCM activity has been absent for an extended period due to the project focusing on one specific activity at a time, currently CRPs. Even during stagnant times, the project will benefit from ongoing communication and updates.

1/31/2025: No major updates.

2/28/2025: OCM activities continue to be paused, and activities are planned to resume when Unit Testing starts. There should be proactive communication to the stakeholders and end users regarding the project status and development along with upcoming changes.

3/31/2025: There were no OCM activities conducted, apart from those related to the CRP.

09/30/2025: OCM Consultant left the project, and we have yet got a new consultant to fulfill this requirement.

10/31/2025: There were no OCM activities conducted, apart from those related to the CRP.

11/30/2025: The contract requires that the vacancy be filled within 45 days by a replacement OCM Lead with equivalent qualifications and experience. However, the OCM position remained vacant at the end of November.

12/31/2025: The contract specifies that any vacancy should be filled within 45 days by a replacement OCM Lead with comparable qualifications and experience. As of the end of December, the OCM Lead position had not yet been filled.

01/31/2026: The contract specifies that any vacancy should be filled within 45 days by a replacement OCM Lead with comparable qualifications and experience. As of the end of January, the OCM Lead resume submitted but position had not yet been filled.

F. Subject Category: Communication Management

**Communication Management: Observation, Risk, Issue and Feedback/Mitigation**

**Issue**

**Impact**

**ORI ID: I-220131-08**

Some requirements and processes impact multiple modules, including waterfall funding and the FHWA, among others. However, information is often siloed and not communicated to other consultants frequently. This results in multiple consultants asking for the information on a same topic each time at different meetings. This item also impacts the subject category of Solution Design and Configuration.

**Feedback/Mitigation/Updates**

It is recommended: More coordination and collaboration are needed to design and develop an integrated solution. Proactively communicate with other consultants on topics that may be relevant for another consultant. Meeting recordings should be utilized to understand the relevant topic for the related process in another module. All key H4 Project Team members to attend the meetings related to critical core requirements such as waterfall funding.

Analyze each meeting's agenda to see if there are other consultants that should attend for related information.

2/28/2022: There is another consultant who is leaving the project and a replacement consultant has not participated in a meeting, and these turnovers are adding difficulty to the current communication issue.

3/31/2022: More collaboration is expected among SI consultants where it requires integrated solutions such as Waterfall Funding, FHWA Billing, Labor, etc. When DOT staff inquiries about solutions that integrate across two or more functions between H4 modules, DOT staff should also be provided with the integrated solution answer as opposed to separate or siloed bits of information of each H4 module.

4/29/2022: Efforts were made to improve communication and collaboration. (E.g., Rules of Engagement prepared by SI)

5/31/2022: Collaboration made progress. For example, some requirements that impact multiple areas have been referenced by multiple PDDs of different areas. However, there are still some communication improvements to be made between SI consultants.

6/30/2022: More coordination and collaboration could be made where cross module interaction is needed.

7/31/2022: More coordination and collaboration were present during the PDD reviews.

8/31/2022: Some DOT requirements that were presented and discussed previously were asked to be revisited again in the meetings.

9/30/2022: Improvements still need to be made in communication and collaboration between SI consultants.

10/31/2022: Communication and collaboration still need to improve between SI consultants, especially with three consultants leaving the project. 11/30/2022: It has been observed that during FSD meetings information is not being shared between modules, including basic information which impacts multiple modules. Since this information is not being shared among SI team members, DOT has to re-explain basic information multiple times.

12/31/2022: More communication and collaboration are needed for integrated solution design. There have been siloed activities and approaches observed. 1/31/2023: Designing an integrated solution for FHWA and other modules will require additional collaboration effort, teamwork, and cooperation. The issues of siloed information and ununified solution design are still observed between models and cross-business areas where tight integration is needed.

2/28/2023: It is observed that more communication and collaboration are still needed for an integrated solution design. DOT is still not clear on the end-to-end FHWA System solution.

3/31/2023: The issue regarding an integrated solution design was brought up in a PMO meeting. It was decided that there will be an integration checklist developed to keep track of issues and action items coming out of meetings that impact integration of modules.

**Communication Management: Observation, Risk, Issue and Feedback/Mitigation**

4/30/2023: It is observed that additional communication, collaboration, and comprehensive solution architecture are necessary to achieve a fully integrated solution design as there are information gaps between the modules where the transactions impact each other.

5/31/2023: The lack of an integrated and comprehensive solution design remains a concern. It is recommended that SI and DOTD work together to resolve this ongoing issue.

6/30/2023: There is an ongoing concern regarding the absence of an integrated and comprehensive solution design. When a meeting is held, it is recommended that all responsible participants attend the meeting for best facilitation.

7/31/2023: Some progress has been made through consultants attending meetings of cross-functional areas for integration efforts. For a fully integrated solution design, continuous communication, collaboration, and comprehensive architecture are needed to bridge information gaps between modules and interdependent transactions.

8/31/2023: It is observed that some cross-module dependencies were not fully explored and they may not function as anticipated; inter-module discussion is needed. The challenges of isolated information and a fragmented solution design persist across modules and cross-business areas where seamless integration is crucial.

9/30/2023: Three additional key consultants have left the H4 project, specifically in the roles of FM/GM, OCM Lead, and Infrastructure Lead. This departure could potentially exacerbate the existing challenges related to integrated solution design, collaboration, and cohesive teamwork.

10/31/2023: Following the departure of five consultants in the last two months, another consultant responsible for GL, AP, CO, and FAMIS interface left the H4 project in October. This departure is exacerbating the ongoing challenges related to integrated solution design, collaboration, and cohesive teamwork. 11/30/2023: The challenges of siloed information and the need for a comprehensive solution design persist across various models and cross-business areas where seamless integration and collaboration are crucial. This issue is amplified with multiple resources leaving the project.

12/31/2023: Another development lead consultant left the H4 project in December after six other consultants departed in the last three months. This was a core position which was responsible for working on WRICEF items including cross-module functionalities, thus leading the development team. This departure is making it more difficult to design integrated solutions, collaborate, and work cohesively as a team.

1/31/2024: The challenges posed by working in a siloed manner persist, highlighting the necessity for a comprehensive solution design that spans various modules and cross-business areas. Additionally, the project still needs to fill key roles such as financial/integration lead and other functional and technical consultants, including areas for FA, AP, CO, GL, and WRICEFs.

2/29/2024: The absence of key roles such as the financial/integration lead and various consultants (FA, AP, CO, GL, WRICEFs) underscores the crucial need for a comprehensive integrated solution design that addresses multiple modules and challenges associated with working in silos.

3/31/2024: The persistent challenges arising from siloed work practices underscore the critical need for a holistic solution design with leadership and supervision that extends across multiple modules and interconnects various business domains to meet DOTD's end-to-end requirements.

4/30/2024: The ongoing challenges posed by isolated work practices highlight the urgent need for an integrated solution design. The solution design spans multiple modules and connects various business domains and to ensure DOTD's comprehensive requirements are met properly, apparent lack of project management, leadership, and oversight need to be addressed and improved.

5/31/2024: The ongoing challenges resulting from siloed work practices persist, highlighting the urgent need for more effective and efficient project management, leadership, and integrated solutions.

6/30/2024: No major updates.

**Communication Management: Observation, Risk, Issue and Feedback/Mitigation**

7/31/2024: The need for more effective and efficient project management and integrated solutions is evident as siloed work practices continue to hinder progress.

8/31/2024: During CRP sessions, consultants from related modules have collaborated to discuss and present H4 functionalities and their alignment with requirements. However, the overall solution design has not yet achieved the level necessary to support integrated DOTH requirements. Siloed work practices persist, emphasizing the need for a stronger focus on multi-module, end-to-end integration and project management to ensure cohesive alignment across all modules.

9/30/2024: As CRP sessions continue more collaboration is noticed. However, siloed work practice continues, and the end-to-end multi-module integration will need more effort.

10/31/2024: Continuous effort is needed for collaboration between the modules to ensure tightly integrated solution.

11/30/2024: No progress was made in intra-team communication. As the system is being developed and end-to-end scenarios will impact multiple modules, more coordination and communication are needed to have a properly integrated system.

12/31/2024: As CRPs progress and WRICEF development continues, communication takes place on specific areas that need interaction between the modules. However, a more overarching integrative effort and open communication are needed to ensure seamless collaboration. Meetings often involve the need to consult with other specialists for specific information, highlighting the importance of a structured approach to cross-module coordination.

1/31/2025: Another consultant has left the project, resulting in a gap in institutional knowledge once again. When attrition occurs, a certain level of knowledge transfer is expected to be necessary for the project to get back on track. However, the impact can be minimized through strong coordination and collaboration among consultants with the leadership of the financial and Integration Lead, a role that is currently unavailable yet remains crucial for the project's success. Additionally, maintaining proper meeting documentation as a standard practice, as discussed in I-221130-03, will further support knowledge continuity and project stability.

2/28/2025: No significant improvement or progress in overall collaboration and cross-module communication has been observed.

3/31/2025: It has been observed in multiple meetings that the same information is being repeatedly covered. Combined with the lack of meeting minutes and Summaries', this has become a significant factor hindering the project's progress.

9/30/2025: Three consultants have left the project, resulting in a gap in institutional knowledge once again. When attrition occurs, a certain level of knowledge transfer is expected to be necessary to get the project back on track. However, the impact can be minimized through strong coordination and collaboration among consultants, under the leadership of the financial and Integration Lead.

10/31/2025: More coordination and collaboration were present during the CRP sessions.

11/30/2025: Out of 21 functional meetings and CRPs in November, five had LSI cross functional participation.

12/31/2025: Total 2 CRP's were conducted in the month of December 2025.

01/31/2026: Total three CRPs were conducted in the month of January 2026.

## G. Subject Category: Contract Management

**Contract Management: Observation, Risk, Issue and Feedback/Mitigation****Observation****ORI ID: O-240926-02**

SAP Solution Manager as its mainstream maintenance is scheduled to end by the close of 2027. SAP Cloud ALM will be replacing SAP Solution Manager. The H4 Project Team has been reviewing and discussing continuing to utilize SAP Solution Manager for this project scope or immediately transition to SAP Cloud ALM.

**Feedback/Mitigation/Updates**

10/31/2024: A steering committee meeting was held to discuss upgrading the Solution Manager. SI and DOTH agreed to upgrade Solution Manager to Cloud ALM. Further details will be discussed and finalized later and change order will be prepared accordingly.

11/30/2024: No major updates.

12/31/2024: No cost change order was prepared.

1/31/2025: No major updates.

2/28/2025: No major updates.

3/31/2025: No major updates. SI has not submitted the no cost change order.

9/30/2025: SI has submitted a no cost change order in July, and it is approved to replace the solution Manager.

10/31/2025: No major updates. SI has submitted the no cost change order, DOTH yet to access the new Cloud ALM solutions.

11/30/2025: SI agreed to implement the BTP solutions for the IS suite. This is the replacement of PO/PI tool.

12/31/2025: Change Order for BTP/IS solutions was approved by DOTH in December.

01/31/2026: No major update.

**Contract Management: Observation, Risk, Issue and Feedback/Mitigation****Observation****ORI ID: O-240926-03**

SAP Process Integration (PI) and Process Orchestration (PO) - the currently utilized middleware - as SAP will end support on December 31, 2027. SAP Integration Suite will be replacing SAP PI and PO. The H4 Project Team has been reviewing and discussing continuing to utilize SAP PI and PO for this project scope or immediately transition to SAP Integration Suite.

**Feedback/Mitigation/Updates**

## STATE OF HAWAII, DEPARTMENT OF TRANSPORTATION, HIGHWAYS

10/31/2024: A steering committee meeting was held to discuss the end of life of Process Integration (PI) and Process Orchestration (PO). SI and DOTH agreed that to finalize the decision, additional details are needed such as analysis regarding the complexity of migration, the project Go-Live date, and any other relevant factors that might impact the project schedule.

11/30/2024: No major updates.

12/31/2024: No major updates.

1/31/2025: No major updates.

2/28/2025: The Steering Committee held a meeting where this topic was discussed. SI and DOTH had differing opinions on the contract terms related to the 'Obsolete' clause. However, they ultimately reached an agreement to replace PI/PO with the SAP Integration Suite solution.

3/31/2025: No major updates.

9/30/2025: No major updates.

10/31/2025: SI submitted a no cost replacement CR to change the PO/PI with IS tool for all interfaces.

11/30/2025: SI is working with SAP to obtain the license for the BTP solutions.

12/31/2025: No major update.

01/31/2026: No major update.

### Contract Management: Observation, Risk, Issue and Feedback/Mitigation

#### Observation

**ORI ID: O-240926-04**

DOTH has requested an upgrade to the latest version of the SAP S4 HANA software, as the existing H4 system is currently several versions outdated.

### Contract Management: Observation, Risk, Issue and Feedback/Mitigation

#### Feedback/Mitigation/Updates

10/31/2024: SI plans to perform a software update before testing starts.

11/30/2024: No major updates.

12/31/2024: SI plans an upgrade after CRP sessions are completed and will provide a more detailed plan when CRP sessions end. 1/31/2025: No major updates. CRPs are continuing.

3/31/2025: It has been discussed that the upgrade timing will be determined after the completion of the CRP sessions.

9/30/2025: SI plan to upgrade the Current H4 system after the CRP completion.

10/31/2025: SI plans to upgrade the Current SAP H4 HANA system 2020 to 2023 version after the CRP completion.

11/30/2025: SI plans to upgrade H4 HANA system from SAP S/4 2020 to 2023 version after the CRP completion. IV&V recommends upgrade the system before the end-to-end CRP.

12/31/2025: LSI has indicated plans to upgrade the HANA H4 system from SAP S/4 2020 to SAP S/4 2023 following completion of CRP activities.

IV&V recommends considering the upgrade prior to the end-to-end CRP to support a more streamlined testing process.

01/31/2026: No upgrade started in January 2026, IV&V recommends considering the upgrade prior to the end-to-end CRP to support a more streamlined testing process.

H. Subject Category: Requirement Management (Processes, Requirements and Fit/Gap)

**Requirement Management: Observation, Risk, Issue and Feedback/Mitigation**

| Risk   | Impact  |
|--|---|
| <p><b>ORI ID: R-230228-01</b><br/>                     FSDs are supposed to be prepared during the RTM and Fit/GAP. However, FSD is still under development. CDD and FSD are the final documents before the System configuration, therefore it should be as complete as possible. However, numerous discoveries are still being made during the CRP/FSD review sessions. It will impact contract management scope.</p> |  |

**Feedback/Mitigation/Updates**

It is recommended that the H4 Project Team work on detailed and complete discovery of DOTH requirements without postponing any elements to development and testing. All the details should be discovered by the completion of FSDs. This also impacts Quality Management.

4/30/2023: There were some meetings where detailed information for configuration or reports was suggested to be discovered during the testing phase. It is recommended that all granular details be discovered and documented with the FSDs now rather than postponing until the integration testing. Developers need clear guidance on creating reports and customizing applications, which is why it's crucial for FSDs to be comprehensive and detailed.

5/31/2023: It is recommended that all detailed functional specifications be discussed, reviewed, agreed upon, and documented entirely before moving to the next task, such as Conference Room Pilot.

6/30/2023: Progress is being made on all modules. However, there are some FSDs that need to provide more details and more requirements; processes discussion is needed.

7/31/2023: No major updates.

8/31/2023: It is advisable to identify and document all specific details within FSDs at this stage rather than deferring them to the integration testing phase. Reviewing FSDs continues to pose difficulties due to the fragmented and isolated presentation of information. Furthermore, understanding the logic can be quite challenging, particularly due to the limited understanding of SAP processes and functions.

9/30/2023: No major updates.

10/31/2023: No major updates.

11/30/2023: SI has proposed an 80:20 rule for approving FSDs, suggesting that developers can commence customization with an 80% completion of FSD specifications. The reasoning is that evaluating the system through testing is more straightforward and clearer than reviewing extensive requirement specifications in documents. IV&V holds the opinion that it is crucial to identify and document all functional specifications meticulously. This approach is designed to mitigate the risk of potential errors, omissions, or the necessity for rework in subsequent phases of the project.

12/31/2023: No major updates as fewer meetings are taking place due to resource departures.

1/31/2024: A thorough discovery of processes and requirements for FM, GM, and FHWA is currently underway.

2/29/2024: No major updates.

3/31/2024: No major updates.

4/30/2024: Progress is being made, however some discovery details and discussions from meetings and FSDs need to be documented better or some inquiries need to receive complete responses.

**Requirement Management: Observation, Risk, Issue and Feedback/Mitigation**

5/31/2024: No major updates. There are still over 40 FSDs remaining to be submitted by SI and continued effort is needed to capture all the details for the requirements.

6/30/2024: No major updates. There has been very little activity with FSDs. 7/31/2024:

No major updates. There has been minimal activity regarding FSDs.

8/31/2024: There was minimal progress made with FSDs, with a primary focus on CRPs.

9/30/2024: Progress with FSDs was limited, as efforts were primarily directed toward advancing CRPs.

10/31/2024: No additional FSDs were submitted as all efforts are going into CRP sessions and general module discussions.

11/30/2024: No major updates.

12/31/2024: Reports were shown and discussed in CRP sessions and regular meetings, and additional details were discussed.

1/31/2025: The reports FSDs will be worked on alongside any remaining CRPs and CDDs, instead of waiting for those to be completed. Also, SI stated that more WRICEF objects are ready for ITC.

2/28/2025: Additional WRICEF items are considered ready for ITC, according to SI.

3/31/2025: FSD activities are planned to resume at the end of March, based on the currently proposed Project Plan.

9/30/2025: Revisit of the RTM and FITGAP to understand the discrepancies in FSD count.

10/31/2025: No major updates.

11/30/2025: All CDD's are approved by DOTH.

12/31/2025: No Major Update.

01/31/2026: No Major Update.

I. Subject Category: Solution Design and Configuration

**Solution Design and Configuration: Observation, Risk, Issue and Feedback/Mitigation**

**Observation**

**ORI ID: O-230524-01**

There was a disagreement on the level of detail and how to review and confirm the Configuration Design Document (CDD). DOTH had questions on the CDDs; however, not all modules contained detailed enough answers for DOTH to understand them. Through the CDD review sessions and updates on CDD, the issues are being resolved. DOTH approved all of the CDD documents.

**Feedback/Mitigation/Updates**

LSI will do a walkthrough of the Configuration Design Document with DOTH in the upcoming meetings. It is recommended that SI provide enough details in CDDs and in responses to the questions for DOTH to be able to understand the concept of the design and to be able to do maintenance in the future.

6/30/2023: CDD review meetings have not been scheduled or held yet.

7/31/2023: It is recommended that SI and DOTH review CDDs as soon as possible because a CDD validates the baseline setup for the requirements met by the H4 standard functionalities.

10/31/2023: No activities related to CDD occurred. 11/30/2023: No major updates.

12/31/2023: It is recommended that DOTH and SI conduct a review and validation of CDDs alongside FSDs because over 480 requirements are met by the H4 standard functionalities.

1/31/2024: No major updates.

2/29/2024: No activities related to CDD occurred.

3/31/2024: No major updates.

4/30/2024: No major updates.

5/31/2024: No major updates.

6/30/2024: No major updates.

7/31/2024: No activities related to CDD occurred.

8/31/2024: No progress was made.

9/30/2024: No progress was made.

10/31/2023: No progress was made.

11/30/2024: No progress was made.

12/31/2024: SI mentioned that once CRP sessions are completed CDD will make progress.

1/31/2025: A few CDDs have been updated and submitted to DOTH for review.

1/31/2025: Some CRP sessions have not been completed and will continue in February. There are Q&A documents also being submitted and reviewed.

2/28/2025: The CRP FAQ documents are still under review, and CRP sessions are ongoing for the remaining modules. CRP activities will continue through the end of March in areas that remain incomplete.

3/31/2025: CRP sessions will continue into April, and the CRP meetings are scheduled throughout April.

09/30/2025: 85 percent of the CDD review done by DOTH and approved by DOTH.

10/31/2025: 95 percent of the CDD review done by DOTH and approved by DOTH.

11/30/2025: All CDD's are approved by DOTH.

12/31/2025: No Major Update.

01/31/2026: No Major Update.

**Solution Design and Configuration: Observation, Risk, Issue and Feedback/Mitigation**

**Issue Impact**

**ORI ID: I-240926-01**  
 Conference Room Pilot (CRP) sessions continued for various modules. However, a few sessions have been postponed due to the modules' lack of readiness. Furthermore, some CRP sessions do not adequately demonstrate DOTH-specific requirements. SI is working on to resolve this concern.

**Feedback/Mitigation/ Updates**

It is recommended that the CRP sessions prioritize and focus on DOTH-specific requirements and business processes rather than generic SAP processes and available features.

9/30/2024: Along with session readiness, resource scheduling and availability are also causing the project to be further delayed. 10/31/2024: CRP sessions will continue to be held in November for AR, AP, HCM, EGS, and FHWA.

11/30/2024: There will be CRP sessions in December. SI suggested that CRP sessions are completed in some modules, however DOTH has not fully agreed that CRP sessions are finalized for those modules.

12/31/2024: CRP sessions will continue to be held for certain modules in September. Additionally, there are some CRP sessions where questions were gathered, but the corresponding Q&A documents have not yet been submitted to DOTH.

1/31/2025: Some CRP sessions have not been completed and will continue in February. There are Q&A documents also being submitted and reviewed.

2/28/2025: The CRP FAQ documents are still under review, and CRP sessions are ongoing for the remaining modules. CRP activities will continue through the end of March in areas that remain incomplete.

3/31/2025: CRP sessions will continue into April, and the CRP meetings are scheduled throughout April.

9/30/2025: CRP sessions will continue to be held for specific modules in October. Additionally, there are some CRPs sessions scheduled for this month, and DOTH raised business-related questions during the CRPs. SI is responding to the questions raised during the CRPs.

10/31/2025: Four CRP sessions were held for month of October. CRP sessions will continue to be held for specific modules in November. Additionally, there are some CRPs sessions scheduled for December month, and DOTH raised business-related questions during the CRPs.

11/30/2025: Three CRP sessions were held for the month of November. CRP sessions will continue to be held for specific modules in December. Additionally, there are some CRPs sessions scheduled for January 2026.

12/31/2025: Two CRP sessions were held for the month of December. CRP sessions will continue to be held for specific modules in January 2026.

01/31/2026: Three CRP sessions will continue to be held for specific modules in February 2026.

**Solution Design and Configuration: Observation, Risk, Issue and Feedback/Mitigation**

| Issue   | Impact  |
|---|---|
| <p><b>ORI ID: I-250228-01</b><br/>                     The Configuration Design Document (CDD) review is fully completed for all modules, and a walkthrough of the CDD is completed.</p>  |  |
| <p><b>Feedback/Mitigation/ Updates</b></p>  |   |
| <p>FSD and CDD activities should have been worked on concurrently. CRPs are progressing without the completion of FSDs or a walkthrough of the CDDs. DOTH expects SI to conduct a comprehensive walkthrough of the CDD documents after the CRP sessions. It is recommended that SI provide DOTH with sufficient details in the walkthrough, CDD documents, and Q&amp;A responses. This will help DOTH gain a better understanding of the system design, prepare for upcoming testing, and ultimately ensure proper maintenance in the future.</p> <p>3/31/2025: CDD activities have resumed and are showing some progress. It is recommended that DOTH SMEs participate in reviewing and validating the CDDs, with appropriate supervision and guidance from SI.</p> <p>09/30/2025: 85 percent of the CDD review done by DOTH and approved.</p> <p>10/31/2025: 95 percent of the CDD review done by DOTH and approved.</p> <p>11/30/2025: All the CDD review done by DOTH and approved.</p> <p>12/31/2025: No major update.</p> <p>01/31/2026: No major update.</p> |   |

J. Subject Category: Reports and Analytics

| Reports and Analytics: Observation, Risk, Issue and Feedback/Mitigation  |   |
|--|---|
| Risk   | Impact  |
| <p><b>ORI ID: R-221130-03</b></p> <p>RTM and FSD are being prepared without in-depth reports discussion and Analysis of Reporting Requirements (ARR) does not provide sufficient information to cover all the details of the reports. Reports are often the final desired outcome of an activity and detail discovery is essential.</p>  |  |
| Feedback/Mitigation/Updates  |   |
| <p>It is recommended that SI conduct detailed discovery of DOTH reports to ensure all the necessary information for input and output are covered. 12/31/2022: During the FSD discussions, additional details that need to be on the reports have been discovered.</p> <p>1/31/2023: H4 Project Team is having deep-dive discussions on WRICEF's requirements, processes, and functional specifications. 2/28/2023: Reports WRICEF FSDs are being reviewed, and new discoveries are being made. FSDs are being updated based on discussions. 3/31/2023: New discoveries on reports requirements continue to be found.</p> <p>4/30/2023: Reports are constantly undergoing new discoveries.</p> <p>5/31/2023: Further details about the reports have been uncovered and discussed.</p> <p>6/30/2023: WRICEF Reports are being discussed during the FSD sessions but other standard reports in H4 also need to be reviewed. 7/31/2023: While WRICEF Reports are reviewed and discussed, it is equally essential to examine the standard reports within H4.</p> <p>8/31/2023: A few standard reports for AP were reviewed during the FSD meetings. Standard report review activities should continue throughout all modules. 9/30/2023: WRICEF Reports discussions are making incremental progress during the FSD sessions but some standard reports in H4 are still not explored carefully, and they should be reviewed to ensure standard reports can satisfy the requirements.</p> <p>10/31/2023: It is observed that detailed information for some report requirements is still missing and a comprehensive report analysis is still needed. 11/30/2023: Some reports are still undergoing more discoveries; for example, the details for MVSO report requirements, which require the FHWA waterfall funding table update, have been discussed for the first time. All detailed requirements must be thoroughly reviewed and documented properly.</p> <p>12/31/2023: Reports discussions are continuing and finding additional details for the requirements.</p> <p>1/31/2024: Discussions regarding reports are ongoing; meanwhile, further details about the requirements are being discovered. 2/29/2024: No major updates.</p> <p>3/31/2024: No additional reports-related FSDs were submitted, nor standard reports were discussed.</p> <p>4/30/2024: Discussions about the reports including FSDs continue, and new details about the requirements are emerging.</p> <p>5/31/2024: Discussions regarding the reports are in progress, and additional details about the report requirements are being revealed. 6/30/2024: The H4 Project Team is currently discussing the reports in various modules and discovering more details about the requirements. 7/31/2024: The H4 Project Team continues to discover additional details and requirements as reports are discussed.</p> <p>8/31/2024: Additional details throughout various modules are discussed and discovered along with WRICEF reports.</p> |   |

**Reports and Analytics: Observation, Risk, Issue and Feedback/Mitigation**

9/30/2024: There continue to be additional details being discovered and discussed throughout various modules such as FA, PS, FM, and HCM. 10/31/2024: Additional details are discussed, and some re-discovery is taking place in most modules.

11/30/2024: There were no report specific meetings, however additional information and details are discussed in CRP and general module sessions. 12/31/2024: Reports were shown and discussed in CRP sessions and regular meetings, and additional details were discussed.

1/31/2025: There was no dedicated session for reports. However, some report-related requirements were discussed during meetings, such as the EGS CRP and GL sessions.

2/28/2025: Reports are discussed during GL and HR sessions as part of the regular module meetings.

3/31/2025: FSD objects for ITC 2 are scheduled to start on the last day of March and expected to take about three months based on the proposed Project Plan.

3/31/2025: Testing of custom reports, as part of the WRICEF objects, is scheduled to begin during ITC2 according to the proposed three-month Project Plan. However, it is recommended that all WRICEF objects, including custom reports, be thoroughly tested and validated beforehand, ideally even prior to the start of the ITC cycles.

9/30/2025: There were no report specific meetings, however additional information and details are discussed in CRP and general module sessions.

10/31/2025: There were no report specific meetings, however additional information and details are discussed in CRP and general module sessions.

11/30/2025: No major Updates in the reporting side of the H4 project in November.

12/31/2025: There were no significant updates on the reporting aspect of the H4 project during the month of December.

01/31/2026: There were no significant updates on the reporting aspect of the H4 project during the month of January.

K. Subject Category: Data Conversion

| Data Conversion: Observation, Risk, Issue and Feedback/Mitigation  |   |
|--|---|
| Risk   | Impact  |
| <p><b>ORI ID: R-221130-04</b></p> <p>Data Conversion strategy and plan documents have covered the details such as source/target, cleansing, dependencies, and validations. WRICEF and detailed data conversion work deferred from the Explore Phase are discussed and performed during FSD sessions.</p>   |  |
| Feedback/Mitigation/Updates  |   |
| <p>It is recommended to catch up on work deferred from the Explore Phase and to explore Data Conversion materials in detail to finalize the Data Conversion WRICEF in FSD.</p> <p>12/31/2022: Data conversion discussions are making progress. However, familiarity of H4 terminologies, functions, and processes by DOTD will be needed to adequately review and complete data conversion FSDs.</p> <p>1/31/2023: FSD meetings are continuously being held to review data conversion specifications, especially to identify source of data that needs to be extract from.</p> <p>2/28/2023: Data conversion discussions have been held and are making progress.</p> <p>3/31/2023: It is observed that more explanation and data conversion details, such as sequences and impacts of data conversion upload from various modules, need to be provided by SI for DOTD's better understanding and preparation.</p> <p>4/30/2023: As FSDs and data conversion are being reviewed, new information about data conversion is constantly being discovered and revealed. However, it is important to note that certain details should have been discussed and clarified during the Explore Phase.</p> <p>5/31/2023: More details and information regarding Data conversion have been found and discussed.</p> <p>6/30/2023: AR Customer and GL data conversion FSD were discussed, reviewed, and submitted for questions and comments. Data conversion needs to be performed in an integrated manner, and it is recommended that various modules engage in integration discussion for a successful data conversion.</p> <p>7/31/2023: No major updates.</p> <p>8/31/2023: Several FM data conversion meetings were convened, during which it became evident that fostering enhanced direct communication among cross-functional business areas was imperative. Consequently, it is recommended that various module leads actively engage in collaborative discussions to guarantee a seamless and successful data conversion process.</p> <p>9/30/2023: The data conversion meetings were held to discuss PS Master Data Conversion, AR Customer Data Conversion, and sample overall Data Conversion Schedule. Some modules have overlapping data, and it is recommended to have more collaborations with integration in mind to avoid any inaccurate balances.</p> <p>10/31/2023: Several data conversion meetings were conducted to address data conversion sources, mapping, rules, and journals. Nevertheless, it has been observed that further effort and in-depth analysis are required to address the intricacies of data integration points across modules.</p> <p>11/30/2023: Data conversion meetings were held to discuss PS Master Data Conversion, AR Customer Data Conversion, and AR Open Invoice Data Conversion. Solution designs and requirements were reviewed and discussed.</p> <p>12/31/2023: No major updates.</p> |   |

**Data Conversion: Observation, Risk, Issue and Feedback/Mitigation**

1/31/2024: Several PS Master Data conversion meetings were held, during which time data mapping and sources were discussed and reviewed to ensure comprehensive data migration.

2/29/2024: Data conversion meetings are ongoing.

3/31/2024: PS Master data conversion meetings were held. It is recommended that more data conversion meetings be held for other modules as well. 4/30/2024: PS Master data conversion meetings were held, and PO data conversion discussions took place to continue developing related FSDs.

5/31/2024: A high-level budget data conversion was discussed during the budget process meetings.

6/30/2024: The data conversion meetings for various areas such as AR, FM, GM, and FA were held, during which, additional details regarding the requirements were discovered and discussed.

7/31/2024: Meetings were held to discuss additional details regarding requirements for data conversion in areas including AR Customer, FM Master Data, GL Trial Balance, Purchase Orders, Project & System Master Data, and Fixed Asset Data.

8/31/2024: While most modules focused on CRP sessions, there was ongoing discussion around Data Conversion, and incremental progress was made in a few modules.

9/30/2024: Data conversion meetings and discussions on AR customers, Internal Orders, and MVSO Grants continue to be ongoing. 10/31/2024: The discussion about data conversion continued, particularly with MVSO.

11/30/2024: There was no data conversion specific meeting, however discussions took place as needed per module during CRP or general module meeting, particularly with FHWA.

12/31/2024: No major updates.

1/31/2025: No major updates.

2/28/2025: DOTD held internal discussions on data conversion, particularly for GL. However, no meetings specifically focused on Data Conversion took place.

3/31/2025: No data conversion activity took place outside of general module meetings.

9/30/2025: There was no data conversion specific meeting held this month; however, discussions took place as needed per module during CRP or general module meeting.

10/31/2025: There were few data conversion specific meeting held in the month of October; however, discussions took place as needed per module during CRP or general module meeting.

11/30/2025: LSMW and LTMC will not be compatible for data conversion for version 2023. IV&V recommends that the LSI use the new compatible data conversion tool, Migration Cockpit that comes with SAP S4 HANA version 2023 after the upgrade is complete.

12/31/2025: LSMW and LTMC are not compatible with the 2023 version for data conversion. Following completion of the upgrade, IV&V recommends that LSI leverage the SAP S/4HANA 2023-compatible data conversion tool, Migration Cockpit, to support a smoother migration process.

01/31/2026: No major update.

L. Subject Category: Documentation

| Documentation: Observation, Risk, Issue and Feedback/Mitigation   |   |
|---|---|
| Issue   | Impact  |
| <p><b>ORI ID: I-221130-03</b></p> <p>It is observed that meeting minutes or action items from the project discussions are not always provided. To-Do lists and summaries of the meetings may have been gathered on individual levels, but this makes it difficult to track the progress as a project team and challenging to collaborate between the H4 Project Team members.</p> |  |

Documentation: Observation, Risk, Issue and Feedback/Mitigation

**Feedback/Mitigation/Updates**

It is recommended to prepare meeting summaries and/or to-do lists from the meetings to efficiently prepare, plan, and navigate the follow up activities and hold efficient meetings.

12/31/2022: No major updates.

1/31/2023: PMO meeting minutes and agenda for weekly standing meetings have been provided. It will help to have meeting minutes for other Realize Phase meetings as well.

2/28/2023: Meeting minutes are required to track action items and to-do tasks. For example, PO match options, H4 values for FAMIS project/Ph/Act fields, Workflow routings, source/object codes, fixed asset funds, payroll accounting entries, etc. Currently, it is difficult to track who needs to perform what task by when without meeting minutes.

3/31/2023: A document such as meeting minutes or an action items list should be compiled after each meeting--as opposed to each individual tracking their own tasks--to share with DOTH and have a cohesive follow up for the various meetings that are taking place.

4/30/2023: No major updates. It is recommended that DOTH and SI develop a standardized procedure for meeting minutes or task lists to track action items effectively.

5/31/2023: Some progress has been made, but it is recommended that meeting minutes and action items be shared on a centralized platform like Teams and ensure they are monitored and followed up.

6/30/2023: No major updates.

7/31/2023: It is recommended to distribute meeting minutes via Word documents and gather action items of various modules in one place using master tracking Excel sheets with details such as due dates and responsible parties through the centralized Teams platform while also ensuring vigilant oversight and prompt follow-up.

8/31/2023: No major updates.

9/30/2023: No major updates.

10/31/2023: It is recommended to establish a process to manage and distribute meeting notes, consolidate action items from various modules, and document critical business decisions made during discussion sessions. This will facilitate efficient oversight, streamline task management, enhance accountability, support prioritization, and guarantee timely follow-up on critical action items.

11/30/2023: No progress has been made.

**Documentation: Observation, Risk, Issue and Feedback/Mitigation**

12/31/2023: It is recommended to document major business decisions and establish/maintain a comprehensive master list of business decisions covering all modules. This proactive measure aims to prevent unnecessary rediscovery and redundant discussions, contributing to enhanced efficiency in meetings and communication.

1/31/2024: No major updates.

2/29/2024: Meeting minutes and follow-up lists are becoming increasingly vital due to the infrequent occurrence of meetings. It is challenging to recall the discussions and decisions made during these meetings without proper documentation.

3/31/2024: No progress has been made.

4/30/2024: The lack of meeting minutes is noticeable, and multiple discussion points must be revisited. To streamline the meetings, it is highly recommended that meeting minutes be generated, and business decisions logged.

5/31/2024: Meeting minutes were created for one of this month's meetings, which was helpful in tracking progress. It is recommended that meeting minutes and business decisions be documented for all meetings.

6/30/2024: No progress has been made.

7/31/2024: No progress has been made; however, it is recommended that meeting minutes are documented for all meetings moving forward.

8/31/2024: There have been improvements in some meeting sessions now that meeting minutes are provided. This should be the standard for all meetings to aid recollection and document progress.

9/30/2024: It is recommended that meeting minutes are adopted as the standard for all meetings to facilitate better meetings in the future.

10/31/2024: There are a few occasions where previously discussed and decided topics resurface for another discussion, and this stems from a lack of meeting documentation. It is recommended that all meetings adopt meeting minutes and a to-do list coming out of a meeting.

11/30/2024: No progress has been made. It is apparent that documented meeting minutes or summary would help the project as previously discussed topics continue to resurface.

12/31/2024: No progress has been made.

1/31/2025: No progress has been made.

2/28/2025: No progress has been made. The project has experienced resource turnover, and these meeting minutes/summaries could have helped ensure better implementation continuity.

3/31/2025: The project continues to experience re-discovery, repeated discussions, and revisiting information; this cycle can be minimized through the establishment of proper meeting minutes or meeting summaries. Although there were a few times meeting documentation was implemented for specific modules or specific types of meetings, no consistent documentation has come out of meetings on a regular basis. This continuously hinders the progress and continuity of the project.

9/30/2025: CDD was reviewed by DOTH functional team. Recommended config corrections were updated by LSI team in the system config and CDD documentations were updated.

10/31/2025: CDD was reviewed by DOTH functional team. Recommended config corrections were updated by LSI team in the system config and CDD documentations were updated.

11/30/2025: IV & V recommends that LSI share the KT and End-to-end CRP documents to DOTH in advance to prepare for the sessions.

12/31/2025: IV&V recommends that LSI share the KT and end-to-end CRP documentation with DOTH in advance to support effective preparation and productive execution of the sessions.

01/31/2026: IV&V recommends that LSI share the KT and end-to-end CRP documentation with DOTH in advance to support effective preparation and productive execution of the sessions.

M. Subject Category: Training and Knowledge Transfer

| Training and Knowledge Transfer: Observation, Risk, Issue and Feedback/Mitigation  |   |
|--|---|
| Issue  | Impact  |
| <p><b>ORI ID: I-221031-01</b><br/>                     DOTH project team members have not been sufficiently provided instruction and training to actively access H4 and familiarize themselves with H4 functions and processes.</p>  |  |
| Feedback/Mitigation/Updates  |   |
| <p>It is recommended that SI provide training and instruction on how to navigate and process basic transactions so that the DOTH project team members can be more experienced with H4 and get ready for the System testing, verification, and validation.</p> <p>11/15/2022: No major updates. It is recommended that DOTH test availability of Dev environment from on and off DOTH network. 12/21/2022: Orientation meeting for Subject Matter Leader Knowledge Transfer was held. No dates for the trainings have been set yet. 1/31/2023: Weekly standing meetings have been started to provide DOTH project team member trainings.</p> <p>2/28/2023: Knowledge Transfer sessions are taking place and training is being provided. However, it is observed that there is a lack of instruction (training material) for the training sessions.</p> <p>3/31/2023: DOTH requested many times for documented training material to be provided for Knowledge Transfer sessions and SI is working on it. 4/30/2023: There have been additional discussions during PMO meetings for DOTH project team member training materials and SI will follow up on it. 5/31/2023: No major updates.</p> <p>6/30/2023: No major updates.</p> <p>7/31/2023: No major updates. 8/31/2023: No major updates.</p> <p>9/30/2025: No major updates. Although some level of informal training occurs during FSD meetings, it remains challenging to grasp and follow without the availability of adequate training materials.</p> <p>10/31/2025: No major updates.</p> <p>11/30/2025: LSI stated that they will provide the training materials and training after the completion of the end-to-end CRP. However, IV&amp;V recommends completing the system upgrade first and create the training materials based on the updated system.</p> <p>12/31/2025: LSI has indicated that training materials and sessions will be delivered after the end-to-end CRP. IV&amp;V recommends prioritizing the system upgrade first, ensuring that training materials are developed on the updated system to maximize accuracy, relevance, and effectiveness.</p> <p>01/31/2026: LSI has indicated that training materials and sessions will be delivered after the end-to-end CRP. IV&amp;V recommends prioritizing the system upgrade first, ensuring that training materials are developed on the updated system to maximize accuracy, relevance, and effectiveness.</p> |   |

## IV. Meetings and Discussions Participated for the Month of Jan 2026

| Meetings and Discussions |              |  |  |
|--------------------------|--------------|--|--|
| Meeting ID               | Meeting Date | Meeting Title  | Meeting Description  |
| MJAN2026-001             | 01/02/2026   | Discuss response to LSI feedback                             | A Meeting held to Discuss response to LSI feedback                             |
| MJAN2026-002             | 01/05/2026   | Discuss Updates  | A Meeting held to Discuss Updates  |

VII. Appendix

A. Impact Definition

| Value     | Legend  | Description   |
|-----------|---|---|
| N/A       |  | Not Applicable  |
| No Impact |  | No Impact   |
| Low       |  | A priority of <b>Low</b> is assigned if there is a possibility of low impact to product quality, scope, cost, and/or schedule. Minimal disruption is possible, and some monitoring is likely needed to ensure priority does not increase. |

**STATE OF HAWAII, DEPARTMENT OF TRANSPORTATION, HIGHWAYS**

|               |   |   |
|---------------|---|---|
| <b>Medium</b> |  | A priority of <b>Medium</b> is assigned if there is a possibility of moderate impact to product quality, scope, cost, and/or schedule. Some disruption is likely and a different approach may be required. Mitigation strategies should be implemented as soon as feasible.   |
| <b>High</b>   |  | A priority of <b>High</b> is assigned if there is a possibility of substantial impact to product quality, scope, cost, and/or schedule. A major disruption is likely, and the consequences would be unacceptable. A different approach is required. Mitigation strategies should be evaluated and acted upon immediately. |

**B. Status Definition**

| <b>Status</b>        | <b>Description</b>  |
|----------------------|---|
| <b>Open</b>          | Observation, risk, or issue is created.   |
| <b>In Progress</b>   | Observation, risk, or issue is addressed and is being worked on by the H4 implementation team.                        |
| <b>In Dispute</b>    | Observation, risk, or issue is not acknowledged or accepted by the H4 implementation team.                            |
| <b>Risk Accepted</b> | Observation, risk, or issue is acknowledged or accepted by the H4 implementation team but is not being worked on now. |
| <b>Closed</b>        | Observation, risk, or issue is closed.  |

**C. Subject Category Definition**

| <b>Subject</b>     | <b>Subject Category</b> | <b>Description</b>   |
|--------------------|-------------------------|--|
| Project Management | Schedule Management     | Identify and assess risks and issues that may impact the project completion schedule. This may include analysis of the scale and complexity required, work breakdown and assignments, and assessment of proper planning regarding scope, budget, resources, etc. |
|                    | Resource Management     | Identify and assess risks and issues associated with allocating proper resources (e.g. time and expertise) necessary to complete the project.  |
|                    | Quality Management      | Identify and assess risks and issues to quality, specifically software, functionality, testing, documents, etc. via implementation of internal and external measures and processes established to regulate quality level as needed.                              |

**STATE OF HAWAII, DEPARTMENT OF TRANSPORTATION, HIGHWAYS**

| Subject              | Subject Category  | Description   |
|----------------------|---|---|
|                      | Risk/Issue Management   | Identify and assess risks and issues to software and deliverables. This may include considering and/or implementing processes to identify, monitor, communicate regarding, and mitigate potential items that could negatively impact the project.   |
|                      | Organization Change Management  | Identify and assess risks and issues involved in implementing changes necessary to optimize benefits of the new system. This may include end-user education of updated procedures, roles, responsibilities, technology, communication, etc.         |
|                      | Communication Management  | Identify and assess risks and issues that prevent stakeholders from communicating effectively by assessing their key objectives, developing, and implementing procedures to communicate purposes clearly, and analyzing methods to obtain feedback. |
|                      | Contract Management   | Identify and assess risks and issues that could impact the H4 Project Team's ability to deliver on its contractual commitments such as cost, scope, size, etc.  |
|                      | External Impact Management  | Identify and assess risks and issues external to DOT, IV&V, and SI that could impact the following: subcontractors, regulatory, market, customer, weather, etc.   |
| Implementation       | Requirement Management (Processes, Requirements and Fit/Gap)  | Identify and assess risks and issues to business process, system software requirements, and fit/gap of process and available functionalities of the software.   |
|                      | Solution Design and Configuration   | Identify and assess risks and issues to solution design and configuration of the software implementation of the system.   |
|                      | Interface and Integration   | Identify and assess risks and issues that relate to functionalities that interact with outside system or software.  |
|                      | Reports and Analytics   | Identify and assess risks and issues to reporting and analytics functionality of the system.  |
|                      | Security  | Identify and assess risks and issues to security of the system such as authentication, user access control, encryption, or any other items that relate to keeping the information secure.   |
|                      | Data Conversion   | Identify and assess risks and issues to data conversion process or resulting data when moving data from the old system to the new system.   |
|                      | Documentation   | Identify and assess risks and issues in documentation deliverables.   |
|                      | System Testing  | Identify and assess risks and issues related to testing the functionalities of the system for the requirements.   |
|                      | Training and Knowledge Transfer   | Identify and assess risks and issues with training and knowledge transfer of the new system and its use for DOT business.   |
| Production Migration | Identify and assess risks and issues to the system migrating from test environment to production environment. |   |

**E. Appendix: Comment log on Draft Report**

| <b>Comments</b>  | <b>IV &amp; V Response</b>  |
|--|---|
| <p><b><u>Project Plan, Schedule, and Go-Live Readiness</u></b></p> <p>The report continues to highlight the absence of a fully baselined Project Plan. LSI recommends clarifying that finalization of the Project Plan depends on the completion of the ongoing end-to-end CRP sessions, which are currently underway and expected to continue through mid-May 2026.</p> <p>Completion of these CRPs will provide the necessary inputs to finalize detailed planning for Unit Testing, User Acceptance Testing, Cutover, and deployment activities, based on validated end-to-end scenarios.</p> <p>With respect to the Go-Live timeline, LSI understands that DOT is evaluating the overall schedule considering the remaining validation and testing activities. Based on current progress and upcoming phases, it may be appropriate to reflect that additional time is being considered to allow for more comprehensive testing and readiness activities, with a potential shift of Go-Live to January 2027.</p> <p>Framing this as a proactive decision to ensure sufficient validation, testing coverage, and deployment readiness would more accurately reflect the program's intent at this stage.</p> | <p>IV&amp;V understands that additional time is needed to complete the CRPs. However, the contract documents do not specify that the baselined project plan is dependent on the completion of the CRPs.</p>                                     |
| <p><b><u>WRICEF and Functional Specification Documents (FSDs)</u></b></p> <p>LSI recommends further clarifying the dependencies impacting WRICEF and FSD completion. Progress in these areas continues to be influenced by:</p> <ul style="list-style-type: none"> <li>• Pending Change Order approvals, which define the final scope, and</li> <li>• Final confirmation of certain requirements by DOT.</li> </ul> <p>Explicitly noting these dependencies will help distinguish between activities awaiting required inputs and those within LSI's execution control.</p>  | <p>Per the PMO meetings, it was agreed that LSI should include the open items for WRICEF, FSDs, and Change Orders in the Functional meetings for discussion. However, these open items remain to be addressed in the Functional meetings.</p>   |
| <p><b><u>Knowledge Transfer (KT) and Training</u></b></p> <p>The report notes that formal Knowledge Transfer activities have not yet commenced. LSI recommends clarifying that knowledge transfer is being addressed through ongoing CRP sessions and will continue as part of subsequent testing cycles, rather than as a separate, standalone phase.</p> <p>CRPs are currently enabling hands-on familiarization with business processes and system behavior, and this approach will continue through testing and deployment preparation. Positioning KT as embedded within execution activities would more accurately reflect how knowledge is being transferred across the program.</p>  | <p>IV&amp;V recognizes that learning takes place in the CRP sessions and during other project activities. However, KT and CRP are separate contract deliverables with their own requirements and acceptance criteria specified in the DEDs.</p> |

STATE OF HAWAII, DEPARTMENT OF TRANSPORTATION, HIGHWAYS

|  |  |
|--|--|
| <p><b><u>Risk and Issue Management</u></b></p> <p>The January draft continues to reference open risks and issues. LSI recommends refining this section to distinguish between:</p> <ul style="list-style-type: none"><li>• Items arising from ongoing CRP validation and discovery, and</li><li>• Items representing delivery or schedule risks.</li></ul> <p>Providing this distinction will help present a clearer view of project health, particularly as the project progresses through validation and into execution readiness.</p> | <p>LSI should discuss these suggested changes to Risk and Issue Management during the PMO meetings.</p>  |
| <p><b><u>Cross-Module Coordination and Integration</u></b></p> <p>LSI recommends acknowledging the increased cross-module coordination observed during CRP execution. Participation across functional areas has improved, and integration points are being actively validated through end-to-end scenarios.</p> <p>While some integration activities remain in progress, they are expected to mature further as CRPs are completed and testing preparation advances.</p>   | <p>Three CRP sessions were conducted in January; however, the Integration Lead was absent for two of them. While the Integration Lead attended the final session, there was no cross-functional support available.</p> |

| OR1119 46050 | Issue | Realize | DOTH would like to understand why Classic Workflow was selected instead of Flexible workflow for each of the workflows | Paul        | 1/28/2026    | Medium   |                        | Eshiba, Edgar, Montenegro, Seifhar, Nag | Paul         |                 |            |        |             |          |         |                        | 1/28/26 - Meeting to Discuss flexible workflow with DOTH and LSI. Shyam and Ron agreed to have the respective functional consultants review the Workflow selection with DOTH to determine if Classic or Flexible best meets DOTH's requirement.<br>2/2/26 As discussed in issue #78, LSI proposed that RTM requirement AP-037 would be met by H4 (Ability for systems accountants to update or maintain AP approval hierarchies without programming skills). DOTH has not waived this requirement. BAFO page 10 states: "No requirements can be omitted from the Specifications for a Service or Deliverable without the written consent of the State". DOTH does not want to incur the additional costs of contracting for workflow programming for this unmet requirement pag. BAFO page 201 states: "LSI confirms that all requirements in the RFP Appendix C are included in the proposed implementation scope budget. We are confirming we can meet these requirements with standard SAP functionality and if there are any gaps found we will provide the enhancements required to deliver the solution". |           |

| OR214142  | Issue | Propose | Delayed delivery of updated project plan to continue reworking  | John Mielke          | 7/26/2021    | Low      | 9/30/2021              | Rock Miao                    | John Mielke                  | 6/25/2021       | Assigned to deputy PM. The resource will not be on the project due to a new replacement is being sought. |        | Project Management | Resource Management             | Open    |                        | 4/20/22 - The Project Plan is on hold, pending approval of the change. As we are being the schedule, updates to the plan are not possible as the change is not approved. Once we have approval we will develop a rolling 60 day plan with more detail for front end high level tasks beyond the 60 day contract. 4/27 - FPO is close to being finalized. This is the last FPO to be completed to close the Design services. Once complete, the schedule can be updated and finalized for the 7/1/23 on LSI.<br>10/4/22 - Update Item 1 project plan sent to DOTH, cover pending discussions between Tommy and Shyam. DOTH updated the updated plan and provided comments in the 3/16/2023 meeting.   |           |
| OR2504893 | Issue | Resolve | During FPO review the Business Flow Procedure of assets was brought up as a question by DOTH. This business process needs to be clarified. The Asset FPO documented that the requisitioner would create the FPO and change to and FO and request IT object code and workflow then would send every single asset requisition to HWY-SP for control of the asset and update on the FPO. This will cause a huge bottleneck. Another option for DOTH to consider is for the requisitioner to create the asset and during the requisition creation not add the description. ITA fields and not account coding on the asset record should then cover deeply to the FPO. The IT object code would then allow the workflow to HWY-SP if just an update check on the asset field.  | Brenda               | 11/29/2022   | Medium   |                        | Tim S. | OR2544493 | Issue | Resolve | The FAMS interface file. Mapping logic is defined by LSI based on the file layouts received from DOTH. LSI has not provided payment file. Payment interface to FAMS server used by DOTH in the past. This is a new process for DOTH with the implementation of HA. Risk level is High. DOTH has provided a PO interface, but this was discontinued for last several years so there are concerns over how to interface this data to DAGS. PO interface has only been done recently but will change to align with implementation of HA. Risk level is low.  | Brenda               | 11/29/2022   | Medium   |                        | Nga, Hilde, DOTH, DOTH, DOTH | Nga, Hilde, DOTH, DOTH, DOTH |                 |  |        |                    | Risk- Issue Management          | Open    |                        | 11/1/24 - To be resolved with the DOTH and LSI teams.<br>11/2/24 - The FAMS PO interface will be resolved only after the testing of the FPO is complete.<br>11/2/24 - The FAMS Payment interface mapping can only be confirmed after testing once a payment interface file has been used in the past.<br>11/4/24 - Keep status as "In Progress" until there is test file to be used.<br>11/12/24 - To be resolved with the DOTH and LSI teams.   |           |
| OR2564493 | Issue | Resolve | Data cleansing of change codes will be needed by DOTH with the assistance of LSI for Project WBS and ODR conversions. This will be an ongoing effort working a Team with DOTH is able to provide a good source file. (99-C00)   | Brenda               | 11/29/2022   | High     |                        | Hilde and Deany              | Hilde & Deany                |                 |  |        |                    | Data Conversion                 | Open    |                        | This will be an ongoing data cleansing effort. The last change code file was dated July 21, 2022. The 10 data cleansing updates is documented on the Assumption matrix of CCM001 10 Conversion FPO.<br>10/23/22 - FPO for CO-001 was conditionally approved on 10/4/22. Since data cleansing is an ongoing task, we will keep this issue "In Progress".<br>6/7/23 - New DORALL file dated 6/7/23 was received from Vanessa. Will use this file for next testing CO-001. Data cleansing recommendations based on the CO-001 FPO is an ongoing task and remains "In Progress" status.<br>6/14/23 - Keep "In Progress" status as this is an ongoing data cleansing task.<br>6/15/23 - Hilde and Deany Change Codes of 10/19/22 status that should transition to WBS2 to HA. Run on 10/19. CO Weekly status in Sept will re-visit the cleansing effort steps for Change Codes, DOR and DOR Work Order files, for FY 2024 and 2025 data.<br>8/30/24 - Need to start on making record corrections if any as required for DOTH for HA. Possible next request to DOTH, Ron, Hilde and Vanessa to see when test document. |           |
| OR2594493 | Issue | Resolve | During the Vendor master data conversion. 10/17/22 the POH user's Vendor discussion brought up the issue of how petty cash payment and replenishment process will occur in HA.  | Brenda               | 11/29/2022   | Medium   |                        | Hilde and Nga                | Nga and Hilde                |                 |  |        |                    | Data Conversion                 | Open    |                        | Meeting held to discuss GL balances conversion and consider identify a single data source to establish the beginning fiscal year balances for 9/30/22. The current process involves extensive manual effort with multiple supporting detailed reports and adjustment entries tracked in excel spreadsheets. The sample FY 2022 test balances provided to us on high level and do not have the level of detail (balances by GL account and Fund) needed for balance conversions in HA.<br>6/14/23 - Balances will be provided by Vanessa on an excel format manually a periodic review. Balances cannot be directly derived from HWYAC or FAMS or DataMart due to additional manual data entries is required after manual work done by Vanessa. FPO is in progress.<br>6/14/23 - FPO submitted to DOTH on 6/22/23.<br>6/14/23 - Remains "In Progress" until test file is provided.<br>11/12/24 - To be resolved with the DOTH and LSI teams.  |           |
| OR2604493 | Risk  | Resolve | GL Balance Conversion - There is no single data source to get GL balances for 9/30/22. The current process involves establishing balances of year fiscal year requires manual data completion steps that consist of using multiple supporting financial reports with adjustment journal entries (not tracked in HWYAC system). This may become a risk if conversion balances for prior years cannot be determined, validated and reconciled in a timely manner. (GL-C00)  | Hilde                | 12/26/2023   | High     |                        | Vanessa and Hilde            | Vanessa and Hilde            |                 |  |        |                    | Risk- Issue Management          | Open    |                        | Meeting held to discuss GL balances conversion and consider identify a single data source to establish the beginning fiscal year balances for 9/30/22. | OR2724493 | Issue | Resolve | FAMS transaction codes file updates multiple FAMS TCs with same set of debit and credit accounts  | Hilde                | 5/4/2023     | High     |                        | Vanessa and Hilde            | Vanessa and Hilde            |                 |  |        |                    | Solution Design & Configuration | Open    |                        | 5/17/23 - GL-0010, GL-0011, GL-0012 user the FAMS transaction codes file to substitute FAMS TC automatically. However, the file contains multiple FAMS TCs with the same codes as HWYAC TCs. Data & Credit Codes and Accounts Property used TCs. Working with DOTH to determine if longer identifier can be determined. The file needs to be changed to accommodate to reflect the correct FAMS TCs.<br>6/7/23 - There has been working with Hilde accountants to clean up the FAMS transaction codes file. Issue remains "In Progress" status.<br>6/14/23 - FPO submitted to DOTH on 6/22/23.<br>6/14/23 - Remains "In Progress" until test file is provided.<br>11/12/24 - To be resolved with the DOTH and LSI teams.   |           |
| OR2734493 | Issue | Resolve | Conversion of data from Purchase Orders and Contracts; There are 2 different sources from where the Open Purchase Orders and Contracts could be extracted within DOTH. While Purchase Orders can be generated from the Legacy system AS400. One needs for each related and DOTH Admin and Branch Offices, there is manual effort involved to ensure the data points (for example in the DOTH Contracts, with Vendor and Change items and Options not in the data description) into customer format from a string of free items stored in the AS400 system. The manual effort needs to be repeated for different test cycles with updated data and for the final production conversion based on test file data. Contract data needs to be extracted from the FAMS balances as reflected in DATAMART and translated to the template would be a manual effort to visit the fields of the template and the activity needs to be repeated and updated per test cycles and for the final production conversion as well. The process is in ensuring the readiness of the data in time for go-live based on test file data as well as accuracy of the data. | Nga, Hilde and VU    | 5/9/2023     | Medium   |                        | Nga, Hilde and VU            | Nga, Hilde and VU            |                 |  |        |                    | Risk- Issue Management          | Open    |                        | 10/30/2023<br>Legislative Council DOTH Contract 5<br>Customer Data for conversion sample file reviewed<br>Have about 200 and open ended contracts (only for POH)<br>Link to Purchase Orders DOTH (Duplicate Conversion file for POH) @Nga<br>10/16/2023 to 10/23/2023<br>Met with Hilde and Jonathan on Contracts data<br>10/23/2023<br>Questions on Purchase Orders created from FPO and DOTH?<br>Contract updated with sample FPO file that appears to be Open ended Contracts<br>10/27/2023<br>Contract template is circulated<br>Reference Contract template in "Open Issue"<br>Confirmation on AS400 categories the document type mapping during conversion<br>Open provided the AS400 categories and terms on call and the Tab "AS400 and HA Categories" is updated. | OR124447 | Risk  | Explore | 10/26/2021 - As discussed in the PMO, Tammy requests Neg and Stevieha prepare a more detailed presentation that she can review with the DEs and OAs to get their approval for the PM. The presentation would be similar to the one Patrick did for budgeting decision regarding moving Budget (Appropriation) Documents. DOTH needs more detailed information on the implications of implementing Plant Maintenance to meet District requirements as an alternative to linking the proposed interface to AS400 to use existing AS400 functions to meet requirements. The process flows presented do not follow LSI project standards and lack review lines to understand change management issues. What is the difference between a work order and a notification?<br>What are order types? What kind of reporting data can come out of a work order?<br>What kinds of data can be captured in a work order?<br>Location - where does equipment usage occur? - materials used? - weather conditions - order<br>How do you measure work orders being used? Will the work order replace our 5-type charge codes? Will one work order = 1 type charge code? How are work order costs collected? Semi-monthly? Monthly? Yearly? Are there any workflows involved with work orders?<br>What DMR processes would remain in AS400 should the decision be to keep the AS400 for the DMR? What DMR processes would move to PM should the decision be to implement PM instead of the interface? | Debbie Brighton | 10/9/21    | Medium | 5/4/2022  | Stevieha<br>Nig Verker |         | See comments   | Procurement         | Interface & Integration       | 5/4/2022  | Please see the email response sent to the team on 10/11/2021 What is the difference between a work order and a notification?<br>Answer/Notification is a preceding document for a work order which contains the basic information provided as part of a complaint log. Notification is similar to current Complaint recorded in database in DOTH Work order can either be created directly or will reference to a Notification. What is order type? Answer/Order type for a work order can be differentiated for different work (the preventive maintenance or breakdown maintenance, Emergency, Lockdown workorder, Traffic Signal Maintenance, Move pool maintenance, etc. What kind of reporting data can come out of a work order? What kinds of data can be captured in a work order - location? Answer/by maintenance location, by plant (district branch), and by equipment all work orders for a period can be drawn as a standard report - where does? Answer/Materials used and costs associated with materials (including JOT can be drawn for the work order reports - equipment usage lines? Answer/Reports for equipment usage can be drawn by location for a period for all work orders. For Equipment Maintenance, equipment use work order will be used to record the costs incurred. For Maintenance workorders, where a specific equipment is used, usage in terms of sales hours are captured - materials used? Answer/Work order will contain materials used reports, other How do you measure work orders being used? Answer/Best practice is to create work order before work is performed and estimate costs and compare estimates to actuals later on. Work orders can be created by planning the costs or after the fact. We understand most of the current process is after the work is done through DMRs. We will configure the system with both options. Work Orders in Plant maintenance will replace DMR process. Will the work order replace our 5-type charge codes? Will one work order = 1 type charge code? Answer/We understand that 5-type charge codes are used for maintenance work orders. This could be one of the "Order Types" for Work orders. How are work order costs collected? Semi-monthly? Monthly? Yearly? Answer/Costs are collected as soon as the actuals are posted. Settlement will post into the other records such as Project, Cost Center, etc as needed. (Could be a periodic job) Are there any workflows involved with work orders? Answer/Yes, if it is possible. We need to capture the requirements for it. |   |

| OR204449   | Risk  | Explore | Allow Project & Budget Staff (HWY-68 & HWY-550) or Fiscal Office (HWY-50) to Post Budget (Appropriations) Documents:<br><br>During the budget plan, the question was put forth to DOTD if HWY-50 is still required to be the group that will post the Budget Document in SAP entered by the HWY-50 group. Since the concept of post and post budget document is new to DOTD, this question was to explore any business improvement or transformation at DOTD. The reasoning for this question is that in the current legacy system, HWY-50 does a manual review validation and check balances for the budget items (AUX, AVE, etc.). Since SAP has the capability to do manual data validation and automatically budget balances in real-time, should HWY-50 post their own budget documents and bypass HWY-50. The answer received from Tammy is that budget documents must continue to go through HWY-50 for approval. | Patrick Piroch     | 10/24/2021 | High   | 4/15/2023  | Patrick Piroch   |   | Project Management  | Schedule Design & Configuration | Stand | 4/15/2023  | 10/26/2021 - Email sent on 10/26/2021 to request guidance from DOTD. 5/11 - Any more details? (see Patrick) Tammy is going to allow for fiscal staff to post budget transactions. Issue resolved.<br>5/20/21 Patrick to follow up with Ron to close 4/15/21 - Patrick help meeting to confirm the issue was resolved.  |
| OR204448   | Risk  | Explore | PO Conversion: DOTD does not currently maintain POs accounts by line item. Therefore there is not a direct link between the line items and descriptions to the accounting of the PO.
